Mortimer warns Labour 'act now'

By Anthony Bevins **Political Correspondent**

The Labour Party is today given an official warning that fundamental action is needed to reverse its 30-year decline.

Mr James Mortimer, the party's general secretary, says in his annual report for the Brighton Party conference, which starts on October 2, that the proportion of votes cast for Labour has fallen from 48.8 per cent in 1951 to just 28.3 per cent last June.

"The party is now in a position where quick, superficial reasons for our defeat will not suffice. We must make a serious study of the steady decline in the party's appeal to all sections of the community over the last 30 years. if we are to reverse the situation before it is too late."

But in a separate report on the election campaign. Mr Mortimer concludes that the party should stick to its policies - and change the voters' views.

A preliminary draft of his report was published last June, but Mr Mortimer says in his final version: "It is not the party's policy but public opinion which needs to be changed.

"A serious political party should be prepared to adapt its approach to an issue and to present its proposals in a form designed to maximise support, but it should do it within a policy framework which it believes to be "No socialist worthy of the

traditions of the Labour move-ment should refuse, on occasions, to go against a strong current of public opinion if in so doing he believes such a course is necessary for the purpose of social progress." Yet Mr Mortimer accepts that

there was public ambivolence towards Labour's policies on unemployment and the welfare state, and that it was felt that Labour was making "promises that it could not fulfil. He also points to two problems

which the party could face if it now changed course on unilateral nuclear disarmament and the Common Market. He says any change of defence policy would not end the controversy, but would "only add the charge of inconsistency to other less justified charges made against Labour", and that if Labour failed to repudiate the Treaty of Rome. its current employment policies would come into conflict with Common Market regulations.

Nevertheless, the report says that during the election campaign itself regional organisers con-stantly stated "that criticism on the doorstep centred on the image party and, for a lengthy period, our defence policy.

In one of the few bright spots of the report, it was revealed that the party antioipated a General Election fund surplus of £62.000, with unions contributing £2,260,819. The largest union contribution came from the Transport and General Workers' Union, which d nated £508,252.

Fowler demands action report by February on NHS contract services

Health authorities were told vesterday to seek private tenders for National Health Service cleaning catering and laundry services in a circular demanding progress reports by February.

The services cost the health service £900m a year, of which only £18m is spent on contracted out services. Ministers believe that some hospitals cold save up to 20 per cent of the cost by letting contracts privately.

Despite exhortations, there has

been no sign of a pronounced move by health authorities to contract out those services, although there has been an increase in privatizing building maintenance, engineering and equipment maintenance work.

Mr Norman Fowler, Secretary of State for Social Services, emphasized yesterday that savings from contracting out would be made available for patient care, and that contracts should be let privately only where there

But his department is in dispute with Calderdale and Yorkshire health authorities which claim that £250,000 a year could be saved by an in-house laundry service compared with the pearest private bidder. Minis-

region to tell Calderdale to let the being available only to people contract privately because they object to the £2m capital cost the proposal would involve. The circular exempts private

Japanese battery plan attacked

By Clifford Webb Motoring Correspond

Moves by Japan's biggest atomotive battery manufacturers to set up a national sales network in Britain were attacked by domestic battery producers last night as a direct threat to jobs in an industry which has already suffered severe redundancies

GS Batteries, Kyoto, is one of the world's largest battery manufacturers, accounting for more than 40 per cent of batteries fitted to Japanese cars.

In a joint statement last night, Lucas and Chloride, the two eading British battery companies. said: "The highly competitive UK market place is already under severe pressure from over one million European imports a year reflecting the general excess of capacity in this product area.

"The arrival of a major Japanese importer must add significantly to the problems faced by the established British manufacturers, and can only

manufacturers and can only represent a further threat to the job prospect in this country."

The man who is setting up the Japanese operation in Britain is Mr Michael Orr, the chairman of Colt Cars, a private company which controls the import and sale of Mitsubishi cars. Mr Orr is a controversial figure in the motor trade and recently upset most of his Colt dealers by giving a select

few big discounts.

The Japanese batteries are being marketed by Mitsubishi Power, one of Mr Orr's many

subsidiary companies.

The sales manager of Mitsubishi Power, Mr John Rose, said last night "For some time now there has been a need for the proper distribution of Japanese batteries in the UK. At the moment only a few are being brought in by the people who sel Japanese cars here and they cost In many cases, European batteries do not meet the motor manufac

Falklands

the Army By David Hewson

Senior army public relations staff are to press Mr John Stanley, the Minister of State for the Armed Forces, to make a formal complaint about a Thames schools play about the Falklands, A Game of Soldiers, which is due to begin transmission on Sep-

The play depicts the dilemma facing a group of Falkland children who find a wounded Argentine soldler during the retaking of the islands last year. During the arguments among the children, one of them says that he has heard that Falkland Islanders have been massacring Argentine. ers have been massacring Argen-tine conscripts.

Mr Peter Tabern, the play's producer and director, said yesterday that the reference was yesterday that the reference was not meant to be taken literally and was refuted by other characters in the play. The production, which is to appear in three 15-minute parts, was seen by representatives of the Falkland Islands Government in London yesterday who also objected to its content, but Mr Tabern said that he did not intend to make any alterations to the programme.

the programme.

Two months ago the Army complained about the transmission of a play in the same series which it claimed depicted. young soldiers terrorizing civilians in Wales. That complaint was made after the play was transmitted, but in the latest instance, Mr Stanley, who is now in the United States, will be asked to register a protest with the Independent Broadcasting ority in advance of the

The Army objects to the allegation of civilian atrocities, which it says are unfounded, something which Thames does not contest.

Mr Norman Meredith, a bear transplant patient, was back in hospital last night after being injured in an accident less than a week after returning home from

IRA 'has sought arms from Mafia' The Provisional IRA has been on a shoulder-launched missile

approaching the Mafia in The United States for weapons and explosives, according to the head of American customs.

Mr William von Rash, United States commissioner for customs, said during a visit to London yesterday that he had evidence that IRA agents were now moving towards organized crime because t was harder to get weapons from their usual sources, such as gun stores and middlemen.

"It shows they are a little more desperate so we must be making it tougher for them," he said. "It also reveals their character as a criminal organization. Too many people see them as ideological zealots but their criminal ties are stronger than generally accepted. will shoot or explode. From sidearms to automatic weapons. Through this week Labour leadership candidates have been moving in and out of Blackpool. Their fleeting appearances have been a sign of the new ambivalence of the trade unions to Labour Party politics. The

Mr Shore's visit was particularly brief. Perhaps, it might be thought, an indication that he is about to pull out of the leadership race. There has been som lation on that point, but is is mistaken. Mir Shore will stay in the contest until the end, even though he has not the slightest chance of being elected.

This is no doubt a matter of personal pride. He would not want to appear quitter. But there is another reason was well. As his chances of success have evapor-ated, so his campaign has ceased to be a serious quest for the leadership. Instead, he has used his candidature as an opportunity to say things about the condition of the party that needed to be said. It has been a more fearless and less calculated campaign than any of the others.

From this standpoint, simply being in the race continues to serve a purpose for Mr Shore. There would be no sense, though, in his devoting much time to an occesion that provides an opportunity for discreet and gentle lobbying, but not for outspoker week has not been an appropriate stage for Mr Shore.

A friendly word here, a gentle quip there

It has been a much more congenial setting for Mr Kinnock One of his principal political assets is his engaging personality. and he has been able to move around Blackpool with the relaxed air of an undoubted winner. exchanging a friendly word here, a gentle quip there. All he has peeded to do this week has been to strengthen personal ties with trade union leaders. So the conference has presented him with a useful apportunity but not

Mr Hattersley has been in a more difficult position. He no month, but he is also engaged in a close contest with Mr Meacher for the deputy leadership. Mr Hattersley ought to win, but not by so much that he can afford to disregard the opportunity to curry a little more trade union support. It would be surprising if he scorned the chance of a few useful

Mr Hattersley, too, is not using his campaign simply to win votes. He has not been so consistently uncompromising as Mr Shore, but he has become progressively more outspoken. Because of Mr Len Murray's veto on the candidates, however, Mr Hattersley had to do his speaking outside Blackpool this

At Lancaster on Tuesday evening, he took as his theme the need for reasonable compromise within the Labour Party. He was careful to distinguish between compromise and appeasement. need within the party for "straight talk about its performance, its failure, its policies". He pointed out that it was the failure of the Left to compromise with its opponents in the party which did so much to damage Labour's cause in the election. Yet his analysis served to underline the ambivalence of the position in which he is likely to find himself if he becomes deputy leader.

Time to compromise and a time to fight

Ç.

-No political party can be effective without a degree of compromise. But there is a time to compromise and a time to fight. To compromise too soon can be just as damaging as refusing to compromise at all. As his campaign has developed, Mr Hattersley has given every indication that he appreciates that this is now the time for Labour's right and centre to fight if they are to keep the party in the mainstream of British

Yet as deputy leader, the arguments for compromise which he used on Tuesday evening are ne gsed on I design evening are liable to be doployed against him. He will be told that his contribution to a balanced leadership is to encourage unity from the right, at a time when he make to be encouraging resistant. ought to be encouraging resist-

ance from the right.

The danger will be minimized if Mr Kinnock shares his view of how the party should be guided and Mr Kinnock should not be mistaken for a member of the hard left - if enough senior trade emionists are determined to restore a sense of reality to the party and if the National Executive Committee does not after all swing left at Brighton

But as deputy leader Mr Hattersley will be risking severe pressure to compromise the stand he has taken in his campaign.

Commentary Unions to launch concerted attack in war on 'piratization'

A coordinated campaign against the Government's plans to sell off nationalized industries and public Wellman, and Stephen Goodwin sector services is to be organized by the TUC general council. The campaign, according to the

The campaign, according to the motion successfully moved yesterday by Mr Bryan Stanley, general secretary of the Post Office Engineering Union, will include coordinated industrial action organized by unions directly affected by plans to hive off parts of stateowned industry.

"We have to sink some of our differences and drop some of the pets we have had in some of our organizations and join in defending the public sector and its unions", he

the public sector and its unions", he said. Privatization is being used by the Conservatives as a device to weaken the trade unions in the public sector and as such it is an

attack on us all."
Several speakers described prob-lems and deficiencies that had urisen in local government services is Conservative councils had privatized street cleaning refuse collection and school cleaning and

Mr Malcolm Horne, national union of teachers, said that since children went back to school at the begining of the week, his union had

Mr Bryan Stanley: Call for action.

been deluged with complaints about the situation in the London borough of Merton which had privitized the school cleaning and school meals services. The complaints had been such that all the teacher's associ-ation and all the head teachers had had to threaten the Merton authority that children would have to be excluded from schools unless

something was done quickly.

Mr Stanley said that on the crucial issue of privatization, or "piratization" as is union called it the trade union response had been the trade union response had been disjointed and fragmented. Since the June election, more "piratization" was threatened for British Telecom, British Gas, British Airways, British Shipbuilders, British Airports Authority, British Leyland and Royal Ordnance factories and the National Bus Comment In Jerus courses to longer has a serious chance of Company, in local government and the health service, privatization was

the British Telecom unions' cam-paign against the privatization of BT, that popular support for the public service could not be taken for One of the prime objectives of the

co-ordinated campaign must be to reinstill public confidence in public

reinstill public continence in productive rather than private profit.

Mr. John Edmonds, General, Municipal, Boilermakers and Allied Trades Union, said that his union could produce files of mistakes over the privatization of local government. ment services by the paragons of industrial efficiency. The campaign should concentrate on exposing the weakness in the Government's case. There was no need to be too heavy handed. The attack on the

public services was politically motivated and the public would be more impressed by a few well-chosen examples which contradicted the Government's argument. brought experience was against experience and common sense. The Government was putting forward a false sense prospectus on this issue, and the unions should expose that

He said a private contractor had claimed that his dustbin men could move nearly as fast as Olympic atheletes. The contractor, tendering for work in the North-west of could lift five tons a day, running 28

miles at an average speed of nine miles an hour.

"That is just outside the qualifying time for the Olympic marathon;" Mr Edmonds said.

Then a mistake was found. "Apparently the contractor misread the scale of his map." We could call them cowboys, but when they got on a horse they would probably face the wrong way."

Mr Alas Tuffin, Union of Communication Workers, said he had recently returned from the United States where advertisements were being placed by telephone users in local papers complaining that local charges were skyrocketing after the introduction competition. anter the introduction competition.

He forecasts that once British

BALDNESS

horror' remarks By Paul Routledge Mr Arthur Scargill, the left-wing miners' leader, has proved

once again that he is a top box office draw. Television cameras follow his every move and he can still steal the headlines from historic developments at the Trades Union Congress. He rode out the latest storm

over his controversial views about the Polish Solidarity union yesterday but the discontent building up over his leadership of the National Union of Mine-workers is expected to resurface with renewed bitterness at a national executive meeting next week. His long-time critic, the Lancashire pitmen's leader, Mr Sydney Vincent, sald yesterday These remarks are not doing the union any good. We are becoming the laughing stock of the trade union movement." The turnaround in Mr Scar-

gill's fortunes could scarcely be greater. Elected with a landslide majority less than two years ago, and applanded before he could even get to the restram at previous TUC conferences, he is now openly derided, though he remains a cult figure for a

The NUM president com-plains bitterly that he is the subject of a concerted media coal industry are ignored while any remarks on the international scene get the full "shock, horror" treatment. There is justice in the charge, but his own actions have made him Fleet Street's favourite His delegates were said to be

practically at each other's throats yesterday over the question of support for the TUC General council statement comdemn the Russian shooting down of the

Mr Scargill himself is unrepentant about his letter to the Trotskyist paper, Newsline, which characterized the Polish free trade union Solidarity as "an anti-socialist organization who desire the overthrow of a socialist state". He said: "That does not mean I oppose Solidarity exist-ing. But they are not a socialist organization and certainly not based in the way the British trade union movement is." He went on: "I believe I have

got the support of the delegation, bearing in mind the letter was sent personally. I have no dor there is a move afoot from the newspapers, television and radio to damage me as much as

His letter to Newsline, official daily publication of the ultra left Workers' Revolutionary Party was private and its publication

was private and its photocacon caused serious embarrassment His critics within the NUM leadership believe its credibility is at risk in the days before the miners' leaders meet Mr Ian MacGregor, the new chairman of the National Coal Board, next week to hear of his plans for closing pits.

But it is practically impossible to get rid of Mr Scargill. Asked what would be the outcome of any censure move at the Septembe 15, executive meeting in Shef-field, Mr Vincent observed crisply: "Nowt". Like his ebullient predecessor,

Lord Gormley, Mr Scargill is free to speak his mind. However, hold "at the appropiate time", on

Applause as delegates back fight against pit closures

Mr Arthur Scargill, president of the National Union of Minework-ers, was again the centre of attention yesterday. During the confirence debate on energy policy he was loudly applanded, with some delegates standing, as he called for maximum trade union backing for the NUM campaign against pit closures which would mean the loss of 70,000 jobs.

There were a few boos when he went to the rostrum, but all that was went to the rostrum, but all that was submerged when he attacked what he called the Government's policy of buying out jobs at a substantial price. Such payments were all right for early retirement in all industries, "But no man or woman has the right to sell the job of their son or daughter" he declared.

He persuaded the conference to carry a motion calling for a national energy policy and laying down that the Government should stipulate a target of 200 million tonnes of coal a year.

Supporters and opponents of nuclear power had their say on a motion urging the congress to oppose the introduction to Britain of the pressurized water reactor (PWR). However, in a card vote, an amondment was narrowly carried amendment was narrowly carried adding "if either the Layfield inquiry or the Nuclear Installations Inspectorate declares that the PWR proposed for Sizewell is unsafe".

The nuclear reactor debate began on a motion, moved by Miss Margaret Platt, of the Institution of Professional Civil Servants, calling, among other measures, for more promotion and support for research into alternative energy sources. She complained that the government had reduced the budget Mr Peter McNestry, General

Secretary of the Nat Association of Colliery Over Association of Colliery Overmen,
Deputies and Shottirers (Nacods)
then opened the attack on the plans
to build the American-type PWR
here. Moving a motion asking
congress to declare its opposition to
the proposals, he declared: "We do
not accept that the introduction of

water reactor is necessary, safe, or in water reactor is necessary, saire, or in line with the energy policy".

He asked how expenditure on the project could be justified when world energy requirements were low and there was over-production in all energy industries.

Introduction of the PWR into the

National Grid would result in the closure of one or more older power stations, said Mr McNestry, who stations, said Mr McNestry, who added that continuation of nuclear energy must be with the Ectish advanced gas-cooled reactor.

On the safety of the PWR, he commented: "Three Mile Island happened, We did not imagine it."

You can install all the safety devices you like but we know safety devices fail and human beings make

Mr Isa Gibson, of the Associ-ation of Scientific, Technical and Managerial Staffs, seconding, said the Government wanted to build 10 PWR's at a cost of £2,000m each That meant cuts in other public expenditure to pay for this white

elephant".

There were loud interruptions during the speech of Mr John Lyons, general secretary of the Engineers' and Managers Associations of the Engineers' and Managers associations. ation, who put forward the amendment proposing opposition to the PWR only if the Laylield Inquiry or the Nuclear Installations Inspeciorate declared that the PWR proposed for Sizewell was unsafe. Mr Lyons described the motion as a crude attempt to make congress make up its mind about the PWK before the facts had step established. If the PWK did not meet the

stringent safety requirements laid down then the unions and congress would want nothing to do with it. There was a programme of £700m involving major British firms, he

coal a year, said that, once again, the industry faced the axe as the Tory Government and the coal board

The Government had embarked on a policy of buying out jobs. Miners were being offered more than £20,000 in lump sum payments and up to 90 per cent of take-hor pay over 10 years. The Government had worked out that in putting this into operation it was not thereby buying off the person in the Job, but

his son and grandson as well.

"There may be those in our movement who claim they are entitled to this sort of redundancy entitled to this sort of redundancy payment. I believe we are entitled to those payments for retiring early in all indentry. If you think you have the right to sell your job, that might be your own opinion. But no man or woman has the right to sell the job of their son or daughter, he declared to loud appliance.

Mr Kenneth Sampey, of Nacods, told congress: "Our lads are grabbing the golden handshakes."

The queue for medindancy was an example of the philosophy of

example of the philosophy of exploiting people's basic emotions

and fear.

Mr Geoffrey Drain, general secretary of the National and Local Government Officers' Association, for the general council, said the for the general council, said the composite motion before the conference accurately reflected the views of its fuel and power thinstries committee. The motion opposing the PWR was divisive and the general council, would like congress to back the amendment. Different unions had different views about the PWR and the place of the about the PWR and the place of the nuclear component. But the committee had reached a broad

to stop this before you even know the facts?"

Mr Scargill, moving the NUM motion which affirmed that the foremant and stated that the Government should consensus:

consensus:

The composite motion was carried. The engineers and managers' amendment on PWR safety was carried in a card vote by 5,012,000 votes to 4,719,000. A majority of 293,000. The NUM motion was also carried.

Pact Britain would be a main targe

Pact Britain would be a main target whether it had nuclear weapons or not. "It is important we keep our deterrent", he said.

Mr William Keys, General Secretary of the point union Sogat \$2. said the arguments for unilateralism were never put at the last election. "You had trations who put a different point of view", he commented.

Mr Keys asserted: "Countries have a right to defend themselves, and they should, but not with these means of destruction that could

Mr Kuroda said that control did not suspect anything amiss antil it began receiving an unintelligible transmission at 03:27 Japanese standard time, one minute after the aircraft had been fired on.

Only after the analysis of reder and communication records was it revealed that the jet might bave strayed, and at that point it was too late to inform air defence

War games: A US Marines mortar crew in Beirut taking a break after coming under shellfire.

Marines will stay put in Beirut

From Nicholas Ashford Washington

The Reagan Administration has made clear that it dees not intend to change either the size or the status of the American component of the multinational peace-keeping force in Beirut, despite continued attacks by Muslim militiamen.

A State Department official, speaking shortly after a US naval vessel had fired a salvo at Druze positions in response to a shelling against 1,200 US Marines dug in around Beirut airport, also told The Times that the US would not accede to demands being made by some Congressmen that the Marines should be withdrawn.
"To do so would be to abandon

Lebanon to chaos and civil war", Army fails to bring the situation under control and the Marines he official said. He expressed the belief that the US-equipped and trained Lebanese Army appeared to be slowly bringing the situation One option, to pull out and let the Lebanese resolve their interunder control and had recently taken over some strategically-important points in the foothills

The Army is doing pretty well against formidable odds. The main thing is that the force is holding together better than expected and has not split along political or religious lines."

The official was speaking as an

American amphibious force with. 2,000 additional Marines on was approaching Althouth the US has said the is now led mainly from Damascus by his

Marines will not be sent ashore, their presence is intended to show backers that the US will not be intimidated into leaving Beirut.

The official said the British, French and Italian components of the 5,400-man peace force were equally determined to continue with their mission. The French contingent suffered three more deaths this week, bringing to 16 the number of French servicemen killed since they were dispatched to Beirut almost a year ago.

Although President Amin Gemayel of Lebanon has publicly called for the expansion of the multi-national force, no formal requests heve been received by env of the four nations' capitals to

ruled ont. This would lead to a collapse of President Amin's Britain switches envoy's posting fragile government and would be an invitation for Syria, which has Mr Nicholas Barrington, recently head of the British interests some 40,000 troops in northern

section in Teheran, will not now be moving to Beirut as and eastern Lebanon, to fill the political vacuum. ambassador, as announced last May, the Foreign Office Similarly, a decision to beef up the US force in Beirut also seems confirmed last night, (Henry Stanhope writes). A spokesman said the reasons were "operational" and that another a non-starter at present, because it ointment to the Lebanon post would be made in due course.

However, a high-level inter-

keeper and a Polish prisoner of

meticulous observation of the mood and aspect of this obscure corner of the country during the Second World War. The insuperable problem is disbelief in face of the way the couple flaunt their affair. Considering official Nazi strictures about even acknowledging the humanity of the inferior and hostile people these two parade their feelings in a fashion that goes quite beyond all notions of l'amour fou, to become sheet

Dogged by danger

Nineteen eighty-three should go down in Edinburgh Film Festival history as the year of the dog. Not content with Samuel Fuller's electrifying White Dog, the festival director Jim Hickey also served up Lewis Teague's Cujo, piping hot from Hollywood, featuring a rabid St Bernard lurching and slobbering to preis effect. After that, every spaniel in Princes Street Garden seemed lethal, and the soporiphic documentaries about Cree Indians building bark canoes suddenly acquired a new, if short-

Documentaries and indepe dent films swamped the schedules; the dogs were there for icing, along with proven festival successes shortly due for British release (Wajda's Danton, Zeffirelli's La traviata). The sheer bulk of and vices to emerge with clarity. Joel DeMott and Jeff Kreines's Seventeen, offered an instructive array of cinéma vérité flaws: the every character who talked, the lead girl showed off, and audience interest collapsed. Luckily, Aus-tralia's Celso and Cora triumphantly proved the genres strengths. The director-cam-eraman Gary Kildea unobtrusiveby tags along with his subjects -two of Manila's many unfortu-nates, struggling to keep their young family united and healthy by selling cigarettes (illegally) on

Marmelador (Christopher Guinee) flanked by Sonia (Veronica Roberts) and Raskolnikov strains of a horribly deranged (Michael Pennington)

ing barriers, change, and fatality. If this is beginning to sound like a director's production, I must emphasize that it is most overwhelming for the quality of the acting. Lyubimov has suc-ceeded in impelling a British company into taking off vertically

ance of Lyabimov's central duces himself as an impoverished image, an isolated door, symboliz-ing barriers, change, and fatality, seconds he is on his knees facing the gates of paradise and striking straight to your tear ducts. Likewise Veronica Robert's Sonia, when Raskolnikov chal-lenges her belief in God. As a non-believer, I can only record these as two heart-stopping moments.

As in all versions, the central At the first sight of Christopher thread is the hunter-hunted scenes

as played by Michael Pennington and Bill Paterson. This is no cat and mouse theme, but rather the nursuit of a lost soul: as Pennington, eyes glittering and face reduced to a razor-like jawline, writhes in the innerconflict between guilt and Fanstian arrogance, and Paterson closes in with ambiguous friendliconfession, a great event.

ICA

Senseless

Mad scenes have always been the stuff of opera, from Donizetti's Anne Boleyn singing "Home sweet home" to Berg's Wozzeck psychopathic Mr Punch. Lumiere and Son now add to the list with this highly ambitious collaboraen their regular writer David Gale and the Australian composer Frank Millward.

The central character, Wade, is a violent killer like Wozzeck and Punch, but in a Take Six suit. A secret agent, in fact. Sent to a Caribbean island to eliminate a couple spying on the local American base, he has an affair with a girl who deserts him for a brawny fellow-tourist. He flips, kills them both and returns to London, convinced that he has

MI5, of course, stick him straight in a clinic with a highpowered lady shrink and all the latest gadgets. Up to now the dialogue has been entirely spoken, the exchanges, brief and even banal, the music confined to a background or a linking role. Now, in his madness, he identifies his doctor as Elizabeth I, founding mother of British espionage.

On sweeps Gloriana to the galliard while the text explodes in a sustained riot of manic wordplay. The two tourists reappear, renamed Romaine Pope (clearly a reference to another scarlet whore" in the hated Vatican) and Leonard, which produces the image of Leo menacing Virgo, the Virgin Queen. Ceremonially pricked by the royal rapier and invested in a tabard, Wade clearly progresses from the hypodermic to the straitjacket. The last Elizabethan Irving Wardle echo is numerology, closing the play with his apocalyptic visions

of Revelation and the number of

Mr Gale's style is off-puttingly flashy and self-concious - "Mr Visage, the Q is most impressed by your produce, to our shadow you add a rayon" - but dum-bfoundingly inventive, and gives an extraordinary picture of a lizing and recycling remembered images. But inevitably, very little udible. A words-music synthesis should be able to achieve anything, but practical limitations clip its wings; the initial impact of Punch and Judy is blunted for just

Mr Millward's music is not to

blame, being lightly scored: a band of four, doubling strings, keyboards, percussion and fluglehorn. It embraces its chances to be eerie, witty or lyrical but really striking passages are few: one investiture ensemble, accompanied by piano trio, is delicious, dreamy jungle of sinuous vocal and instrumental lines. The arioso bits are beautiful without seeming necessary, but Jeanine Osborne (Elizabeth) and Heather Keens (Romaine) sing them gloriously.

Five of the cast are masterful singing actors: the sixth. Trevos Stuart (Wade) has to sustain his huge role on acting alone, combining a trim accountant's looks with ominous determi-nation. It is an impressive performance but he hardly seems a man who would mutilate a corpse; and from interviews it seems that the company's purpose is more forcible condemnation of the spy cult (even, who knows, our present Queen Elizabeth's network) than emerges here.

Staged mainly on a zodiac-painted cloth with slide-screens added, Hilary Westlake's production is simple; whether you find them irritating or (like me) fascinating, the complexities have already been sufficient.

SPECTRUM

Curtain up on the impresarios

There are no conventional routes to becoming an impresario, as Raymond Gubbay. the concert promoter and Duncan Weldon, the theatrical producer, would agree. Both work in fields in which there is litte room for rival contenders, and both operate almost cutirely without subsidy, offering themselves to the harsh mercies of market

The requirements, it seems, are a readiness to take commercial and artistic risks, an endless capacity for work, and an early start. Gubbay promoted his first concert in 1966, at promoted his first concert in 1966, at the age of 20. It was a Gilbert and Sullivan evening at the Theatre Royal in Bury St Edmunds, involving four singers and a piano. By 1968 he had mounted his first South Bank concert, a Donald Swann programme with poems by Betjeman and Tolkien set to music. Three years ago he donned a tin hat and toured the uncompleted Barbican Centre with its administrator Henry Wrong, placing an early series of Wrong, placing an early series of hookings in the concert hall, and today he promotes regular lunchtime concerts there, where audiences can hear an hour of symphonic music for £2 a head.

Weldon entered the theatre at the age

Weldon entered the theatre at the age of 12, working as a call-boy for three years in his home town of Southport. It was the beginning of the television age, and his passion was to see and to take autographs from such television yelebrities as Vic Oliver when they came touring to his local theatre. Now he is the chairman and managing director of Triumph Apollo. one of the driving forces in world drama.

While the two men work in highly contrasting media, there are some illuminating parallels in their ascents.

The sound of music and success

Raymond Gubbay agrees there are similarities between himself and Duncan Weldon: "Well, for a start, we are both nice Jewish boys made good." There is a certain truth in this, but it needs qualifying. For while Weldon comes from an affluent middle-class formily albeit one which had precious family, albeit one which had precious little connexion with the performing arts. Gubbay has clawed his way up from modest Golders Green origins.

Still only 37, he is arguably the most successful promoter of popular classical music in the country, more so even than Victor Hochhauser, for whom he worked 19 years ago for a most informative "10 months. 28 days and 12 hours".

By the end of this year he will have presented more than 100 concerts in I suppose the most recent example was and a similar number at centres such as the Queen Elizabeth Hall, Fairfield Half, and in the provinces. He readily admits that he and his

wife are their own Joe Public, and that his childhood immersion in the Strauss/Vienna mode has greatly informed his professional judgments. His democratic tastes have won him not only the support of the public but the scepticism, occasionally manifesting itself as grudging acclaim, of the classical music establishment. Of the four London orchestras, the London Symphony appears the most embartassed by his advance, for while their performances at the Barbican have had houses often no higher than 65 per cent capacity. 40 of Gubbay's first 50 concerts at the centre were self-outs, the average turnout has been 90 per cent, and only three evenings have tilled fewer than half the seats.

. His simple but unassailable philospohy of "giving the people what they want to see" has brought him into a somewhat unlikely alliance with Tony Banks, chairman of the Greater London Council's art and recreation committee. After all, Gubbay himself is a "... go on, say it. A successful capitalist", while Banks is a "... that's right, one of Red Ken's bunch". Yet compare these two credos, the first set out by Banks in a recent letter to The Times, and the second by Gubbay.

Banks: "The civic leaders who brought these great (London concert) halls into being with public money wanted them to have excellent standards, but would not want to see them half empty as they are now. There must be much better marketing of concerts so that they compete strongly with going to the cinema and theatre, going out to dinner or staying at home

with hi-fi or video."
Gubbay: "From the programmes which I mount, people do look at what cise is going on in the concert halls. There is a sort of cross-fertilization. If they come along to mine, maybe they'll go to someone else's and if they go to someone else's maybe they'll come along to mine."

There is an obvious temptation to say that Gubbay's shamelessly populist format is in danger of lowering standards and of installing wallpaper music in what should be conservatories of high seriousness and - the inevitable word - "excellence". True, he has marketed, with staggering success, a number of Magic of Vienna programmes, a Rodgers and Ham-merstein evening, a Joshua Rifkin concert of Scott Joplin rags, as well as presenting a notable tourist draw. London: Historic City in Film, and the newly restored epic movie Napoleon, complete with orchestral accompaniment. True, his brochures verge on the

Raymond Gubbay: nice Jewish boy made good. Duncan Weldon: work, work and more work

brash, in conventional concert hall terms, with their circled RG logos and immediately identifiable house style. Yet a closer perusal of the programmes reveals a range of performers in which Harry Rabinowitz cohabits with Richard Hickox, G and S with Mozart, Rifkin with Beethoven. Massed Guards with the Philharmonia.

"It is true that I have created my own following over the years," says Gubbay, "and that I have built up what you might call a brand image ... yes, of course I've had my failures.

London at the Barbican Centre, of when I promoted a concert performwhich there is no greater fan than he, ance of The Gondoliers, which, I agree, doesn't sound articulariy original. got hold of Richard Hickox, who brought his favourite singers. It was a fantastic line-up. In years to come, people will look at that programme and say: 'How could they have afforded that group of singers?' It was a fantastically good performance. It should have been recorded and kept for posterity. But nobody came. We had just 600 people, I think. OK, so I learnt. If people don't want to come, they won't, so we won't do anything like that again."

> For the most part, however, Gubbay gets it right. Despite the basic rental of £1,000 a night for the Barbican, plus 12½ per cent of the takings, plus fees that range between a few hundred and several thousands of pounds for the top performers, plus the overheads of his four-strong operation in Tottenham Court Road, he still makes a profit which he describes, with a gale of laughter that sounds remarkably like euphemism, as "reasonable". Then he adds: "In commercial terms, what I do, to an outsider, is not particularly attractive or viable. I enjoy it because it's fun, and because I can earn my living this way."

As in Weldon's case, the formula must be matched in equal part by workaholism, and there is never a Gubbay concert in London at which its instigator is not present looking around, talking to the players, speculating on the social profile of his

punters and, of course, watching the seats fill up. Until the returns of the Barbican's own questionnaires come in during October, it is hard to categorize with any accuracy Gubbay's constitu-ency. He knows that 52 per cent of his bookings are through credit card, but agrees that this could mean many things; he knows also that the Barbican bus, commuting from the centre to the main rail terminals, has twice as many passengers on his nights. But again, this could be confusing evidence. "It could be that my audiences come from the suburbs and beyond rather than from the centre, or that they are simply the unusual position of working almost too mean to take a cab." Or both. The one certainty is that they come. cntirely without "angels", he realizes that it is only the profits from box-

Working hard, playing hard

Duncan Weldon's love affair with the theatre began when he was a 12-yearold in Southport; 30 years later it remains a grand passion which con-sumes him for 17 hours of the day. Like Gubbay, he is at one of his shows nearly every night and, again like Gubbay, he has plenty to choose from since his company, Triumph Apollo, will by the end of the year have mounted no fewer than 40 productions.

Of that total, some 20 will have appeared in London, most of them having toured in the provinces first. Already this year Weldon has put on the Haymarket repertory season with Heartbreak House, School for Scandal, Uncle Vanya and Kean. When Peter Ustinov's play Beethoven's Tenth goes to the Ahmanson Theatre in Los Angeles, he is engineering an exchange involving Jack Lemmon and Charlton Heston. The list goes on and on. In

October Joan Plowright and Frank Finlay open in The Cherry Orchard. directed by Lindsay Anderson, again at the Haymarket. Beryl Reid in a new revue. Danny La Rue playing the female lead in *Hello Dolly*, and then the round of pantomimes, which still represent for Weldon one of the most rewarding forms of entertainment.

As with Gubbay, it is the eclecticism of his operation that pre-empts harsh criticism of his fiscal motivation. He too has had his flops - most recently the controversial Great and Small when in Manchester. As a producer in office success that will finance the lean

That "nice Jewish boy made good" tag of Gubbay's really applies to Weldon only if you accept that his father, in the best and worst of Jewish traditions, was not exactly supportive about the young Duncan's ambitions in the theatre.

The family business was a chain of photographic shops, and my father said I could either join it or go into the theatre. But he said, if you go into the theatre you can piss off. Well, I wasn't going to become a roving vagabond with no means of income, so I joined the business."

Like many a Jewish son before him, he was worked harder by his father than were any of the other employees. but he also managed to make the link between his lot and his vocation by taking publicity photos for provincial theatres. In this way he became friendly with several actors, particularly David Kossoff. He was even asked by the actor to help wean his son Paul from his drug addiction. The effort failed, of course, and Paul died a few years later.

Weldon describes his early progress as a producer as "doing plays with David, then doing plays without David...the rest of the story, you know". Well, not quite. We know that he employs more actors than the National Theatre and Royal Shakespeare Company combined, that his average expenditure on each pro-duction is £100.000 (four times that in the case of musicals), and that he now, often gives work to the great names, the Richardsons, Harrisons and Morleys, who were filling the theatre in Southport when he was a call-boy.

We know also that he enjoyed a fruitful association with Louis Michaels, the impresario and theatre chain owner. What we do not know is the formula for such growth. If you accept Weldon's analysis you must believe that the whole thing is based almost entirely on three things; work, work, and more work. Surely this is plumbers, flat-clearing services, appeal funds disingenuos; there must be something and a vicar in south London looking for more, apart from the conspicuously good business head. Some talent, like Gubbay's for spotting a hole in the market and then conjuring up the appropriate plug?

It would seem not: Weldon may be a supplier of work and a filler of theatres. but he is not an initiator like Gubbay; he has a faith in the drawing capacity of star actors, rather than in the value of an innovative repertoire. Great and Small notwithstanding. So we are back to the basic commodity of hard work. Weldon makes clawing motions in the air and says, with a sudden grimness: "Clawing your way up. That's what it is. Clawing and clawing."

The clawing begins at 7.00 each morning when he receives what he calls "my alarm call". In fact it comes from the agent Richard Stone, who stays talking for half an hour about business and clients, six mornings a week, "Richard is a close friend, though. He tells me I'm the only person he knows who gets started as early as that, so he can get me out of the way for the day." Weldon works in Waldorf Cham-

bers, high above the Aldwych, in what used to be Ivor Novello's flat. His own office is the old music room, and his desk stands where the grand piano used to be. Through the door is the bedroom where the composer died in 1951. On the walls of the passage are the posters of Weldon's productions. stretching back into the 1960s.

"Hard work." he says. "The fact is that I am in love with the theatre, and I find the quiet days harder than the busy ones. Whatever success I may have had I owe to the fact that I am quite simply ready to put in more hours than anybody else. In this business you can't hope to put in nineto-five hours five days a week and expect to make a go of it."

It is hardly surprising that Weldon regards theatrical subsidy as a mixed blessing. "Don't get me wrong. I am not against it. I simply believe that it carries the danger of making the recipient lazy. If I do a show, it is either my own or my friends money."
He has little time for subsidized companies who complain about going through a lean time, then put on "an obscure. 12-set, 30-hand play".

Weldon stresses that his profits are not colossal, and that anyway the theatre is not a profession which attracts aspiring money-makers. Which takes him back again to his callboy times: "In those days I made £1 a week, and everything I got paid was total profit. I wish I made a £1 profit these days." Dramatic licence, perhaps,

moreover... Miles Kington

Have we tried the 1948 file?

Roy Scheider (an actor) was sounding off in Monday's Film 33 about our lack of privacy, and how now helicopters could peer in at our windows and find out what the ClA and FBI didn't already know. This, by an extraordinary coincidence, was the message of a film called Blue Thunder which he has just completed. Things were getting more and more like - here Scheider paused to think of a crushing simile - 1984! Barry Norman, back to his best waspish form, told us that he had searched the film high and low for a message and found only helicopters shooting each Monday's Film '83 about our lack of privacy, and found only helicopters shooting each other down, in the aerial equivalent of ear

For my part, I am convinced that things are getting more and more like 1984, and that since we are now in the second half of 1983 it would be foolish to expect anything else. would be foolish to expect anything else. Whatever else happens. January 1 will see the start of 1984. There's nothing we can do about it. If we were really worried, we would have done something by now: just as people living in Flat 13 often rename it 12a, we could easily have agreed that next year was 1983a or gone straight to 1985. Nothing like that has happened, and I'm sure it's because none of us is really scared of 1984.

Among the things that distinguish humans from other animals is the capacity to believe in two diametrically opposed facts at the same time. The example most often quoted is the way very few of us believe in astrology and yet most of us regularly read our stars. Again, we firmly believe that everything that appears on television is kept for posterity, yet most of us are convinced that the BBC wipes out everything of value – it is one of the myths o our time that no Hancock exists on film any more. (I guess the truth is somewhere in between: the BBC keeps a great deal, but can't find any of it.)

To come to the important point, everyone has a lingering belief that Big Brother has tabs on all of us, with our complete dossier ready to flick up on the computer read-out screen at a moment's notice. But this is rivalled by our belief that Big Brother can never find the relevant information when it is needed. We don't seem to have a record of that... we can't find your rapers... your details seem to can't find your papers... your details seem to have gone missing...can we take the information again, please? Either Big Brother

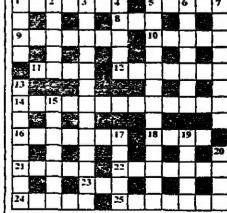

As luck would have it. Roy Scheider was preceded on the screen by the director of Blue Thunder, who said that helicopters were rairder to work with, as it was impossible to get them to do the right thing. I think the message here is that if you see a helicopter apparently peering through your window, it is actually desperately struggling to keep aloft and on course, and hasn't got much spare time to spy on you. Personally, I have always hoped and prayed that Big Brother keeps table. noped and prayed that Big Brother keeps take on my phone calls and correspondence, as I need all the help I can get with it, but I'm afraid that, if all-seeing, he is probably short-sighted and can't find his spees.

Years ago, when I was young and had spare time. I entered a Private Eye contest to get a fake letter in The Times. I succeeded, using a false name and address. In the weeks that followed. I got a fair bit of correspondence addressed to that fictional person: 24-hour jumble.

Under that false name I had entered a new existence on Big Brother's files. And it has started to happen again in the past few weeks. when I have got mail from Newswerk magazine, the Old Vic and other places, addressed to K. Miles. Somehow I have got on to a Big Brother dossier with my names reversed, and a new person has sprung to life, someone who goes to the Old Vic and reads American weeklies. He's welcome. I don't think I could read "the best-informed weekly in the world" if it wasn't even informed of my correct name.

No. I'm not particularly scared of 1984, For No. I m not particularly scared of 1984. For every one time I hear the cry: "How did they get hold of this information?". I hear ten people thundering: "Why didn't the auth-orities know about this – surely they must have been aware. . . ?" No, the only thing that worries me is that very soon we are going to have to find a completely new phrase for 1984. Roy Scheider is going to look pretty stupid when he is publicising his new film, in 1985 and says that things are getting more and more like 1984. Unless, of course, he means things are getting better.

TALKBACK

Slimming danger

From Dr William Parry-Jones, The Warneford Hospital, Warneford Lane,

Headington, Oxford.

The medical significance of the fashions introduced in the sixties by Barbara Hulanicki, featured recently in Spectrum (August 15) cannot be

allowed to pass unnoticed.
The era of the Twiggy phenomenon and the fashion industry's remorseless preoccupation with slimness has coincided with an unprecendented increase in the prevalence of eating disorders in teenage girls and young women. Anorexia nervosa and bulimia nervosa are serious disorders with far reaching physical, emotional and social consequences and they can make life a misery for the victims and their families. Their treatment poses a major challenge to medical services and self help organizations. While many questions about these disorders remain unanswered, there is wide-spread agreement that the social essure on women to be slim is one of

the major causative factors.

The "classic Biba dolly" and the "beautiful skinny people" may have been a "desiogner's dream", but the quest for an unrealistic and unattainable ideal has turned into a secret nightmare for thousands of women.

Still in fear

From a reader in south-west London As one of those "battered wives" we hear so much about, I would like to put another side of the access rights controversy.

For years I was married to a very violent man until I finally escaped with my two sons to a Woman's Aid refuge. In due course I obtained various injunctions, custody orders and my decrees, Because I feel that my sons had a right to see him I did not fight the access order. I am now committed, for the next 10 years, to making sure that the children are at a certain place at a certain time three Sundays a month.

What this means is that I can never be free of him. He will always know where I am, what I do, whom I see and who visits me; he questions the children about this all

I lost my home and all my possessions (my fear of reprisal nutweighed everything else), and I can hardly be said to have gained my freedom or even peace of mind. Having lived in fear of this man for years I find I am still living in fear of him - because the access rights

Having a binary time, wish you were here

Computer holiday camps are the latest

thing for youngsters who get more

fun out of programming than building

sand castles. Peta Levi finds out

what goes on among the keyboard kids

and taking off a jumbo jet from Gatwick and a program for disco

It is not a structured course and all activites were optional. One computer supervisor - their ages ranging between 17 and 24 – was allotted to each group of five children. The mornings were given over to learning how to build a computer or a learning a new computer language; in the afternoon, despite the rival lure of spiling shooting archery and canoesailing, shooting, archery and canoe-ing, most children preferred to stay on computers. Evenings were devoted computer demonstrations and

Last year we found the children were skipping lunch and staying up until midnight," said Carter, "so we reluctantly decided to lock the computer rooms over lunch and at 9pm to make sure they are and got some fresh air." This year the supervisors' biggest problem was clearing the computer rooms at 9pm. It often took as long as an hour to prise the last children from their computers. At lunchtime, the dining room emptied within half an hour as children raced back to the machines.

The rise in computer interest among children can be measured by the demand for such holidays. Last year, Carter and Tilsley organized a single computer holiday of one week, which was oversubscribed. This year they arranged three one-week holidays: all

from as far away as Portugal and Nigeria - and more young children (aged between 10 and 12) took part. Almost all the children on the camp have their own computers at home.

The children were of mixed abilities and came from a wide range of backgrounds. However, the relative absence of girls was noticeable - only three (and one mother) out of 55. Carter said: "The maddening thing is that there is no difference in aptitude or ability, but what clearly is

happening is that psychological and social pressures are operating the same way in computing as they did in engineering. Computing is not seen to be a thing for girls, which is absolute nonsense. It is also sad on a national level, because we are losing half the potential talent."

Perhaps it was not surprising that two of the girls at Computer Park '83, I+year-old Natasha Franklin and her sister Camilla, aged 12, from Bucking-hamshire, had not asked to go on the computer holiday. Unknown to them, their father had booked them on it. Natasha said: "He thought we ought to learn how to use a computer. We didn't know what to expect, but it was great fun. There are lots of activities and we even enjoyed the computing."
As with all beginners, they started with an intensive two-day course.

The third girl, 15-year-old Katic Godwin, had come for the second year running. Her mother, a secretary,

Do computers, then, undermine conventional family life? Not, it seems, if mum and dad are both in on the act. Mary and David Bevin's son Peter has been computer-mad for two years but they have not found his hobby isolating. Mrs Bevin explained; "My husband and I gave ourselves a ZX 81 for our fifteenth wedding anniversary, but Peter, then 11 immediately took it over. He would have occupied it for 24 hours a day if

we hadn't made him eat, sleep and tidy his room." Peter doesn't take as much exercise as he did, but his many computing friends are frequently in the house talking about computers. He has written a vocabulary program to help with French homework.

David Bevin, now retired, has always been interested in computers and Mary, a primary school teacher, was trying to get a job. At her interview she was repeatedly asked: "Have you any experience with computers and would you be happy to use one in the classroom?" She now has a job, partly due, she thinks, to her being able to be positive about her interest in computing. She found handling a computer much easier than she had expected.

Does the increasing popularity of computer holidays spell the impending demise of family holidays? For all but one or two children at Grendon Hall, this was not their only holiday. In spite of the cost (£178 a week), the majority were also going abroad, with or without their parents, or for a holiday in Britain, if only to take over a friend's seaside home to look after their pets.

Is poring over a computer much of a holiday? Sean Hoban, aged 15, from Birmingham, said: "It is not like school. There are loads of alternative activities, a lot of leisure and you are not forced to do anything. You don't even have to come down to breakfast." Richard Walker 12, who was there for

the second year running, this time with his 10-year-old brother David, was succinct: "I have beach holidays: I'm allergic to large quantities of sun and can't stand being outside for long."

The Walker parents reckon that if computers did not keep him indoors, would be reading a book, but although he spends hours on programing - he regularly gets up at 6.30 at do some before school, as well as after -computing has brought into contact with other computer addicts and has

computing had affected the family, he replied. It has been financially disastrous!" An engineer with Plessey. he bought a computer kit which he and Richard constructed they have now progressed on to a more complicated machine with a monitor and two printers. Richard said he suffers from

inventiveness and ideas.

Martin Miller, a North London computer-derive problems may not perform well at school can do very well with computing.

Take a turnip Miss Smith

"The farmer wants a wife", according to the nursery rhyme. Perhaps. But a secretary? The two do not seem, even metaphorically, to walk hand in hand. The world of mud and slurry, green gumboots, and late-night lambing seems far removed from that of polished desks and soft carpets. dictaphones, and typewriters.

But farming has changed, and so have secretaries. There is now an Institute of Agricultural Secretaries. and tomorrow it is to hold a seminar at North Oxfordshire Technical College

Banbury.
The moving spirit behind the institute is its present chairman, Jenny Barker, a small, energetic woman who started as a secretary with the Thames Water Authority, for which she still works, part time. But on most days, she drives around the Oxfordshire countryside, calling in at farms for a few hours at a time to help with the accounts and correspondence.

In the past 20 years farms have become not only much larger, but also far more complex operations and many farmers are not able to cope with the administrative as well as the

One of her part-time employers is Mr John Homewood who farms 600 acres of arable crops near Abingdon, The family also has a pig unit of 250 sows, and some 5,000 turkeys and goese which they fatten for the Christmas market.

"It was about a year and a half ago, when we put in the pig unit, that my son Geoffrey decided he could not manage both that, and all the paperwork." Mr Homewood recalls. "We were introduced to Jenny through a friend, and now she is like one of the

cost-effectiveness of various schemes. Jenny has bought her own computer. Some of its most popular uses are for VAT returns.

the mechanics of farming," she says, "Ideally, she should also be able to do practical jobs like driving a tractor, or helping with the milking

John Young

Looking into a child's heart

In 1980 heart disease, normally associated with middle age, obesity and high blood pressure, killed 1,378 children under 14 - almost 11 in every 100 deaths of children. The number is not only surprising but alarming. Research funds are pality: even the British Heart Foundation gave only 3.7 per cent of its budget of £12.386,000 over the last five years to research in paediatric cardiology. The causes of congenital heart disease -heart defects from birth - are relatively unexplored.

We do know that drugs like thalidomide and, to a much lesser extent, phenyloin, used against epilepsy, can cause damage. So can German measles contracted during pregnancy," said Professor Fergus Macariney, who holds the British Heart Foundation's Vandervell Chair of Paediatric Cardiology at the Institute of Child Health in London and is also an honorary consultant at Great Ormond Street Hospital.

"Sometimes problems are located in the electrical wiring of the heart in the atrioventricular junction, dividing upper chambers from lower." he said.
"But till recently these problems were very, very difficult to sort out even with the most sophisticated methods."

Last year Great Ormond Street carried out open-heart operations on 250 children with congenital heart disease. About two-thirds of the sufferers do so very well with surgery and go on to lead normal, unrestricted lives. But a third either cannot be operated on or remain in ill health after surgery the professor said.

The case history of Alistair Grieve, aged 17, of South Woodham, Essex, illustrates the suffering of young heart panents in graphic terms.

Alistair, who is an advertising

There are now about two million

computers in Britain - more per head of populaton than any other country.

hooked on computing the idea of a perfect holiday is not hours with buckets and spades but days spent gazing into television screens, playing

computer games and writing compute

programs, in computer holiday camps. Computers have been called divorce

makers. Husbands who become obsessed with computing tend to lock

themselves away in a spare bedroom, ignoring their wives and families. Children can disappear for hours of solitary play with their sophisticated

oy. Computers can become addictive.

Peter John, aged 13, from Northum-berland, explained: "Time flies and I

get so envolved in writing programs

that it is difficult to even to turn round

to look at a clock, so I usually set my

alarm clock. When it goes, I stop." He has written a program which, he says ensures he receives higher marks at

For children like Peter, traditional family holidays can seem dull. This year he was one of 55 young people

(and three adults) who went to Computer Park '83 at Grendon Hall.

Northamptonshire, run by Allen Carter, Director of the Machine Assisted Teaching Project at Nene

College, Northampton, and Peter Tilsley, a microcomputer consultant. Some computer holidays are simply

an adventure or activities holiday plus up to two hours of computing a day.

At Computer Park '83 the focus of the

holiday was computing. Seventy computers (of 11 different makes) were available from 9am to 9pm and there

were a number of other computer-re-

lated machines – robots, music

synthesizers, a simulation of landing

increasing numbers of children.

student, now appears alert, friendly and energetic. He is 5ft 10in, and weighs only eight and a half stone. A thick scar runs from his neck to navel. testimony to three open-heart oper-ations, the first at the age of three

He weighed less than 6lb at birth in 1966, and soon lost weight, turning grey and refusing feeds: he just slept. The family doctor diagnosed mucus on the chest, but his mother Doreen and the health visitor sought a second opinion from the paediatric consultant at Whipps Cross Hospital in Leytons-

Within days Alistair was operated on to bind the pulmonary artery which was spilling blood. After four months he was discharged weighing 6lb; he was, so fragile that his mother was frightened to touch him. The operation retarded him in

feeding himself and walking, which he only managed at 18 months. Drugs

The Grieves - Doreen, Elliot, Neil, Jan Tom and Alistair and check-ups became a way of life

and if he cut himself he was given antibiotics to prevent blood infection reaching the heart. He remained weak and confined mostly to a wheelchair. "It was humiliating because by the time I was four, children of my own

age would sneer at me," Alistair said. Normal school was unthinkable but at four and half he started at the Ethel Davis School for handicapped children at Goodmayes, Essex. There he was able to walk and push the others in their wheelchairs. "They were far worse off than I was." he said.

Alistair endured an operation lasting over four hours, which improved his circulation. But two years later Alistair was again very One day as Mrs Grieve lifting the 11-year-old boy out of bed he fell, banging his head against the beside table. "There was no reaction," she said. "But downstairs he started twitching and going blank. Suddenly

he became paralyzed down his left side and lost all power of speech, I was horrified. I thought he'd suffered a stroke." The next day an abscess on the brain was removed at Great

Alistair recovered enough to start at Caterham High Comprehensive School where he picked up two O levels and four CSEs, "But still he wasn't leading a normal life," said his father Tom Grieve, an electrician. "We had to watch him all the time for fear of something happening in the road with cars. Sometimes he'd sneak out to play with his brothers but after 10 minutes' running he'd be exhausted and have to spend the next two or three days sleeping it off in bed.

At 14, Alistair agreed to a risky third surgery was a success and after three months' convalescence he learnt to swim and took up badminton and

"I feel good now." Alistair says, "I just hope it lasts for a while." To discover the causes of congenital

heart disease. Professor Macartney is building up a huge computer data base to improve diagnosis and decision-It is already possible for doctors to

get a picture of the heart, using electrocardiograms and computers, in 17 dimensional space - allowing them to give correct diagnoses three quarters of the time. Already hearts in unborn babies can be seen with scanners at 16 weeks of life. This vital information enables doctors to decide in advance if surgery may be necessary.

These developments give clues." Professor Macartney said, "and that gives us hope for the future."

Paul Nathanson

How to keep baby sound asleep

Babies after delivery seem to miss the emotional security provided by the close embrace of a noisy womb. Oldsixle nannies rapped a shawl fairly ughtly round their charges to repro-duce some of constriction, such as they had experienced during the previous 40 weeks. More modern child care experts in Japan are extending this principle by recording womb noises and then playing them back to the

Bandai Industries, Japanese toy makers, have cooperated with Dr Hajime Murooka, of the Nippon Medical School, to produce a customized intergrated circuit. They claim that after listening to the battery charged microchip, four out of five infants drifted off to sleep, usually within minutes. The manufacturers suggest that this method is so consistently effective that the failure may be a pointer to early deafness.

The system has been tried with

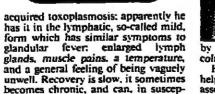

success at the Northern General Hospital in Sheffield: earlier experiments with different recordings at King's College in London were not so encouraging. The machines are now to be made available for testing in private Soon, it is hoped, godparents will be

able to give a teddy bear which makes a noise more useful than the usual squeak so that their godchildren will be spared sleeping draughts and the parents sleepicssness.

Cat caution

Cats can be blamed for Sebastian Coe's tack of form on the running track just as surely as if he had tripped over one. tests have that he is uffering from a cat-borne disease, **MEDICAL** BRIEFING

occasionally occur in an acute form.

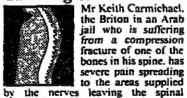

Although all animals can be infected by toxoplasmosis, it is only in the cat's gut that the parsaitic protozoan organism, toxoplasma condii, reproduces: the oocysts form there are passed in the cat's faeces, which can then contaminate badly stored food, or poorly washed hands.

tible people with lowered resistance,

Serious consequences can follow an perious consequences can tollow an infection during pregnancy; blood tests show that two or three of every 1,000 pregnant British women, catch the disease. About 30 per cent of infected mothers transmit the organism to their unborn child, but fortunately only a time feature of them are home with a tiny fraction of them are born with or later develop the clinical signs of congenital toxoplasmosis which can include disabling complications resulting from brain and eye disease. Even so it seems that this disease is responsible for one in every 500 severely mentally retarded children.

Contrary to reports, the disease is not rare, only rarely diagnosed. Careful studies with blood testing have shown that I per cent of the population is infected every year. The medical lessons are obvious. Cats should not be allowed in the kitchen, dining room or nursery, and their owners should wash their hands very carefully, if they have stroked the cat and intend to eat.

Thinking back

column at the site of the fracture. His publicized misfortune might association between injury or disease in the back with pain elsewhere in the body, for one of his complaints is of

loin and groin pain. Although patients are always ready to accept that sciatic pain may be due to spinal problems, they seem reluctant to believe that this mechanism can effect different levels of the spine and give rise to pain in other parts of the body. This point has been made by Mr E C Ashby, an orthoraedic surgeon, in a review of loin and groin pain in *L'pdate*, a postgraduate medical magazine.

Doctors can often demonstrate that showing that it is related to posture and movement. Loin and groin pain can cause such anxiety that patients find it hard to believe that it sometimes stems from back trouble and not always from sexual indis-

Breathtaking

Over a million people in Britain wheeze, or have had attacks of wheezing so that while an annual death trate of 1,500 from asthma poses for doctors, it represents only a remote important

danger for any individual patient. Until the 1930s, it was mistakenly taught that asthma was never fatal, and this outdated fore still lingers in layman's mind sometimes with lethal consequences. Dr A E Tattersfield and Dr M J

Cushley from Southampton Univer-sity have published a paper in this month's Journal of The Royal Society of Medicine, discussing the problems of sudden asthmatic death. Probably the commonest cause is too little treatment too late. Analysis has shown that in many cases the apparently rapidly fatal

attack has been preceded by days of progressively deteriorating lung function. Unfortunately, both patients and doctors are as bad at noticing this as they are at assessing the severity of an acute attack. Some patients not only underrate its seriousness because they have become accustomed to the discomforts of breathlessness, but minimize their difficulties in an effort not to be a nuisance with their recurrent disability.
All doctors should, in Dr Tatters-

field's view, supplement their clinical assessment with objective airflow estimations; it is a straightforward procedure, carried out with a simple istrument and is no more complex than taking blood pressure. The pulse rate, too, gives an indication of severity, a rate of over 130 being associated with a high risk of

The doctors suggest that patients who are known to be bad at judging their own breathlessness should be taught to use a home respiratory flow meter so that if they start to deteriorate they can immediately be prescribed lifesaving oxygen, and adequate doses

of steroids and anti-asthma inhalants. Dr Thomas Stuttaford Medical Correspondent also a rather introverted son closer to his father because of their shared When I asked Mr Walker how

THE TIMES **DIARY**

Chipping in

A young and sprightly Henry Kissinger has been spotted bouncing about Westminster. It is not the former Sceretary of State rejuvenated, but his doppelganger son. David, who has joined George Walden, Conservative MP for Buckingham, as his unpaid research assistant. Walden, formerly principal private secretary to Lord Carrington, met the Kissingers while at Harvard for a year before his election in June. He says young Kissinger, who previously worked for Senator Jacob Javits, is much interested in British education and our social services, so his attention will not be concentrated on foreign affairs.

Apocalypse now? Publishers' parties not being what they were. Salman Rushdie launched Shame, his successor to Midnight's Children, yesterday on the steps of St Martin-in-the-Fields. The author read what he called a suitably apocalyptic passage from the book on its publication day, at the start of a 24hour read-in by Book Action for Nuclear Disarmament. He was in good company, with authors from Home and Byron to Vers Brittain and E. P. Thompson being called in aid by such as Melvyn Brage, Ian McEwan and Victoria Glendinning, but they all found the balance of power weighted rather against them by the pigeons, the traffic, and the rain.

Sales patter

A PHShopkeeper is baffled by a letter received from an A. Ferguson, sales director of Palitoy. It warns him of improvements on something called "the Palitoy goods uplift system".
From now on, it says, "our representatives (your first point of reference) will provide a service in controlling the uplift of product, by completion of the necessary paperwork within your cutlet. It means, I think, that representatives will call to fill in forms in the shop.

Lost horizons

Collins' New World Atlas, published this month, is a stickler for accuracy, adopting the modern scholarly practice of giving local place names before the accepted English name. This has makings of a new geographical parlour game. Everyone will recognize that Moskva is the capital of the USSR, as Wien is of Austria, and Kobenhavn of Denmark. But which capital is called by the locals Krung Thep? I'll give you a clue: the principal city in the neighbouring country is Viangchan. Or how about this as the itinerary of the latest US Middle East peace shuttle. flying from Yerushalayim to Al Qahirah and Dimasho, stopping for a weekend's rest and recreation at

Across the water

Having flipped over to beautiful Alsace while you weren't watching. I have two observations. First, even French restaurants with stars in the Michelin guide now serve wine and water in glasses that pong of detergent. The Auberge Père Floranc at Wettolsheim did it to me. Second. the German paper Bild, excited by the Princess of Wales's visit to St Thomas's, speculated: "Is a second baby on the way?" No such doubts beset France-Dimanche. Its billboards announced: "It's a girl." And that was before she even set foot in the hospital.

'It's to bring it in line with

Outsider

In the Diary of August 30 I ran a story hended "Wrong type". This was asking for trouble and, sure enough, I typed that William Owens' record for the greatest number of publishers' rejec-tions of a book manuscript was 173. Wrong, Owens modestly informs me. It should be 137. The 117,000-word book consists of two theses: a political one on a revised form of government, which Owens calls The Clone Concept and a philosophical piece about the futility of religion and the need for an international code of ethics, Idioelectric Iconoclasts. Now 75. Owens was twice offered university places to pursue his researches on the strength of the theses, but could not get a grant He tried to fund himself by writing a play for the BBC called The Parson and the Prostitute, but it was rejected as "too old-fashioned". Owens still has the book, if anyone's interested. It is called One Man versus the Establish-

Kiss of life for the inner city

Building societies, as the biggest providers of housing finance, have to some extent been responsible for the desertion and dereliction

of inner city housing.

In the absence of a positive policy, local managers have opted to lend money to the buyer of the best status on the house that represents the best security. Thus, despite the fact that people saving with the society come from a wide spectrum throughout the area, money has been lent in a limited way to encourage movement to the suburbs instead of helping those people who wish to live in the city centre to remain there.

There has recently been a change of attitude. Building societies now accept that they have a responsibility to remedy the damage they have helped to create. Furthermore, there are sound commercial reasons for pursuing such a policy.

Since 1979 we at Abbey National have become involved in all the designated housing action areas. Our receipts have risen in every area that we have gone into in this way. We are in the happy position that what we should be doing socially coincides with

what we want to do commercially.
Unfortunately, deep-grained attitudes, political and otherwise, are impeding the development of building and renovation programmes, for which, with one in four British houses classed as substandard, there is a clear need.

In the past, local authorities have failed to implement inner-city schemes because of lack of money. Now that building societies

Clive Thornton, chief general manager of Abbey National. urges councils to overcome their suspicions of building societies and work together in

restoring our urban wasteland

are prepared to put together the necessary legal and financial package, that excuse can no longer be made.

Some authorities remain unconvinced that building societies are genuinely prepared to make a long-term commitment to a rundown area. They suspect the society's motives and fear they will be left high and dry when the society finds a better place to put its money.

Socialist-controlled local authorities often resent the erosion of their role in public sector housing. They tend to cling to derelict land in the hope that they may be able to make use of it eventually. Conservative-controlled councils often have a different attitude but one that is no less harmful to the community. They consider their duty is to sell to the highest bidder. Unfortunately, the person who is prepared to pay the best price can often afford to do so only because he is planning the kind of high-cost development which will produce little or no

benefit to local people.

We expect, and need, the cooperation of

John Carlin on the strains imposed by the economic squeeze

local authorities in telling us what they feel is required. We believe that the local community should derive benefits additional to the provision of the housing itself. Local labour should be used in construction and renovation work to help reduce unemployment. I would go even further. I believe that building societies, as the main providers of finance, should influence for the better the style, quality and design of housing, and should endeavour to stimulate British industry to provide what is required every step of the way.

The legal and financial basis of the project as well as the proposed development itself must be acceptable to the local authority. The formation of a trust is often the way to show authorities that we are not in the field of speculation. Where there is reluctance to release permanently the land required, we consider leasehold tenure so that ultimately ownership of the land reverts to the

Since as a building society we can lend only against the value of real estate security. where a project requires a high degree of renovation of existing properties, we will combine resources with other organizations to ensure that the necessary funds are

We are now looking forward to a new era of local authority and building society cooperation. We believe it possible now to create a long-term strategy in which this partnership will prove to be the cornerstone for regenerating city life.

David Watt

No evil intent, just obeying the book

by exactly what process the Russians took their decision to shoot down the South Korean 747 last weekend. As George Walden pointed out on this page on Wednesday, it is in the nature of our relations with the Soviet Union that we are always having to guess. On the other hand there are a lot of people, both in government and the academic profession, who are trained and paid to make these guesses on the basis of their knowledge of the Soviet

They are able to do so with fair accuracy (and it is one of the few consolations in Soviet studies) because the system is so strong and so rigid that the variations from "normality" are rare and usually indicate that some new and serious permanent pattern has been clamped upon Russian

behaviour.
In the case of the South Korean arriner, there is nothing whatever surprising in what the Russians have done and there is therefore a broad consensus among professional Soviet-ologists about what probably occurred. The reconstruction goes somthing like

• Under the Salt treaties, both the O Under the Salt treaties, both the Russians and Americans make regular use of spy planes for verification against cheating, but by an implied gentlemen's agreement, keep out of each other's air space and do their spying from afar. The Russians would not be surprised to detect and track an American cray plane over the Sea of American spy plane over the Sea of Japan but would be both surprised and Japan but would be both surprised and outraged it it violated Soviet air space.

When the Korean aircraft first showed up on Soviet radar screens, heading for Soviet territory, the Russians may quite reasonably have assumed that this was an American territory and therefore a

spy plane "trying it on" and therefore a high degree of nervousness may have As soon as planes were sent up to look at the intruder it would have rapidly become clear in the moonlight that it was a commercial airliner and this information would have been relayed to the ground. Local commanders would have given instruc-tions to shadow the plane while they

decided what to do.

The decision finally to shoot down the plane would have been taken at medium/high to high military level. Party and government civilisms (including Mr Andropov) would very probably not have been consulted in any case but would certainly not have any case, but would certainly not have been disturbed in the middle of the night for the purpose (European Russia was also in darkness). The main consideration determining such a decision would therefore have been the rules of engagement for the Far Eastern region, laid down as standing orders. The senior military commander consulted, who may have been as high as the Air Force Commander-in-Chief, would have said to himself, The standing regulations say 'Shoot'. If I obey the rules of engagement nobody can blame me. I shall have

● When it became apparent next io ibe civi what had happened they would no doubt have been appalled. Their entire propaganda position as a peaceloving nation confronted by capitalist war-mongers and indeed their (possibly genuine) desire for some compromise in the arms control talks in Geneva were destroyed. They found themselves, quite unnecessarily, in the international dock and they could only get out of it by denouncing the actions of their military colleagues who claimed to have been defending the motherland by scrupulous observance

of standing orders.

done my duty. If I do not I may be for the chop. So 'Shoot'." The wider political and international reper-

cussions would not have entered into

 After much agonizing thought and debate, Mr Andropov decided that he was not sufficiently secure in the saddle to shop the military. Had the fault been the KGB's he might have been able, as its former head, to get away with disowning them. It might have been possible, though difficult to discipline a fraction within the Party. The armed forces, to whose backing Andropov ultimately seems to have owed his elevation, were too powerful. He therefore decided to ride out the diplomatic storm. There will be no

dipiomatic storm. Here will be no international inquiry, no more than a perfunctory apology and probably no compensation for the victims.

If this explanation is right it does nothing, of course, to excuse Soviet behaviour or to relieve the Russians of the presentation is a current of the presentation. the responsibility for an outrage. It provides a chilling picture of the Soviet system — paramoid, muscle-bound, compartmentalized and brutal,

Andropov: riding out the diplomatic storm. Reagan: given an excuse to reassert military superiority

Moreover it may mean (though one can argue the opposite) that Andropov will remain in book to the army and, in view of his age and health, may not be able to break the hold it has on Soviet

on the other hand, the incident reveals no horrors of the Soviet system that we were not already aware of and if as all but the most conspirational Sovietologists apparently surmise, it was not a deliberate act of Soviet policy, then it does not tell us anything whatever about Soviet intentions.

It is equally compatible either with President Reagan's picture of the Soviet Union as an aggressive. expansionist empire of evil or with the milder European picture of an ultracautious, primarily defensive power which president agents to be best in which certainly needs to be kept in check and challenged when it shows signs of expansionist opportunism, but which it is expedient to do business with and to involve as much as possible in the intercourse of civilized

It may be said that the moderation of President Reagan's practical sanc-tions against the Russians shows that he recognizes the comparative irrel-evance of the incident to the wider East-West issues. But I am not so sure that American public opinion or the Soviet leadership will see things in this light. The President's rhetoric has been employed to portray the tragedy as fresh and startling evidence of Soviet aggression and therefore of the need to spend vast sums on defence, especially

probably succeed.

The Russians may conclude that they made a mistake but the nature of that mistake in their eyes will not so much be that they have deeply offended the world at large or that they have risked punishment (which President Reven has been unable to inflict) as that they have given the President a plausible excuse to do what they are convinced he intended to do anyway - namely to build up his arsenal and to reassert military superiority over them. Either way the damage is serious.

IMF take effect. The race is on between economic recovery and an explosion World esteem, but can Mexico afford the price?

Mexico's poor, living in corrugated fron shacks like this, are turning against the government as the austerity measures demanded by the

"The President says that the crisis is revitalizing us, but everyone I know here is aware of just one thing - a great weight on their backs," Antonia in a small slum community to the north of Mexico City, was not convinced by the more optimistic de la Madrid's vibrant state of the nation address on September 1.

A proud heavy-boned Indian woman with long grey plaits and pendulous earrings, Antonia has lived in the same slum for 50 years. She shares a ramshackle, one-roomed but with six other people; her daughter, her son-in-law and her four grandchildren. A railway track passes 10 yards behind their home and right on the doorstep, there runs a river so polluted with combustible industrial waste that every now and again the water catches

washing other people's clothes. A year ago, before the economic crisis really began to bite, she made 350 pesos (then £3.50) a day. Now, after a 50 per cent price increase in Mexicans' staple diet, cornflour tortillas, and a doublin in the price of bread, she struggles to

scrape together 150 pesos (now 70p). Antonia's neighbour, Marts, is 34 but looks 20 years older. She knows that her two boys, four and six years old, are dying. The doctors say that the cause of their illness of malnutrition, a condition aggravated by the appalling hygiene of the open-sewer slum where

Marta's sons are among the 75 per cent of Mexico's 12 million chronically underemployed. Nine months ago he lost his job in a factory, one of the many thousands laid off in manufacturing industry, which is now operating at about 40 per cent of capacity. With unemployment benefit non-existent in Mexico, husband and wife can only watch in despair as their comsumptive-looking children liter-

ally waste away.

In his state of the nation address,
President de la Madrid privided no statistics for malnutrition or unde-remployment but the word "million" recurred again and again as he announced the figures for oil production, the balance of payments surplus, foreign currency reserves and,

most important, Mexico's dutiful payment of interest on its vast foreign Having kept a pledge to the International Monetary Fund to impose savage restrictions on public spending, President de la Madrid proclaimed that Mexico had met its "international obligations", which had had the requisite salutary effect on the

nation's financial health "Mexico," de la Madrid had said in July, "stands outin this moment, in the econimic chaos that pervades the world, for its seriousness, its responsibility and its willingness to fulfil its

On August 23 Mexico punctually paid back \$1,850m it owed to the Bank of International Scillements. Three days later beaming bankers in New York restructured \$11,400m due on

Mexico's 583,000m debt. The applause of the IMF President Jaques de la Rosiere has been echoed in the pages of the Financial Times. The Economist, the Wall Street Journal and the magazine Euromoney which recently voted Mexico's Jesus Silva Herzog "finance minister of the

But back home, the government is losing friends. At recent local elections politicians were killed as the country's ruling Institutional Revolutionary Party (PRI) suffered its heaviest ever defeats. Unaccustomed to electoral losses of any kind, the PRI hierarchy. which has ruled Mexico without interruption for the past 54 years, was stunged by its failure to obtain more than 77 per cent of the votes cast in 105 mayoral elections.

The political analysts' explanation for this unprecedented happening has been that, this year, the PRI's local faithful, bitter at the catastrophic fall less vigorous than usual in gonding traditionally reluctant voters to turn

up at the hustings. Antonia Flores's unquestioned matriarchal status is founded on the fact that she is the PRI representative for the slum community where she lives. As such, it is her responsibility to gather people together for presidential pro-government demonstrations and, most crucially, for

The implicit reward is always an improved living standard for her and her community. But now, after 40 years with the PRI. Antonia is beginning to respond to the nudges of her embittered neighbour Marta, sensing, as she puts it, that her reward will not turn out, after all, to be on this

earth. Antonia is a native of the southern traditionally rebellious, and poor, of Mexico's 22 states, in the town of Juchitan, in Oaxaca, two people were recently shot dead and several badly injured as local PRI members tried to force out the local mayor, the leader of maverick left-wing group which has captured the allegiance of the impoverished locals.

The government has confiscated TV film of the violence in Juchitan as people on both sides arm themselves in readiness for what promises to be an escalation in the killings.

Tense, armed confrontations of this sort between police-abetted PRI officials and discontented factions, are rife all over Mexico's provinces and government officials privately confide that they expect more violence in

seriously challenged", the PRI will not hesitate to call on "the latent repressive violence" which skulks just under the benign, if authoritarian,

In Mexico City the most obvious indication that austerity is breeding discontent, besides almost daily traffic-clogging demonstrations, is that street crime is getting out of control, prompting Congress last week to summon the capital's bewildered police chief for an uncomfortable taking to task.

The Mexican government calculates that the country will get over its economic slump in a year and a half, but this is working on the perhaps optimistic assumption that the international price of oil will hold (Mexico is the world's fourth biggest oil producer), that US interest rates will not rise and that the international economy will recover.

An experienced western diplomat said recently that he considered the optimism currently being voiced in much of the international press over Mexico's economic and political future to be somewhat premature. He said that in the reports he sent back to his government he was "hedging his bets" on forecasts as to Mexico's prospects of remaining, for much longer, the most stable notion in Latin America.

With a frankness, totally out of character. President de la Madrid told the French newspaper Le Monde last month that he had the impression these days that he was living over a volcano. A few days later, in one of the more emotive moments of his 31-hour state of the nation speech, the President said that Mexico's economic crisis confronted Mexicans with the challenge of a people living in time of

But an American financial analyst in the Mexican capital said that, for the moment, he found the "war" meta-phor a little imprecise. "What de la Madrid faces," he said. "is a race. A race between, on the one hand, Mexico's conomic recovery, and on the other, growing social unrest.

"So far the government is pacing itself well. But the road is still long and, if the government should lose the race, then 'war' might become a little Dr Lorenzo Mever, a politics race then war might become a little lecturer and former visiting Oxford more than just an image in a fellow is convinced that, as a last presidential speech."

Philip Howard

Scotching errors of history

An important anniversary has escaped the eagle eye of Old Father Time, who records these interesting little chimes of history for the Information Service on the back page. It is the one thousand, nine hundredth anniversary of the first great failure to civilize the Scots. The history of the British Isles would have been ridier if the Roman invaders had stayed on, and occupied and pacified the Highlands after their victory at Mons Graupius at just about this time of year in AD 83. From Bannockburn to Wembley we should have avoided a great deal of blood, and sick, and broken bottles, if the Scots could have been educated rather than just beaten at this early date. It is too late to do anything about it now.

We know about the battle only from

the Agricola of Tacitus, that magnifi-cent but unreliable historian's biography of his father-in-law. He writes that in the summer of 83, for the second year running. Agricola led his army on campaign north of the Forth. Towards the end of the summer he came upon the Caledonians drawn up on the the Calegorians grawn up on the slopes of the Graupian Mountain, on ground of their own choosing. Our modern Grampians come from a misreading of Graupius by Renais-

sance scholars.

For once in their history the Caledonians had stopped fighting each other to meet the common danger, and had mustered more than 30,000 men. The Romans had about 25,000: Tacitus mentions 8,000 provincial infantry and 3,000 cavalry in the front line, with about 2,000 cavalry in reserve, and detachments from two or three legions, who took no part in the

Tacitus gives the conventional setpiece speeches to the armies by their commanding officers before the battle. In his speech the Caledonian leader, Calgacus, atters the first Scot Nat slogan in history: "Robbery, murder, rapine, the lying Sassenachs call it their Empire; they create a desolation and call in peace." Like Shakespeare, Tachus did not reserve the good lines for his heroes. Even Jock MacNasty and the Elect Murder and all the Elect Murder a and the First Murderer are allowed poetry that makes the hair on the back

Caledonians were defeated 10,000 dead to 360. There are a number of puzzling questions about the battle, which have perplexed scholars for centuries. We might as well clear them

up definitively for the anniversary.

1. The site of the battle. Suggestions passionately advanced have ranged from Culloden to Brechin; the latter is as absurd as my South African friend who listens to the British football results and believes that the name of the club in full is Brechin City Nil. Mons Graupius must be farther north, marching camps that stretch to the mouth of the Spey. The most popular modern suggestion of a location is Mount Bennachie, near Inverurie, 32 kilometres north-west of Aberdeen. Do not believe it. The true site is Sillyearn Ridge, near where the River Isla runs

into the Deveron.

2. Those war chariots, in which the Caledonians rampaged up and down between the two armies before the battle. All I can say is that they must have had better suspension than modern cars in that rugged land with granite sticking through the turf, and that those primitive Aberdonians must have had good seats.

3. Why did the Scots stand and fight, when they would have done better to carry on retreating into the bogs and heather? Answer: Because the Romans had reached their heartland. They had to make a stand, committing suicide in the process, to protect their homes and families.

 Why was Agricola not allowed to consolidate his victory and occupy the whole of Britain, instead of being recalled to Rome? Answer: Tacitus ssorts that Domitian, the sabretoothed Emperor, was jealous of Agricola's military triumphs, and feared a potential rival, I think it more probable that independent military advice from such places as the cavalry club at Rome told him that Agricola's plan of conquest was impossible, and that it was a waste of time fighting the

Still, it was a lost opportunity. Up the Caledonians! Wha's like us? Verra few, and they're a' deid, starting on Mons Graupius 19 centuries ago this

Freezing out the freebooters of the deep

The recent claim by a group of Spanish and Italian treasure hunters that they have located the wreck of the eighteenth-century Spanish frigate Nuestra Señora das Mercedes, with a cargo of treasure possibly worth £100m, off Portugal's southern coast has awakened the Portuguese authorities to the vast fortune lying off their shores.

The treasure hunters, headed by José Maiquez of Cadiz and Claudio Bonifacio of Trieste, have done extensive research in archives in Spain and South America. They say more than 200 ships went down in Portuguese waters and they know the location of 50.

To prevent their treasure and historical artefacts being claimed and carried away by foreign groups equipped with sophisticated sounding equipment and computers that the Portuguese do not have, Portuguese archaeologists and the Ministry of PHS | Culture are belatedly trying to interest

the navy in searching for the wrecks and are urging Parliament to pass a law to control archaeological finds. The present law, passed in 1970, merely states that whoever makes a find is entitled to between one third and one half of the proceeds.

In the case of the Mercedes, sunk by the British in 1804 to prevent its 24 tons of silver coins falling into the hands of Napoleon, the finders' share represents a fortune, even though Maiquez calculates that it will cost about £600,000 to bring the cargo up. He says the remains are scattered over a large area because the ship exploded before it sank in 150 ft of water five

miles off the Algarve coast.

Maiquez and Bonifacio are meeting with difficulties in carrying out their plans. The Portuguese authorities say they have no valid authorization to search for treasure, and the owner of the fishing boat they hired to pinpoint the wreck claims they went off owing him nearly £700.

The treasure hunters say they

authorities in Faro in 1982 to search and that they reported their find to the nort authorities in nearby Portimão in anuary. But, when the Ministry of the Navy and the Ministry of Culture in Lisbon heard of the supposed find, they maintained that permission should have been obtained from them.

The Naval Ministry subsequently refused them a permit and also claimed that they have not presented any proof that they have actually found the Mercedes. Without proof we cannot accede to their claim". says Admiral Cruz Juniog, He also says that Portuguese warships recently searched the area but found nothing. He admits, however, that they did not use sophisticated instruments and that the nains could lie under the sand, as

Maiquez has described. Maiquez and Bonifacio intend pursuing their claim, even though they are fast running out of money and are seeking backers. They hope they will

submarine archaeologist Robert Ste-nuit, who in 1970 brought up the Slot Ter Hooge, a Dutch West Indian Company vessel which sank off Porto Santo, near the Portuguese island of Madeira. After a legal battle involving the Dutch government and specialists in international law. Stenuit wastable to claim most of his valuable find. which the Portuguese government had

The sunken ships off the Portuguese coast are apparently attracting other treasure hunters. French and American divers are said to have explored the seabed near the wreck of the Sao Pedro de Alcantara, sunk in the eighteenth century off Peniche, and to

have come up with gold ingots.

The situation has caused Dr
Francisco Alves, director of Underwater Archaeology at the National Archaeological Museum, to call for "energetic emergency action" by the government and the navy.

BRAZIL AND THE BANKS

The rescheduling of Third World governments do not step in now, fintions. The ultimate cause of debts seems to have become a they will have to step in later. If the crisis facing Brazil and its continuous activity. No sooner is the banks ended the charade and hankers is the gross irresponsione set of negotiations com- recognized that their Third bility of the country's financial pleted than another is begun. World loans were had, then policies. Last year its budget The plain fact is that the capital bases would be wiped deficit amounted to over 15 per international debt problem, out Government money would cent of its national income despite many soothing words then have to be injected in order. Unable any longer to finance this from central bankers, is still deteriorating. A new, although: not unexpected, dimension has industrial countries. On that been added by the suggestion argument, immediate action is from Mr Guy Huntrods, a director of Lloyds Bank International, that governments must intervene directly in the present Brazilian rescue attempt.

According to Mr Huntrods, "The public sector must play its part. The numbers are too big for the banking sector to handle on its own." But sheer size is not the expectation of profit. Such profit only basis for deciding whether government support is appropriate. It is true that Brazil is the world's biggest debtor and that the organization of new loans from hundreds of geographically dispersed banks will prove very difficult. The trouble is that, as market economies will undergo a soon as banks believe that radical alteration. Responsibility governments will bail out their most awkward customers, they have no incentive to put further holders, but with politicians, money in or to press these bureaucrats and in due course. customers to behave more re- taxpayers. There must be no sponsibly. If governments give dispute that, if a bank lends financial aid to Brazil, they will be expected to give financial aid to nearly all of Latin America and much of Asia and Africa as

It has been claimed that, if ment participation in debt nego-

then have to be injected in order that the banks maintain their traditional operations in the expedient because it would avoid cost and disturbance at some future date.

The argument may be superficially cogent, but it does not establish a case for government intervention. It was the banks which made the loans in the first place. They did so in the would have been for the benefit of shareholders. They now face losses instead and these alsoshould be borne by shareholders.

If banks are to be relieved of commercial risks retrospectively, the character of the advanced for mistakes will no longer rest with management and sharemoney and loses it, the government does not have an obligation to help.

There may, nevertheless, be a justification for discreet govern-

Unable any longer to finance this deficit by external borrowing, the Brazilian government had to resort to the printing presses. Inflation, a politically convenient but socially disruptive tax-gatherer, accelerated. It has now reached the intolerable level of 150 per cent.

In these circumstances, bankers cannot realistically expect Brazil to service its debts. But the problem may be transitional. Brazil may be better placed in two or three years' time if the budget deficit has been eliminated. Budgetary restraint is, indeed, the International Monetary Fund's central demand in the current negotiations. Western governments must be willing to support the IMF in its task, if necessary by further increases in its capital This will give Brazil a breathingspace to tidy up its financial position and also allow central banking authorities in the advanced countries to prepare for the worst eventuality, that Brazil will still be unable to pay up. Enforced bank mergers and management changes may, unfortunately, be as necessary on this occasion as they have been in previous financial crises.

IRELAND IN TWO PARTS

There was never much doubt extent to which the forms and about the outcome. The question institutions of society should be put to the Irish people was taken to mean, Do you want the present legal ban on abortion to be made safe by an addendum to the constitution? Never mind whether the addition was otiose; the wording incompetent, the cifect different from that intended, the procedure objectionable, and the whole thing divisive of the nation. The people had been asked about abortion. The moral majority was roused from its slumbers. And the moral majority in the Republic of Ireland is Catholic and conservative. So that is that.

The lively debate that the referendum stirred up went much wider than the question at issue. It had to, since there is a vartual consensus in that country that the law relating to abortion should be left where it is. There was much introspection about the sort of political society the Republic is or ought to be: should it embody and reflect-the outlook of the numerically preponderant culture, part lay part clerical; or should it assume a more liberal ethos and put distance between church and state as is considered appropriate to plural societies?

A headcount gives the answer that has just been returned. The actual movement within Irish society gives a less conclusive answer. During the past fifteen years of so there has been noticable enlargement of the room occupied by opinion and conduct that diverge from orthodoxy. Perhaps it is better doscribed as a fragmentation of orthodoxy. It is not only 'a secular phenomenon. There has been a similar movement within the Roman Catholic Church in Ireland. So the relevant political argument is really about the the sovereignty of one part with

changed in order to correspond with changes that have actually occurred or are occurring in the character of society.

That is the question that Dr FitzGerald sought to pose last time he was in office when he announced his "constitutional crusade". It is his misfortune, and partly his fault, that the first full engagement of the crusade should have been fought on terrain hopelessly disadvantageous to his cause. The outcome can only weaken his authority. It also makes something of a mockery of his policy towards Northern Ireland.

Mesnwhile there are things to island too. Dr Paisley is in touch with a mole who has come up with the spine-chilling infor-mation that British and Irish civil servants are thrashing around looking for things to have cross-border cooperation about. This is in fulfilment of the programme agreed between the two prime ministers for the Anglo-Irish inter-governmental council. The rest of us have not been allowed to see the documents so we have only Dr Paisley's word for their tenor, which is, he says, to edge Northern Ireland out of the United Kingdom and into an all-Ireland republic.

One must be cautious of reading it that way. The Unionist imagination in these matters is as Shakespeare described it: Or in the night, imagining some fear. How easy is a bush supposed a bear. Particular difficulty is experienced in distinguishing functional cooperation between authorities in two parts of Ireland with distinct and uncompromised sovereignties from arrangements that impair

a view to having the other assimilate it.

The proposal that Unionists

are specially suspicious of is completion of the Anglo-Irish council with a parliamentary tier including an element drawn from the Ulster Assembly. If the quid pro quo were to be the SDLP's cooperation in the assembly, there would be advantages that Unionists ought to be prepared to examine. One advantage for them would be the far better prospect of a return to provincial government. "Power sharing is the ignis fatious of Westminster rule in Ulster. But it is not impossible for the political leaders of the two communities to act in common for the common good. Next week a delegation leaves North-em Ireland for the United States to drum up investment for the province. The four main constitutional parties of Northern Ireland are represented on it, two by their leaders - Dr Ian Paisley and Mr John Hume. The initiative owes nothing to Mr Prior and his assembly, which is no doubt why the parties have managed to tolerate each other's presence. It is far removed from anything touching on the constitutional status of Northern Ireland, Still; it shows that Ulster's political leaders do have some common loyalty. That loyalty is to the people and their welfare. It is a foundation upon which to build.

And: a more propitious time for constructive politics may be approaching. The Royal Ulster Constabulary is having notable success in bringing terrorists to trial on the evidence of informers. Another crop of delations has just been announced. The impact of these successes is already felt in a reduction of gross terrorist crime.

TECHNOLOGY OF SOCIAL REFORM

When new tech- change in fiscal structure for the nology assaults an ancient insti-first time since the mid 1970s. tution like the Civil Service, the Sad lessons from past essays into government of the country must technology, like the Department go on. It cannot be put out to of Transport's Driver and Veinternational tender. But the hicle Licensing Centre at Swanimpact can be traumatic. White- sea, led the planners to insist onhall is on the brink of the most cramatic change in bureaucratic practices since the Asquith administration introduced the first national insurance scheme and, in the words of Winston Churchill, its reforming President of the Board of Trade, hasight in "the magic of averto the aid of the millions".

A conference of policy analysts and administrators at York could start planning post-1987 University this week began to map out some of the conseguences. Clearly, bureaucratic processes involving financial transactions, a great deal of information, and frequent variation - like the tax and social security systems - are ripe for computerization. The Inland Revenue's pay-as-you-carn will be automated from the end of 1987. It is a mammoth enterprise embracing 27 million taxpayers, more than one million employers and a national network of collection. It will cost £210 million to instal, but should save £50 million a year when

Equally important, the flexi-

a minimum of external disruption if targets were to be met, though there have been over a thousand changes in requirement since 1980. Ministers therefore agreed on a moratorium on tax reform. Four years is a long time in politics. But, as Mr Steve Matheson, director of the PAYE project put it in York, ministers and civil servants policy changes next week if they-

By coincidence the target year of the Cabinet's longer-term review of tax and spending happens to be 1986-87. If ministers so decided, new technology and new policy could be harmonized conveniently given careful forethought. There is a snag though. Social security, the system (which in any fundamental regigging of the welfare system would have to be reformed in tandem) will in the mid-1980s be moving into its own great technological breakthrough, which Sir Geoffrey Onon, Sec-

Department of Health and Social Security, compares in its com-plexity with the United States NASA enterprise in putting men mto space. The DHSS new technology will not be operational until the mid-1990s. No doubt there will be a moratorium on reform in that field as well. Tack it on to the tax stop and you have, as Mr Michael O'Higgins, an adviser to the Commons Select Committee on Social Services, has noted, a block on reform lasting a quarter of a century:

The DHSS transformation will cost £1.6 billion and affect 50 million personal records. It also carries important access and privacy implications. Will for example, a DHSS client be able to see the VDT screen displaying the data that will determine his or her disbursement? Will new technology tend to inhumanize or dehumanize the 500 local social security offices or will it dehumanize them still further?

The message of the York conference is clear: Civil Service work can no longer be split into other side of the tax-benefits material fit for thinkers, doers or technicians. The new model official must be a bit of all three if the new technology is to be harnessed to the full. Beside that, the recent debate about the priority to be afforded policymaking and management paics and Permanent Secretary at the into obsolescence.

to deterrence From Lord Mayhen

On a twin track

Sir, Though a strong supporter of the twin-track decision, I find your leader of September 5 ("Be firm, be sceptical") too negative.

Yes, the French and British deterrents are indeed conventionally regarded as "strategic" and "independent". But they are in fact marginally shorter in range than the SS20s; and the British deterrent, though it can be recalled to independent command, has for years been assigned to Nato and is targeted and deployed by Saceur (Supreme Allied Commander Europe), It is therefore unreasonable to insist that neither force should count at all in the European nuclear balance.
A useful precedent has been set in

the Vienna negotiations for a conventional balance. Here, since the French forces are independent, they are not formally "counted in", but a figure of 50,000 has been added to the Nato manpower total for the sake of reaching agreement. ... The same common sense should now be shown in Geneva. The twintrack decision has succeeded in squeezing some useful concessions from the Russians, and in terms of wirheads the gap between the two sides is now less than 3 per cent of the total US/SU stockpile. The Rossians can devastate the world without SS20s and we can devastate them without cruise or Pershing 2s. We should not let the Korean

airline outrage wreck the INF negotiations. It is time for a deal. Yours etc. MAYHEW.

House of Lords.

Dispute over Belize

From the Prime Minister of Belize Sir, There are three facts to remember when referring to the article on Belize by Mr George Walden (August 12) and a letter in The Times of August 23.

Belize was never a part of Gustemala. It was a geographic entity within its existing borders at the time Guatemala declared its independence from Spain.

Belize desires a settlement of the unfounded claim without prejudice to its sovereignty and its territorial

Belize understands, appreciates and thanks the people and Govern-ment of the United Kingdom for the British military presence as a factor of security and stability in a turbulent region.

Sincerely, GEORGE PRICE.

Central America.

Indiana's tax laws

From the Governor of Indiana Sir, Recently I read the article about US methods of unitary taxation that appeared in the July 1, 1983, issue of your paper. The article listed indiana as a state which has adopted this method of taxation. This is only. partially correct, and I would like to briefly explain Indiana's approach to this issue and how it actually benefits both domestic and foreign corporations.

Indiana law allows our Department of Revenue the discretion to give corporations doing business in our state two options. These corporations may choose either to be taxed on a unitary basis or to be taxed using the familiar allocation method. This method segregates for tax purposes a British corporation's income produced by its Indiana operations from its income produced elsewhere.

The only time the British corporation would not be allowed to exercise its option would be under circumstances where the company intentionally structured its sales in a manner that would artificially minimize or eliminate the subsidiary's Indiana tax liability. Under such circumstances, unitary taxation methods would be applied.

Indiana has recently committed over £120m for purposes of economic development. A portion of these funds has been targeted to the attraction of foreign investment. Indiana has a long-standing history of welcoming foreign investors with open arms. I am confident that Indiana is the best state in the Midwest of our country and one of the best states nationally for foreign companies to conduct their US

In view of this extensive monetary commitment to economic development and our paide in our business climate, I felt it was important to clarify the misrepresentation in your newspaper's article. Sincerely, ROBERT D. ORR,

Office of the Governor, Indianapolis, Indiana 46204-2797, United States.

Church and politics

From the Very Reverend Monsignor George R. Leonard

Sir, Your front page headline, "Hume tells priests to get involved in politics" (September 8) was not supported by the report below it. Although Cardinal Hume was addressing the National Conference of Priests, his plea for greater participation in the life of the national community was, as your report indicated, addressed to Catholics generally. The Cardinal was not discussing the extent to which priests in particular should engage in activities of a political

Your headline perhaps makes the common mistake of identifying the Church with the clergy. Yours faithfully. GEORGE R. LEONARD, Archbishop's House, Westminster, SW1. September &

Yours sincerely. T. WEAVER. 87 Osborne Avenue Newcestle upon Tyne, Tyne and Wear.

From Mr P. D'Arcy Hart

Sir, Your back page of September 6 presents questions on the Korean me disaster. The last question skirts around an essential issue.

We have been given conver-sations between Soviet pilot(s) and ground control and monitored time reports gathered by the United States of the sequential events. We are told that Tokyo lost the plane on radar and didn't know its

location. But what was the radio of the Korean pilot doing all these two hours of anxiety when he could see danger? Nothing? No distress call? No advice sought? Or was the radio out of order, or is the information critical - not yet released?

Cannot The Times find out; or is the Reagan hysteria unfavourable to such an inquiry and publication? Yours faithfully, P. D'ARCY HART. 37 Belsize Court, NW3:

From the Reverend Cloude Riches Sir. Before we give ourselves up to unrestrained condemnation of the Russians, ought: we not to ask ourselves whether we are entirely clear in our own minds what the attitude of British military authorities might be if an Argentinian plane, albeit one having the

Pricing gas

From Mr Martin E. Simons

Sir. A most important aspect of the British Gas efficiency report, by Deloitte Haskins & Sells, published late August, is that it will force the Department of Energy and the British Gas Corporation to come to an accommodation of their differences which have not been helped by insular attitudes or the ukases of successive governments.

In the area of gas pricing one is left with the impression that shorter longer term needs of industry been considered. The Department of Energy and the corporation favour nigh selling prices based on the cost of the most expensive gas - viz Norwegian Frieg field gas. It is of concern that the report states: "We understand that UK sector oil companies require a post-tax return of \$-10 per cent," and that the corporation's 5 per cent return required in the 1978 White Paper

tial for industry, whilst sensible heating costs, which rose 25 per cent per therm in the last financial year, are vital for our ageing population.
The Government must take wise economic and social decisions. Yours faithfully. MARTIN E. SIMONS. 24 Granard Avenue, SW15. August 30.

Straw burning

From Dr M. A. Plint

may need reconstruction.

Sir, The most recent authoritative study of the subject, published by the United States' National Academy of Sciences last year, shows conclusively that, if present trends continue, the carbon dioxide content of the earth's atmosphere will double within 50 years.

The effects of this change are still

non-proven, but there are strong theoretical reasons for believing tha a massive modification to world climate, in the direction of increased temperatures, could result. This could possibly be the environmental problem facing the world by the middle of the next century.

The effect is a marginal one: the rate of carbon release into the atmosphere, primarily the result of

From the Colombian Ambassador Sir, It is impossible for me to overlook yesterday's article (September 5), "Colombia's own savage El Salvador", by your correspondent in Bogotá, since it does not state the whole truth.

We Colombians are aware of our problems and of our shortcomings and it does not make us feel uncomfortable if these things are discussed and analysed abroad. But it would be preferable if, at the same time, the public were also informed of our efforts to solve and overcome

regions harts us, but we are endeavouring to the loest of our ability and in good faith, to eradicate the causes which might have given rise to the same. Last year, the National Congress approved the most comprehensive amnesty law in our history. President Betancur was not alien to this statute. On the contrary, he supported and en-couraged it from the beginning by unequivocal messages and through

Furthermore, the Government is carrying out a vast work of economic and social transformation to bring about a reasonable standard of living throughout the land and to climinate extreme poverty. Political democracy is fully operational and, we are auxious to achieve economic and social democracy as well,

The publication of the article to which I refer, emphasizing the tragic occurrence of the Magdalena Medio region, took place at the same time as the signing of the first contracts for a loan of \$100m involving the International Finance Corporation, the Midland Bank, Credit Com-

the burning of coal and oil, now outstrips the rate at which vegetation can remove this carbon. Any reduction is important.

The Farmers Weekly mentions a figure of five to six million tons of straw burnt each year. This represents the release of perhaps eight million tons of carbon dioxide, some 2 per cent of total emissions.

Two per cent may not sound very much, but it is the excess that counts, and this is the only substantial reduction that could be made, at little expense, by a simple piece of legislation.

This legislation should, I suggest, be put in hand without delay. Yours faithfully, M. A. PLINT. 8 Watermans Way. Wargrave, Berkshire. September 1.

Alliance in more than a name

From Mr Aubrey Jones

Sir, The decision taken by the SDP's National Committee against joint selection with the Liberals of candidates for the European elec-tions is a significant step towards impeding an eventual merger of the two parties.

As a Conservative who, feeling that Mrs Thatcher's Government was betraying all that was best in the Conservative tradition, joined the Liberal Party before the SDP was born but who could equally well have joined the SDP had it been in being, I can only say, "I am saddened."

The tactical argument adduced for the decision is that the SDP must remain open to further defections from Labour. But are potential Labour defectors likely to join a party against which they recently

fought in a general election?

Is it not possible that they might be readier to join a party formed from a marger of the Liberals and the SDP but bearing a totally new name?

And what about the growing number of disaffected Conservatives shut out by Mrs Thatcher? They are unlikely to join either the SDP or the Liberals. They might just be prepared to join a party sprung from

The philosophical justification put forward for continuing separate identities for the Liberals and the SDP is that both are in favour of electoral reform, which would facilitate the appearance of several parties. That is true. But there will be no electoral reform without a change of government. Whether or not that takes place depends on the

And the electorate not unnaturally, thinks in terms of the historical context - Government and Opposition, or Government and alterna-

tive Government. The Liberals and the SDP are united in their hostility to the adversarial nature of the inherited political system. It is doubtful, however, whether the electorate has advanced to that point. How otherwise does one explain the plight of the Liberal Party over the

last half century? There are parts of the SDP's thinking which seem to rest on the assumption of power won - e.g., the regional organisation appropriate to a changed electoral system, less so

the one we now have. Power has first to be attained, and the attainment is likely to be easier with one party than two.

Yours faithfully, AUBREY JONES. turn has brought massive de-preciation charges. As a conse-quence, the real rate of return for the 89 North End House Fitzjames Avenue, W14. September 8.

Wedgwood's service

From Mr Christopher Wade Sir, I write from the Queen Anne house in Hampstead mentioned in David Hughes's entertaining piece (September 3) about Wedgwood's dinner service for Catherine the Great.

According to Dr George Williamson, who among many other things was art adviser to J. Pierpont Morgan, one of the Wedgwood family visited Leningrad to enquire about the service and was assured that it no longer existed: the explanation was that over the years the Empress had thrown the lot at -her servants' heads.

Can recent visitors to the Hermitage, please, confirm that the dinner set is still on display? Only one Russian Hampstead seems to have survived and we are anxious for more - and for a copy of Dr Williamson's famous catalogue. Yours etc.

CHRISTOPHER WADE Hon Curator, The Hampstead Museum, Burgh House, New End Square, NW3. September 5.

Mr Wesker's paradise

From Mr Robert Muller Sir, Re Wesker v Levin (feature, 113 August 30), Mr Wesker lives in a August 30). Mr wesker uves in a theatre playwright's paradise. Most novelists, who probably work even harder than playwrights, are never reviewed at all. Few TV dramatists ever see their work reviewed. (There are no TV drama critics.)

The theatre is given an importance by the press which cannot be justified either by its inherent quality or by readership demand. Yours faithfully

ROBERT MULLER 2 Camden Square, NW1.

Iced bunkum

From Mr J. M. Adams Sir, There is no need for Dr Couper (September 6) to be in doubt about the constituents of his ice cream. He can obtain, free, from the Ministry of Agriculture, Fisheries and Food, a most helpful booklet, called Look at the Label, which gives the meanings of all the "E" numbers.

From my copy, his ice cream contains lecithins, mono and diglycerides of fatty acids, carragcenan, locust bean gum, guar gum, tartrazine, carmoisine or azorubine and copper complexes of chlorophyll and chlorophyllins, What could be simpler? Yours faithfully, J. M. ADAMS, 6 Austen Road.

From Mr Peter Montley Sir. Presumably the chocolate-flavoured E in Dr Couper's E322. E471, et al (od nauseam.") stands for "ersatz".

Yours faithfully PETER MOTTLEY, 9 Aston Close. Berkshire.

Guildford, Surrey.

OBITUARY

GENERAL IBRAHIM ABBOUD

Former Prime Minister of the Sudan

General Ibrahim Abboud, who became Prime Minister of the Sudan in 1958 by leading a coup d'état against the existing parliamentary regime and was himself ousted in a further coup d'état in 1964, died on September 8 in Khartoum at the age of \$2.

Born on October 26, 1901, he was educated at Gordon College, Khartoum and at the Khartoum Military College, whence he entered the Sudan Defence Force. With it he saw service in the Eritres campaign and with the 8th Army in the Second World War, and in 1955 he became Com-

mander of the Sudanese Army, In 1958 having led a successful military coup d'état against the regime of Abdullah Khalil and justified it on the grounds that the country could no longer afford the corruption and ineffectiveness of the Parliamentary regime, he became President of the Supreme Council of the Armed Forces, Prime Minister, Minister of Defence, and Commander-in-

He continued at the head of a purely military regime, in the face of growing popular restiveness, until 1964, when a further coup d'état took place, for another month after this he succeeded in maintaining his own position by Council, but was then forced to resign and retired into private life. He paid a State visit to London

in 1964 and on this occasion was made an honorary GCB. He had earlier been made an honorary Direct C

Science report

Computerized scanner brings pictures from deep inside the brain

phenylalanine (more commonly known as L-dopa). The chosen tracer emits a positron (a positive electron). Three hours after injection with the labelled L-dopa, in three normal male volunteers on the laboratory staff, a picture was constructed of the parts of the frontal, mid and rear parts of the

brain in which donamine emitting positrons was concentrated. The research on dopamine is one of two singular advances in attempts to look into the brain to distinguish between normal and abnormal patterns. The other

concerns one of the mysteries surrounding Alzheimers disease. or presentle deterioration of the brain. One of the riddles lies in the presence of strange tangles of fibres, known as neurolibrillary tangles, which occur as clumps and which, according to their extent, seem to correlate

with the severity of mental Just what the tangles are and why they form in the hrains of victims of this widespread and crippling disorder is unknown, but a group of research workers at Harvard Medical School have produced some new evidence

which could be used to identify those at risk of developing The work, by Dr Yasno

Tharam Carmela Abraham and Dr Dennis Selkoe, has shown that the body's natural defence system produces antibodies to try to combat a specific substance that is present in neurofibrillary tangles and not in normal brain tissue.

Antibodies are special types of proteins produced by the body to seek out and neutralize best known as defences against invading viruses; bacteria and other micro-organisms.

The fundamental discovery of the Harvard team was that the bundles of nerve fibres contain something that was chemically distinct from normal fibres to which the immune system would react. The next step is to use that knowledge to uncover the detailed biochemistry of the tengles, and perhaps thereby understand the mechanism

which causes them to form. " Nature Vol 304 Nos 5,928 and

A SPECIAL REPORT

The Royal Air Force

the history of the Royal Air Force. Last year it ceased to operate berry strategic bombers, though a few of the V-homber force, which entered service in the 1950s to carry Britain's independent deterrent, still linger on in other roles. And now a series of developments are in train which will update the RAF - a service still largely based on 1950s and 1960s technology so as to meet the threats of the 1980s and 1990s.

These developments include:

The arrival in service in both Britain and West Germany of the rornado GR-1 strike/interdictor circult. The first squadrons of these aircraft are aircraft o From about 1985/86 the strival of the F2 air defence

version of the Tornado.

The ground-based systems for the defence of British airspace radar, command and control and communications systems - are being substantially renewed and

he middle and late years of this decade will conjunction with Nato's AWACS. Throughout this period it was constitute one of the great pivotal periods in combination of these three will process which continues today.

flight refuelling is being very and many others have all greatly extended. This facility was already being enlarged before the falklands crisis by the conversion mand. Support Command and of VC-10s to tankers, but under the pressure of events Vulcas bombers and Hercales transports the pressure of events Vulcan bombers and Hercales transports were also rapidly converted, and since then the RAF has bought six TriStars, also in serve as tankers.

TriStars, also in serve as tankers.

The Tornado strike/interdictor aircraft are recognized as being at present inadequately armed. But from about 1986 they will be equipped with two now and very advanced weapons: the JP-33

EAF Germany.

By the end of this year Strike, the dominant command, will have been reorganized into only three support so it is and air transport and offensive support operations, No 11 handling air defence, and No 18 covering maritime operations plus a headquarters operation in Cyprus. very advanced weapons: the JP-33

RAF was in the deldrums, amailer proportion of the Nimred Airborne Early Warning sources and by changing assess-

A Tornado of 27 Squadron in a bomb-proof hangar at RAF Marham, Norfolk

although they always appeared on our priority list. We have known about the deficiency but we have not had the money to fill the gap. We are now making sure it is petched in time.

But of course it is a complex business. It so happens that because we now have the airframes in the Tornado we are able to concentrate on the protective measures.

Until the Tornado came into service most of our energies and nearly all our money was concentrated on setting the Tornado into the air. But the John Nott defence review of 1981 in my view quite rightly laid emphasis on the need for improved weapons fits, and that was confirmed in the Falklands war. Many of the measures we are now taking were well in hand before the Falklands crisis.

For example, the JP-233 sirfield denial weapon which has now been ordered in substantial numbers has been in the process of development for quite a long time. The Falklands experience

knew to be some of the just underlined the importance of shortcomings with our older it and perhaps made the formal siteraft - that we had inadequate electronic warfare and electronic How stretched is the RAF as a

that we had inadequate chaff dispenser and decoy capability.

These are being rectified perhaps more quickly than they would have been if we had not had the Falklands experience. meet the Nato commitments. But having said that, we are taking steps to replace the equipment and people that are stationed in the Falklands, and by next year, for instance, we shall have the buy of the Phantom F-41s from the United States navy replacing those aircraft that are down in the Falklands, and they will deployed in the defence of the

We are doing the same with additional buys of Rapiers and helicopters, so in the long run the Tornado from Honington in Falklands will not be a great Suffolk to simulate an attack on burden to carry. Just how important is the

enhanced capability for in-flight refuelling going to be, not only in the context of the Falklands, but more generally in relation to the are limits to the range of Soviet RAF's Nato commitments? Sir Keith: The TriStars were bought really on the Falklands bill

bought reality on the Falklands bill because of the complexity of organizing the Falklands air position now?

Sir Keith: What we are doing is raising our air defence capability the Victor and the VC-10. But from the very low level that was established after the 1957 defence capability from the very low level that was established after the 1957 defence.

They are very well are v clearly have a tremendous capaactivity. So it is a very useful enhancement of our capability.

In the context of a war in North Europe, would not air tankers be so vulnerable to attack as to quite drastically reduce their value?

Sir Keith: If you look at a map that would provide, for example, Torondo with a substantial amount of fuel in benign areas, at height, so that they could for instance attack airfields in the Kola Peninsular or penatrate through to Poland and western

And we, I think, demonstrated this capability by sending a indeed... The sensors them Tornado from Honington in selves will be very much more Akrotiri in Cyprus and then return...It is a complex operation and it will require you to be able to operate your tankers with some confidence in areas which we do regard as benign, but there

The air defences of the United

to meet the trip-wire threat. We scene and any other areas of have not had enough fighters in resources available to us to improve the number available. We have gone up from 60 Lightnings in the mid-1960s and we will have by the end of 1983 well over 120 air defence aircraft of the Warsaw Pact area you can in the United Kingdom and West devise in-flight refuelling brackets Germany. That does not include Germany. That does not include the aircraft we have in the Falklands and we will also have

the missile-carrying Hawks. A lot of money is being spent on improving the ground facilities associated with the air defence of the UK. How big an advance will this represent?

capable, much more resistant to electronic-counter measures. The command and control communications system which will make use of the information the radars provide will be fast and flexible with elements of redundancy which will make sure that it cannot be taken out. So it is going to put us in a whole new ball game in the air defence business . . .

designed, but they are very static bility to be used within the Nato have known ever since that we and very vulnerable. They are not backed by a fast digital data-link. this country. We have done a and so there are many disadvangreat deal within the very limited tages to them, and we have been conscious of these for a very long

> It is therefore very exciting to be reaching a situation where improvements are incorporated that we have been talking about to my knowledge for 20 years. The fact that it is coming in at the same time as the Nimrod Airborne Early Warning aircraft and the Tornado air defence variant means that really the air defence of the UK is going to be very much better based than it has been at any time in peace-time.

Rodney Cowton, The Times Defence Correspondent, talks to Air Chief Marshal Sir Keith Williamson, Chief of the Air Staff

Sir Keith, how do you see the I have known it, and this has state of the Royal Air Force today, coincided with an improvement

elf very fortunate to take over way from what I regarded as a high. Such is the Air Staff at the slough of depression that we were momen farticular time I did because it is in in the mid-70s when there is no indeed. the very time that there is coming gainsaying that morale in all three to fruition the largest recquip-ment programme that the RAF of the 1974 defence review, and has been involved in during my time in the air force, bar perhaps the Services existing at that time. the rapid post-Korean War the rapid post-Korean War We had people queueing up to expansion in the early 1950s when leave the Service, and we were the Hunters and Swifts came in.

providing us with a giant leap forward in our capability, not, I might say, before time because the surcraft that the Tornado is replacing are old and certainly obsolescent and we needed country and we can be fairly correcting to take us into the choosy at the recruiting counter. 1980s and 1990s but that is now seing done.

Tornado, the Airborne Early operational capability is as high as for a long time.

the poor pay and conditions in

actually having to stop them from The present programme, with going, and so we had a lot of the Tornado at its centre, is reluctant officers and senior NCOs. We have come a long way since those days.
It would be surprising if we had

not because there are three million unemployed in this And this has also had its effect on the people we have got in the Service, so that we can retain Warning Nimrod and the im-proved UK Air Defence Ground Environment all mean that our much higher than they have been

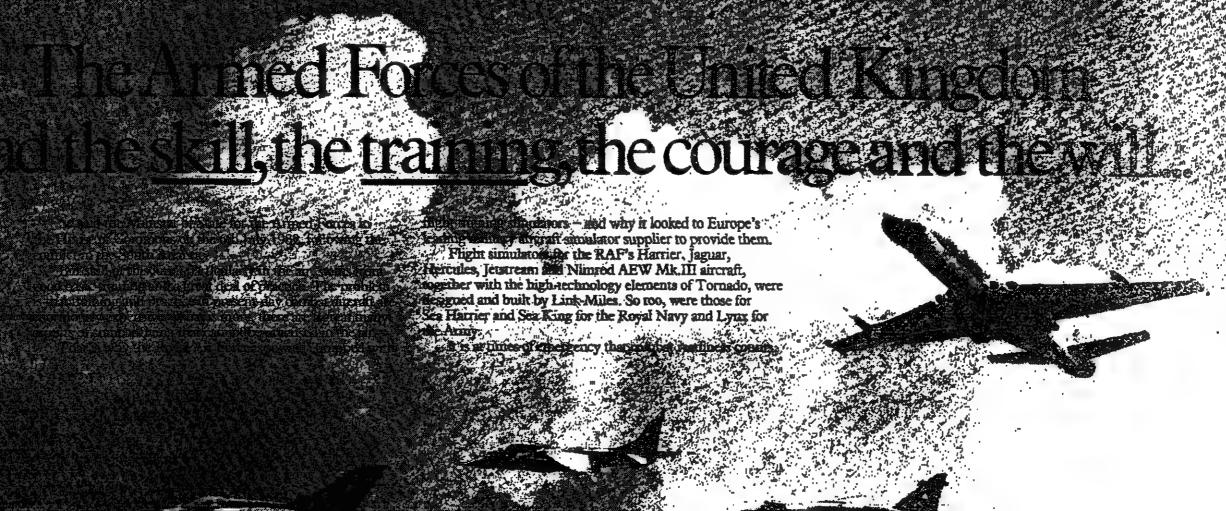

It is an excellent coincidence state of the Royal Air Force today, collection with an improvement is collecting in the morale of the people in the at a time when the quality of our personnel is very high and the morale of those people is very high are the morale of those people is very high are the morale of those people is very high are the morale of those people is very high are the morale of those people is very high. So I think the RAF at the moment is in very good shape

> What general conclusions relating to the RAF would you draw from the Falklands conflict?

Sir Keith: I don't think there are any new lessons that we have extracted from the Falklands. operation, but there are an enormous number of old lessons that have been reemphasized and

Certainly the experience has made us shift the emphasis on to inflight refuelling capability, both in terms of having tankers to give fuel and expending the capability of the majority of our aircraft to receive it. All our front-line fixedwine aircraft for the future will have a capability to take on fuel.

The Falklands experience, combined I might say, with the experience of the Israeli air force in the Bekas Valley, has, of course, also underlined what we capability is as high as

funds and international institutions.

The policy of maintaining the Falklands as a fortress is the other factor which is placing intense pressure on the RAF inventory. Not only does the service maintain the long supply bridge between Britain and the islands, by way of Ascension, necessitaling an intensive refuelling operanon on the way, but it maintains a squadron of Harriers. a squadron of Phantoms, and two helicopter squadrons in the

Falklands, plus anti-aircraft Rapi-er missile batteries. To make up for the loss of the Phantom squadron from the European scene, the RAF is buying 15 former United States Navy aircraft of this type for £33m.

A continuing part in Nato is played by the RAF with its Harrier force, of which there is a further 60 on order, due to begin arriving with the squadrons in 1986, Jaguars, Buccaneers and Phantoms. The debate on a replacement for all four types continues, with a vociferous lobby in favour of a second-generation Harrier which would combine vertical/short take-off and landing with supersonic flight. A signifi-cant step towards a successor for the more conventional types was the announcement at this year's Paris Air Show that the British Government has signed a contract with British Aerospace for the development and construction of a demonstrator fighter for the 1990s. The single proto-type will be based on BAe's plans for an agile combat aircraft incorporating a great deal of new technology. including composite materials, and with electrically-signalled controls replacing the traditional rods and wires.

In-flight refuelling is becoming 'an increasingly-important role for the RAF, and the service has added considerably to its capa-bility in this sector in recent

During the Falklands conflict in the summer of 1982, the tanker fleet of Victor K2s was hastily backed up by the conversion of 24 of 60 Hercules transports, six as tankers, and 16 as receivers. Six Vulcans are also fulfilling the tanker role, and in this year's defence White Paper it was announced that six Lockheed to be bought from British Airways for conversion to tankers, and that four of them would be given an additional freighter capability.

In July this year, the first of nine ex-airline VC-10s converted to in-flight refuellers was rolled out at the British Aerospace factory at Filton, Bristol, and a study is continuing of the possible conversion of further aircraft of this type to form a second squadron. The tanker fleet will be used not only to keep aircraft flying over long distances, as in the Falklands operation, but to enhance the duration of fighters on combat air patrol.

Maritime reconnaissance and search and rescue duties are carried out by the RAF with Nimrod SR-2s, and airborne early warning by a fleet of six aging Shackletons. These are to be phased out as the RAF's new fleet of 11 Nimrod AEW-3s come into service. This version of the Nimrod will be packed with the most-advanced radars and elec-tronics enabling its crew to "see" long distances over the horizon

On the ground and in the cockpit: Tornado crews of 27 Squadron

and to give advance warning of incoming enemy threat. These are the sharp-end/fixedwing aircraft of the RAF, although

they would be supplemented in time of war by 90 Hawk trainers fitted with Sidewinder air-to-air missiles. The Sidewinder con-tinues to be one of the RAFs main weapons, together with the Sparrow, and its improved Skyflash version, to be carried by the Tornado air-defence version, and Phantoms. Within the past few weeks, the Government has placed a £300m fixed price

contract for the British Aerospace Dynamics Alarm anti-radar missile to be fitted initially to Tornado and Buccaneer aircraft. and later to the Hawk, Harrier, and Sea Harrier, Alarm was preferred over an American mistile, the Texas Instruments AGM-88 Harm.

The main adversaries in time of conflict would be the latest aircraft types developed by the Soviet Union, the Backfire, Fencer. Flogger and Foxbat, in Nato code, some 800 of which are produced each year, according to

Western defence sources The Tupolev Tu-22M Backfire B, in service with the Soviet longrange air force and naval air force. is the largest variable-geometry aircraft in operational service in the world, with a performance of

twice the speed of sound at high altitude. It carries the AS-4/AS-6 stand-off missile, which has a range of 250 miles, and the aircraft's unrefuelled range is 4,500 miles. The Sukhoi Su-24 Fencer is also a swing-wing aircraft developed as a fighterbomber for ground attack. It, 100,

weapons load of 10,000h.

The Mikoyan Mig-23/27 Flog-ger, also swing-wing, is a multi-role combat aircraft and has demonstrated its ability to track and engage with radar targets flying below its own altitude. Foxbat - the Mig-25 - is a singleseat, long-range interceptor, with a dash performance of three times the speed of sound, and a ceiling of 100,000ft.

Arthur Reed

AIR DEFENCE

Developing non-nuclear deterrence

the mid-1960s has been in the

The trouble began in 1957 when the defence review foresaw air defence switching from manned aircraft to missiles. The existing PI supersonic interceptor project was to be allowed to go ahead (and as the Lightning it became one of the mainstays of the RAF), but no further projects for new authorized. fighters would

In the next 10 years or so, the number of fighter squadrons fell from 55, including auxiliary squadrons, to five. But then came the policy of massive nuclear retaliation to one of flexible response, and with it came the nercention that effective air defences were necessary, and that That state of affairs continues, but a radical improvement is in prospect during the second half of

Rapier missiles provide an important element of ground defence against air attack, man-ned aircraft will be at the centre of improved capability, notwithstanding the expectations of the 1957 White Paper, Of 385 Panavia Tornado

aircraft on order for the RAF, 165 will be in the F2 version for air

defence, and these will start to Air Defence Ground Environenter squadron service about 1985/86. With their very advanced Marconi radars they are expected to be able to dominate

very large areas of air space. These Tornados will be backed by two squadrons of Phantoms, which will be retained in service for the time being, instead of all aircraft of this class being phased out. They will also be supported by Hawks built by British Acrospace. The Hawk is primarily an advanced trainer, but about 70 of them are to be equipped with enable them to play a secondary role in air defence.

be armed with Sidewinder Aim 9-L and Sky Flash missiles, and these are seen as being adequate to meet needs up to about the end of the decade. However, already advanced new medium and shortrange air-to-air missiles are being developed to provide armament for the 1990s.

The arrival in service of the air defence Tornado will roughly coincide with the advent of another important upgrading of the RAF's capability in the form ground radars and command, control and communications systems. This programme is known by one of the less

Under this programme, Britain's existing radar stations. which are

vuinerable to both physical attack and to electronic warfare, will be replaced by 12 transportable 3-D radars which will be much less The new radars are to be supplied by Plessey and Marconi and these companies have linked with Hughes Aircraft Company of

California to form UKADGE Systems Limited (UKSL) which will provide command and control systems linking the whole network of radars, control centres and operational bases. When operational, in about

1986, the new set-up will render visible all air activity in any direction within 1,000 miles of the United Kingdom, and will be able to analyse vast amounts of information and respond to it with great speed and flexibility.

The biggest uncertainty con-fronting the RAF is whether it will have a new agile fighter by the middle 1990s. The service is in no doubt about its need for such an aircraft, and indeed it originally said it was needed by 988, though an in-service date of 1995 is now contemplated.

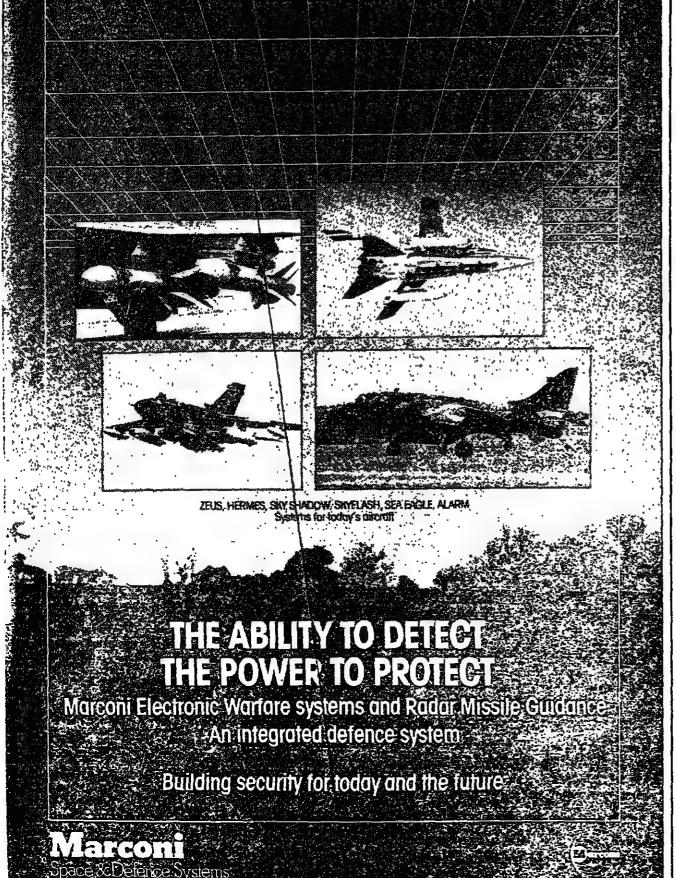

DATA

versions is regarded as an excellent aircraft it was not designed to be highly agile or to be able to mix-it with aircraft that are for ground support.

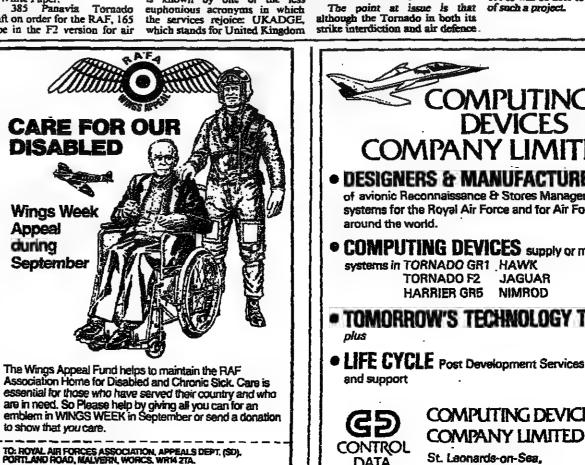

The government has signed a contract with British Aerospace to produce a technology demonstrator aircraft which is expected to fly in 1986. At the same time, British Aerospace is involved in negotiations Prench and Italian interests to mount a multinational programme for an agile combat

The uncertainty arises becaurefused to commit itself to the principle of acquiring a new agile committed itself to the British Aerospace project beyond the building of the technology dem-

Two factors are pulling in opposite directions. British Aero-space knows that it will require a programme of providing the RAF with agile aircraft in the early 1990s, to offset the completion of other hand there is some dispute about the need for such an aircraft, and some doubt whether the defence budget in the early

At the time of writing, the RAF

The Service operates the equivalent of a medium-sized airline from its bases at Lyncham and Brize Norton, with 13 BAc VC 10 airliners carrying service-men and their families all over the world, and 60 Lockheed Hercules engaged on tasks ranging from in-flight refuelling to carrying stores and dropping para-troops. Thirty of the Hercules are being "stretched" into the longerbody C.3 version so that they can

carry bigger loads.
In addition to the two serving with the Royal flight, the RAF has a small fleet of Andovers — essentially the BAE HS 748 airliner - which it uses as transports and for the calibration of ground electronics aids.

Several aircraft types which many would imagine went out of service a long time ago are still operated by the RAF. They include the Canberra (entered service, 1951), the Hunter (1954), the Devon (1948), and the Pembroke (1953).

A number of versions of the including the photographic re-connaissance PR.9, and the T.17 electronics warfare aircraft which and manufacturing accord, tests Britain's air defences by also produced the smaller Gazelle cluttering the radars and issuing

false commands to fighters.

About 60 Hunters remain on the inventory, with their main role that of training. Devons are used as communications aircraft, operating mainly from RAF Northolt, London, while the Pembrokes do a similar task based in Germany. The RAF has announced that it is to buy four BAe 125 executive jets, known in the Service as Dominies, and these are expected to be the first of a number which will eventually replace the Devons and Pem-

THE FALKLANDS

Beating distance as well as the enemy

of the glory was scooped up by the Royal Navy and the szmy. For weeks they basked in the cheers of

The RAF was meanwhile trying to explain why its most eye-catching contribution to the re-con-quest of the islands - the bombing of Port Stanley article, which tony briefly denied its use to the Argentines - was more than a maninally relevant alternot to get

In fact the RAF's contribution was always more important than it seemed at the time, and has ince become absolutely central to British's continued control of the

If the raids on Stanley sirport were more a tribute to the RAF's technical resourcefniness than to has since been evidence that the the blue made the Argentines stop and think. And what they though was that if the RAF could reach Port Stanley it could probably also reach Argentina. As a result, redeployed their aircraft more out of harm's way.

RAF Harriers and their crew who rapidly had to adapt to operating from ships, shared in

But the recepture of the Falklands was as much a triumph of logistics as a feat of arms. As critical as defeating the enemy was defeating the distance ~ 4,000 miles to Ascension, the nearest land base. And here the RAF was

notice, the task force was inevitably only semi-equipped. Ascension, it has been said, briefly became the busiest airport arms and equipment for the navy to pick up on their long voyage

south. In the weeks before and immediately after the recapture of the Falklands, RAF transport aircraft carried 5,000 tons of equipment and 5,000 men to

short take off Harrier's flew out to. augment the Royal Navy's aircraft with the task force. Those that flew direct from Britain to Ascession Island needed about eight air-to-air refuellings; those that went on to land on HIMS Hermes needed a further eight refuellings. The Vulcan bombing raids on Port Stanley are said to have required the use of 10 air

Although the RAF was already increasing its air-to-air refuelling capacity, demands for this facility in the Falklands war far exceeded anything then available. This led to brilliant improvization by the RAF, and by industry. Vulcan and Hercules aircraft were rapidly

More than 600 air-torefuellings were carried out in this period and only six refuelling attempts finied. All aircraft got back to base, though in one instance only after an embarrassing diversion to Brazil.

converted into air tankers and a

system of air-to-air refuelling for

Nimrod maritime patrol aircraft was devised and installed in five

Since the war the RAF has maintained the "air bridge" from Ascension to the Falklands, using Hercules, which are still depen-

mt on air-to-air refuelling.

making about five flights a week

The RAF is concerned that this

which allows small margin for error, may be taken for granted,

The most important watershed since the re-capture of the Falklands was the completion last October of extensions to the runway at Port Stanley. This allowed RAF high performance, supersonic Phantom fighters to be based there and thus give the islands better air cover than they had enjoyed before or during the

The arrival of these aircraft and the installation this year of new radar has greatly improved the Falklands' defences. The presence of the Phantoms, moreover, has reduced the strain on the navv's resources by removing the carrier in the South Atlantic.

ROYAL AIR FORCE

RECRUITING

High-tech, but square-bashing comes first

With the introduction into the year, so placing strains on both inventory of increasingly com- instructors and accommoinventory of increasingly complex aircraft, aircraft systems, engines and weapons in recent ears, the RAF has become a million has resulted in it being high-technology service. It is not surprising that the annual cost of training the men who fly the aircraft, and the men and women who keep them airborne, comes to £200m.

complete master of a jet such as a Tornado, Phantom, Buccaneer or Lightning will cost up to £2m. Sixty per cent of all RAF tradesmen are in engineering trades, where the learning process is lengthy and expens-

The training task never s and as many as 15,000 of the 90,000 in the RAF pass through one or other of the 2,000 courses which can be mounted each year at 12 major training establishments or smaller schools at operational bases.

The Service is very conscious of the size of its training bill, which encompasses not only in-house" courses but those with the other Services, in universities and polytechn's and in industry. The n'd, teaching methods, and teaching aids are constantly monitored to ensure that they are relevant to changing operational tasks.

The training machine also has to be extremely flexible for the annual quota of new entrants to the Service varies considerably. It was 3,000 in 1982 but has risen to 8,000 this

and airwomen into most of the 128 trades in the RAF, but Teaching a pilot to be the direct-entry technicians require two O levels at grade C or equivalent, and engineering apprentices require four O levels. Both groups of entrants are expected to have a mathematics or science subject among their results. In recruiting ground-based officers the Service aims for one-third

dation. A national unemployment level of more than three

easier to fill the quota, and in

No academic qualifications are required for entry by airmen

recruiters being more selective.

university graduates, but a minimum of five C-grade O-levels is accepted for some Generations of former airmen will be interested to know that the six-week initial training course for airmen and airwomen includes the traditional "square-bashing", in addition to lectures on RAF history, standard of dress, organization,

hygiene, and discipline. On completion of this initiation the recruit joins a course where he or she is taught the trade chosen on joining. Such courses may last a few months to more than a year, although in the case of appre tices learning esoteric aircraft, engine, and electronics trades, the courses stretch over three

Then follows pre-employ-ment training on the specific equipment which will be used either at an operational station, or at a basic-training school, or occasionally in industry.

Rankers are assessed potential promotion to NCOs officers from the day they join (20 per cent of all engineer officers, and 5 per cent of all aircrew come from the ranks). Those selected are sent for command and management training to prepare them for increased responsibilities. courses are intensive and last for up to three weeks.

Initial training for ground-based officers is done at the RAF College, Cranwell, where the standard course lasts 18 weeks with emphasis on leaderthin and general administrative skills. The newcomers then go on to specialized training on their chosen areas of employment, and those whose posts require second-degree qualifi-cations, such as officers in the

Battle of Britain The task facing the Royal Air Force today is as daunting as it ever was: It is our brief, as watchdogs over Britain, to demonstrate to would be Britain, to demonstrate to would be

capable of holding our own.

We are also charged, in our partnership with NATO, with preserving the status quo in Western Europe. To achieve these aims calls for ceaseless vigilance and the ability to mount a decisive response against those who would threaten us and our allies.

In human terms, it calls for an uncompromising attitude from all those who elect to serve with the RAF.

We describe it as commitment. A word that covers determination, pride and, let's not be ashamed of it, patriotism.

If you are attracted by a career that involves a sense of purpose, read on. And if you're fascinated by the complexities of military aviation, even better

Because life in the RAF revolves around the aircraft. And we need a whole range of skills both in the air and on the ground.

Perhaps you have the innate skills of reflex and anticipation needed to fly our aircraft. Or the administrative abilities to keep our stations running.

Perhaps you have the engineering and scientific skills needed to keep our aircraft flying. Or the ability to communicate them as an Education and Training Officer

In the air and on the ground the world's most advanced technology will be yours to handle. And we need, if we are to maintain our supremacy to improve it still further

It's a challenge to your imagination and inventiveness. It's an opportunity to express your talents to the full.

And a polite way of saying that we'll stretch you to the limit.

In return we offer you the chance to gain

invaluable experience and responsibility at an early age.

Salaries compare favourably with civilian careers.

Travel, too, is one of the attractions. Europe, the Mediterranean, NATO exercises or exchange visits can all broaden your horizons.

And, in marked contrast to the demands of the day (and sometimes night), the social life is informal and unstuffy, with, of course, excellent sports facilities.

But please don't let our financial and fringe benefits be the deciding factor in applying for a commission. We hope you're looking beyond that.

And that you're just as interested in what you can give to the RAF as what you can get from it.

What now?

Ideally you should have a degree or 'A' levels or a relevant professional qualification. These are mandatory for some branches but for others five acceptable GCE 'O' levels at grade C or equivalent, including English Language and Maths, are a minimum.

If you think you fit the bill, call in at any RAF Careers Information Office or write to Group Captain J. F. Boon, FBIM, RAF, at RAF Officer Careers (09/00/01), London Road, Stanmore. Middlesex HA7 4PZ, asking for further details of Officer careers currently available. Please include date of birth and present and/or intended qualifications Formal application must be made in the UK.

Preparing for that first flight

airmen, mentioned earlier, and then at various stages of their careers officers of all branches who are considered to have demonstrated high potential are selected for progressive command and staff training. This includes courses at the RAF Staff College, Bracknell, Joint staff courses at Greenwich, and at the Royal College of Defence well provides a series of courses in aspects of air warfare for officers of the RAF and the Nato air forces and these are also attended by officers from

the Army and the Royal Navy. Entrants to the RAF who aspire to being aircrew have first to attend the selection centre at Biggin Hill, the RAF station which achieved fame as a Battle of Britain fighter base. Academic, aptitude and medical tests there weed out no fewer than 85 per cent of the applicants. There follows an 18course at Cranwell, where the success rate is around 85 per cent (senior NCO aircrew have a separate course, with an 80 per cent success rate).

Engineering and education 30 per cent fail to make the grade branches, are provided with in their original choice of branch, in their original choice of branch, in their original choice of branch. advanced professional training although many then re-muster in alternative aircrew categories or given along the lines of that for as ground-based officers. The

> Basic and advanced flying at training schools

RAF has three basic flying destined to fly fast jets complete a at the Royal College of Defence 150-hour course on Jet Provosts, Studies in London, RAF Cran-although for graduate entrants who have flown with a university air souldron the course is reduced to 128 hours. Those going on to transport aircraft or helicopters complete 93 and 75 hours respectively before moving on to

specialist training.
At advanced flying training which are the next step, fast-iet pilots complete a 75-hour course on the Hawk, multi-engine pilots fly 45 hours on the Jetstream, and helicopter pilots put in 142 hours on the Gazelle and Wessex.

In addition to its conventional aircraft the RAF "flies" a number eek initial officer training of types which never leave the ground. These are the simulators in which aircrew carry out part of their training, and two of the latest are those installed by Rediffusion Simulation to rep-Flying training courses them resent the Tornado swing-follow. It may seem that there is plenty of room in the vast blue sky. But the ever-increasing popularity of air travel places still higher demands on the maintenance of intenational air traffic safety. As an advnowledged world leader In SSR (Secondary Surveillance Radar), Cossor Electronics assists air traffic controllers by providing the vital systems which identify the aircraft positively, track them precisely, and report their positions accurately. In fact, when it comes to iminding air traffic, our experient has no equal.

We were a pioneer in the introduction of SSR and have continually introduced new developments to keep ahead of the requirements of growing traffic densities.

Our latest system, Monopulse SSR, overcomes the

many problems of signal interference effects caused by crowded skies, enabling the controller and pilot to make better use of the airspace with more efficient flight paths and a consequent saving in fuel.

The Civil Aviation Authority was the first in the world to recognise the advantages of Monopulse SSR. 22 Cossor systems are currently being installed throughout the UK. Overseas, Saudi Arabia is the first of what we confidently expect to be many customers to follow their example:

To complete the Monopulse system, Cossor has introduced a new antenna, its large vertical aperture construction will improve radar coverage and overcome ground reflection effects.

Cossor engineers are also dosely involved in the development of the SSR system beyond Monopulse, known as Mode S. This will have, among other advantages, a data-link capability, enabling digital information to be transmitted between the pilot and the ground.

Cossor built and operated the trials station together with the airborne units for the CAA and is closely involved in the international activities to ratify the new system.

(All UK Monopulse SSR stations are designed for ready updating to full Mode S operation)

auction plan - the first of its kind in the North Sea - with great care. But privately they were letting it be known that approval was by no means a foregone conclusion. especially if it appeared that other oil companies might follow BP's example and sell some of their North Sea interests to rationalize their tax position.

The crux of the BP deal is that allows them to sell part of their highly taxed Forties production to other companies which can use the field's mature production to offset against exploration and appraisal drilling expenses in other parts of the North Sea.

The precise impact of the deal on Government revenues will depend on which companies bid. Sources close to BP said that the loss of revenue was likely to be only between £80m and £140m over a period of three years.

The stockbroker Scott Goff Hancock said that the loss of revenue would be no more than £165m in a full year - which compared with total annual North Sea oil revenues of more than £8.000m.

Senior BP executives are known however to be aware of the sensitive political implications of the proposed deal. Unconfirmed reports said that Mr Peter Walker, Secretary of State for Energy was unhappy to find the BP proposal so abruptly planted on his desk when he returned from holiday earlier this week.

It is accepted in Whitehall however that any short-term loss of revenues is likely to be more than compensated for in the longer term by companies explor-ing for and developing new fields as a result of the tax write-offs they acquire from BP by purchas-

ing part of the Forties field. Although a great number of companies are expected to be interested in the BP offer, there was considerable doubt in the City and the oil industry last night whether enough buyers with suitable favourable tax positions could be found to buy the entire 10 per cent of Forties that BP is

putting up for auction. BP says that no buyer will be allowed to buy more than two per cent of the field. Another two per cent is being sold directly to two unnamed oil companies

British companies have been discouraged by Florida's unitary taxation laws and there is little point in encouraging British businessmen to invest according to the London chamber of commerce and industry which yesterday cancelled a trade

Monopolies referral for £67m GKN bid

By Derek Pain, City Correspondent

AE (the old Associated Engineering) was yesterday referred to the referred to Commission circuto the dismay of GNK then AE.

Mr Cecil Parkinson, Trade and Wednesday. Industry Minister, accepted the advice of Sir Gordon Borrie, Director General of Fair Trading. This is the second major takeover offer he has sent to the Commission since becoming Trade Minister. The earlier one was the £300m Trafalgar House

offer for the P&O shipping GKN said it "regretted" Mr Parkinson's decision. The merger would have presented a "significant opportunity to restructure an important section of the UK automotive components industry to meet international compe-

Although, under the terms of the offer, the GKN bid lapsed on the referral the industrial gient intends to argue its case before the AE would not comment on Mr

Parkinson's decision but said it would "cooperate fully" with the Commission. Its directors were yesterday locked in a board meeting. Mr John Collyear, the chair-

man, and his board had initially rejected the GKN offer, But a Commis higher bid tempted them into months,

The £67m takeover bid by what appeared to be reluctant

Rumours that the bid would be Monopolies Commission - more lated in the City this week and were reported in The Times on

> The Stock Exchange making a routine preliminary inquiry into dealings in AE's before yesterday's announcement.

On the stock market, GKN shares rose 2p to 177p yesterday and AE's fell 8p to 50p. GKN looked upon the merger as an important move in shaking

up the car components industry. Job losses were regarded by industry observers as inevitable if the bid had succeeded and GKN had attempted to streamline the industry. Stockbrokers Laurence, Prust and Co., representing around 5 per cent of AE's shares, strongly

opposed the offer. Mr Patrick Evershed, a partner, believes that after AE's heavy spending on plant and research, the company should start to make impressive headway.

He maintained that even the higher GKN offer "seriously undervalued" AE. The Laurence, Prust thinking is

that the AE profits revival will be showing through by the time the swiftly to approve their Commission reports in six

City Editor's Comment

American Janus in world finance

Treasury officials and central bankers are in for a busy time. On next week's agenda at the central governors' meeting at the Bank for International Settlements and at the meeting of the Group of Ten industrial countries deputies later in the week is the question of finance for both the International Monetary Fund and for Brazil, its biggest

Governors and officials will be discussing a \$3bn bridging loan from G10 countries for the IMF to cover its commitments gap the difference between its resources and what it has promised to borrowers,

curtomer.

Meanwhile, talks will continue on the \$11bn (£7.3m) rescue plan for Brazil. Governments are proposing that commercial banks provide \$7bn of this and they in effect provide \$4bn towards closing Brazil's external financing gap by rescheduling official loan payments and guaranteeing new trade credits which banks would have to

The intriguing political aspect to these two sets of talks is the position of the US. It is firmly taking the lead in the Brazilian rescue, spurred on both by concern about the financial implications of Brazil going under, but perhaps more importantly by the foreign policy implications.

For other western countries such as Britain, France, Germany and Japan who would all have to play significant roles in the rescue, Brazil has far less strategic importance.

At the end of the day, worries about their own banking systems will problably tip the balance but it may take a fair amount of cajoling by the Americans before a package falls firmly into place.

When it comes to the IMF, however, the boot may be on the other foot. Most of the big industrialized nations have moved

quota increase.

The US, however has dragged its feet and while opposition in Congress is the excuse, there are many who feel that the Adminstration has not done its best to get the quota increase through Congress.

When it comes to a \$3bn bridging loan for the IMF it could be that the US will again prove a problem. It may, for instance, feel agreeing to help with a bridging loan could further hinder getting the IMF quota rise through Con-gress and delay on the bridging loan is the best

Another possibility which has been floated is that the US would not contribute to the IMF bridging loan, but instead take a bigger share of government support for

The reasoning is that Congressmen can see a direct link between American jobs and the solvency of Brazil although they cannot grasp a link between jobs at ome and money for the

As far as the Brazilian problem itself is concerned, the clock is ticking away and commercial bankers appear to be increasingly worried at the lack of movement on the Brazilian side. A new letter of intent with the IMF has still not been signed.

Even when it is, there will be some boxing to come between commercial banks and governments. The banks say they cannot raise the \$7bn which governments say they should. Indeed, bankers say that \$6bn of new bank loan may well prove impossible.

Furthermore, the banks still want governments to provide finance which matches the likely maturities of the new loans they will raise, and they also want government help in the form of straight balance of payments finance.

COMPANY NEWS IN BRIEF

Bunzl reaps dividend from US expansion

Pretax profit £7.8m (5m) Stated earnings 15.6p (12.4p) Turnover £228m (£173m) Net interim dividend 5p (4.5p) Share price 368p same yield

Bunzl is already beginning to reap some dividend from its expansion into the US and away from its traditional dependence on manufacture of cigarette

These days the group is much better described as a paper, packaging and distribution company after a series of acquisitions this year which have added seven US distribution companies and Transparent Paper, the loss-making British cellulose company, to the Bunzl stable.

The company credits the new US businesses with much of the 30 per cent improvement in interim pretax profits to £7.9m from a turnover which rose by 32 per cent to £228m. The board gave some indication of its confidence in the future by recommending that the dividend should be increased by 11 per cent

After the aggressive acquisition policy, which has cost £30m this year. Bunzl is expecting a contribution to group profits comfortably ahead of the cost of the associated borrowings. About 45 per cent of the cost of

the acquisitions has been deferred and made conditional on future levels of profits, which are benefitting from a sustained upturn in the US economy.

During the interim period. there was a substantial improvement in results from the Filtrona division where the British filter side made substantial progress after its losses last year, with strong improvement also

SEP OCT NOV DEC JAN FEB MAR APR MAY JUN JUL AUG

in particular, helped contribute to the £1.64m profits achieved by

BUNZL

Share price

320 -

Bunzl is still looking for further acquisitions despite the activity so far this year and the failure of the £16m bid for Bernrose, the

Derby security printer.

Although the group is making strong progress, there are doubts about the dependence on individual entrepreneurs within the organization for profit achievement. particularly on the US

The first half British cigarette filters business is also unlikely to peform as strongly for the rest of the year and pretax profits of £16m at the final stage are a reasonable expectation. The determination of the board to expand quickly also points to a rights issue if the shares remain strong for the rest of the year.

Delta Group

A recent burst of activity in the shares notwithstanding. Delta has scarcely aroused excitement for years. Shareholders upset by the March dividend cut may be slightly mollified by the 150 per cent increase in interior profits, but appearances can be

traditionally important markets of Australian and southern Africa had not been depressed, the figures might have been distinctly But the fact remains that margins

in Britain are still under considerable pressure. Turnover actually fell by £7m to £252m, largely because of the lower level of activity in the southern hemisphere, and trading profit rose from £10.6m to £16.4m. On this basis, Delta will make stripped out, the rise is two-thirds

have tried hard to go up market.

To be fair, these latest figures point to a considerable improve-

ment in Britain, to which the

company has devoted much

management time and where

heavy rationalization (closures

and redundancies) have undoubt-

edly been effective. If the

about £20m pretax for the full year, possibly more if South Africa and Australia improve. Nevertheless, there is little for shareholders to anticipate, and the stock looks set to continue being an institutional preserve.

Hepworth Ceramic

Hepworth Ceramic directors appear in front of the monopolies Commission today for the 1st time before the November's pronouncemnet in late November on whether they are allowed to renew their takeover bid for Steetley, the facing brick and aggregates group, they will be fortified by a some profits increase.

It is already believed in the City that the commission will accept Hepworth's case that Britain's refractories insustry is in need of

If-year to 30.6.83 Pretax profic £15m (£12.1m) Stated earnings 5.1p (4.0p) Turnover £168m (£152.4m) Net interim dividend 2.5p (2.25p Share price 136p down 7p 5.5%

ing the dominant interests of the two groups in the industry will therefore do no harm.

This line of thinking is backed up by the revelation - so far unconfirmed by Steetley - that Steetley had agreed to merge its refractories business with that of Hepworth before receiving the unwanted £114m takeover bid

If Hepworth gets the go-shead, it will have to bid considerably than it did last time. Steetley's shares are now trading at around 225p against the 187p at which the May bid had valued

The battle will hinge on Hepworth's claim that it can make Steetley's assets work much better than the present management. Hepworth has certainly managed to set its own house in order over the last three years as yesterday's half-year results indi-

Pretax profits are up 24 per cent from £12.1m to £15m and look set to grow by more -possibly as much as 30 per cent -during the second half. The group's efforts in reducing its cost base have combined with heavy investment in new kiln tech-nology, higher sales to the booming housebuilding industry, and loss elimination in the United States to take the group off the profits plateau of the last three

So tight has Hepworth's cost control become that the present upturn in its clay pipe division is feeding virtually straight through into profits. The new "roler kilns" are achieving output group has as a consequence cut its planned commissioning of a further three "foller kilps" early next year to

ironically, this success has limited the company's ability to force through price increases, but does not seem to have the present rise profitability.

Wm Collins

alf-year 3.7.83 Pretax profit £2.04m (£1.25m) Stated earnings 10.5p (7.1p) Turnover 243.1 (235.7m) Net interim dividend 3.5p (3.00p) Share price 341p. Yield 3.8%

William Collins yesterday rewarded shareholders for their support of the book publishing, manufacturing and distribution company in fighting off an unwanted bid from News International in the summer of 1981. In doing so, it also paid a bandsome cheque to News

International, Mr Rupert Mur-doch's UK newspaper group which owns The Times, and retains a 41.68 per cent stake in Collins

The interim is raised 16 per cent to 3.5p and is paid on a 63 per cent increase in pretax profits. The board seems confident that this rate of increase will continue through the second half
Collins sales rose 20 per cent
from £35.6m to £43m. At the

pretax level, profits came out at just over £2m against £1.2m last In the opening half, Collins

benefitted from a three months' contribution from Granada Pubishing for which Collins paid £8.7m last March. However, a solid performance

from its traditional areas has been boosted by a significant contri-bution from the Glasgow-based manufacturing operations. The workings there has been reduced from 2,500 to 1,400 over recent years and productivity is hitting

The stock market welcomed the profits news and ordinary shares rose by 8p to 341p while the "A" shares gained 15p to 311p.
Around 65 per cent of Collins shares remain in three hands. News International's purchase of either of the two other significant blocks would give it control.

LONDON'GOLD FUTURES MARKET

Norcros bid was 'ill conceived'

Norcros had made an "ill-conzived" attempt to cash in on UBM's growth, according to Mr Allen Sheppard, UBM's chair-

Mr Sheppard also alleges in UBM's formal defence document against the unwanted £64m bid that Norcros was unable to deal with the losses of the defunct Hygena kitchen furniture division in spite of promises made every year for six years. The brand name was bought by MFI, which o has since successfully used it on

its own products.

But the document contains no profits forecast nor interim statement. Mr Sheppard has promised a substantial but unspecified increase in dividends this year. The company has paid as much as 5.5p in the past and the City expects at least that amount for this year with likely

profits of £10m. Yesterday, Hill Samuel, Norcros' advisers said: "There are two important omissions - there is no profits forecast nor interim statement. They highlight the dividend but do not quantify it. They are rude about Hygena - but if that is all they can criticize, we cannot be at all bad.

But the City believes that the real battle is still to come and that the two sides are merely squaring up. It expects that Norcros will make a higher bid.

The likely strategy is a an improved offer, though still low, to draw a profits forecast from UBM followed by a final offer which it hopes shareholders will accept. The first closing date of the current offer is next Wednesday, but this could be extended.

 West Coast Hidgs, the Australian mining explorer, is close to an agreement which could bring in a pay for proving up its gold deposit at an abandoned mine, Donnybrook, Western Australia if the feasibility study is successful, Donnybrook is said to have "the potential to be the biggest gold

Priderial Cornoration

Interim Results

The estimated total profit after tax for the first half of 1983 was £8.3m higher at £28.3m. Profits from long-term business and the investment income on shareholders' funds were both higher. There was a reduced trading loss on general insurance business, principally due to a continuation into 1983 of the favourable experience in Canada in the second half of 1982, some recovery from the weather-affected results in the UK, and an increase in investment income. The general insurance underwriting results from Mercantile & General, the group's specialist reinsurer, continue to be unsatisfactory.

The Directors have declared an interim dividend of 5.5p per share (1982 5.0p) payable on 17 November to shareholders on the Register at close of business on 20 October.

Unaudited Estimated Results		Half year ended 30 June 1983 1982		Year 1982

In the United Kingdom the underwriting loss on domestic property was lower at £4.9m (1982 £8.4m including over £7m from the bad weather). Motor premium rates were reduced in February and as expected the underwriting loss was higher at £5.1m (1982 £3.5m). The results include exceptional costs of over £3m arising from the previously announced general insurance business reorganisation in the UK, and further such costs

will arise in the second half. In Canada, following the marked improvement in the results in the second half of 1982, there was a trading profit of £10.2m, but intense competition for business has led to reductions in premium rates which will inevitably affect profitability in the second half. At Mercantile & General, underwriting results continue to give cause for concern, particularly in the proportional and marine accounts. The benefit to be expected from the more selective approach to underwriting will not appear in reported results for some time.

Investment Income investment income on general insurance and shareholders' funds combined increased by 19% to £43.5m.

Schroders

Interim Statement

8th September, 1982

The Directors of Schroders Public Limited Company have resolved to pay an interim dividend for the year ending 31st December, 1983 of 3p per share on the Ordinary Shares of £1 each (fully paid). This dividend is the same as the interim dividend paid in respect of the year ended 31st December, 1982.

The dividend will be payable on 27th October, 1983 to shareholders whose names appear in the Register of Members of the Company as at 29th September, 1983.

The profits of the Schroder Group for the first six months of 1983 were higher than in the same period of the previous year. Activity throughout the Group was at a high level with most parts of the business benefiting from generally favourable trading conditions.

120 Cheapside, London, EC2V 6DS.

53 weeks ended 30th April £'000 £'000 88.016 91,973 Profit/(Loss) before taxation* (45Z) 507 Profit before extraordinary items 182 608 Extraordinary items less taxation 1,743 2.919 Earnings per ordinary share 0.66pDividend per ordinary share Includez surplus on property disposals 2973,000 (1982 2292,000)

 It has proved impossible to eliminate trading losses at Bournes'. The store has now ceased to trade and the lease is being surrendered to the freeholders for a cash sum of £400,000 payable on 29th September 1983. The profit and loss account includes an extraordinary charge of £1,743,000 which largely represents the estimated costs of closure of Bournes' to the extent not previously provided, and provision for trading losses expected to be incurred from 30th April 1983 to the date of closure of the store, after taking account of the cash sum receivable on the surrender of

 It is the Board's view that your company's prospects are fundamentally improved now that 'Bournes' has been sold.
 There are signs of improvement in trading conditions particularly in the retail sector. If this improvement continues there is every reason to expect better results from your company in the future, which will enable the company to resume dividend payments on the ordinary shares in keeping with those paid in the past.

The Group's balance sheet remains strong and despite an increase in borrowing, is relatively lightly geared. Ben Raven - Chairman

عكدا من رلامل

APPOINTMENTS

C. E. Heath group board changes

C. E. Heath (International): Mr D. H. Newton is now chairman. Mr N. J. Chamberlain and Mr J. Percy-Davis are now joint manag-ing directors. Mr J. J. Burton has resigned from the board of C. E. Heath pic to undertake a consultancy role in which he will develop the group's broking interests outside the United Kingdom. He has also resigned from the board of C. E. Heath (Insurance Broking) and from the board and chairmanship of C. E.

Co-operative Wholesale Society: Mr Alan Prescott has been named as financial controller to succeed Mr Quentin Russell on his retirement this month.

Heath (International).

Nettingham Building Society: Lord Chalfont has been appointed president,

C.R.S.: Mr William Farrow chief executive of United Co-Operatives, will be chief executive in succession to Mr R. A. Lee. Mr Farrow will take office at

Norwich Brewery: Mr Jan Kirkhope has become production and distribution director.

Macarthys Pharmaceuticals: Mr Barrie Thompson, managing director of Farillon, will take up the newly-created post of managment services director of Macarthys Ltd on October I. Mr John Mori will become managing director of Farrillon. He will be replaced as marketing director of Macarthys by Mr Jim Canning.

St Martins Property Corporation: Mr Brian Cann (formerly Joint Chief executive) is now managing director, Mr John Stringer (also formerly joint chief executive) becomes chief Executive (corporate), Mr Malcoim Savage (previously executive director/chief surveyor) is promoted to chief executive (property), Mr Norman Hogben has been made executive director-'chief surveyor, Mr Peter Kershaw has been appointed executive director/London Bridge City and Mr Glyn Lambert, has become exentive director/Europe. Mr Christopher Bellhouse (property controller), Mr Ian Mitchell group accountant) and Mr distortions," It is nare to distortions, the Bank as an agent of imperialism.

Michael Prest looks at arguments against large-scale intervention

Third World theories face a counter-revolution

development, a pet project of Mrs

Judith Hart, when she was Minister for Overseas Develop-

ment in the last Labour govern-

The examples can be multi-

plied internationally. The funding

crisis of the International Devel-opment Association, the con-

pessionary loan arm of the World

Bank, has arisen partly from suspicions on Capitol Hill that aid

money is not well spent. But this

change - or the strengthening of

earlier attitudes - has not occurred in a theoretical vacuum.

The first strand in the intellec-

tual counter-revolution is the

reassertion of pre-Keynsian ideas.

nonetarists, supply-siders, and

the other conervative thinkers -

be expected that

ment, has virtually ceased

For every practical crisis there is a crisis of ideas, and so it is in the Third World. While the problems of poverty, shiring and indebtedness have commanded international attention, behind the scenes theories about devel opment are threatened with counter-revolution.

The object of the attack is th post-war consensus which, broad ly speaking, has favoured aid large-scale intervention in de veloping countries, and manage trade as agents of growth. The outcome could be a radica change in the development strategies of developed and developing countries to smalle

Stripped to its essentials, the debate is whether the population of many Third World countries would have been better off if their governments had allowed relative prices to allocate resources rathe than trying to mould the economy by extensive state intervention.

A secondary theme is the degree to which the allegedly state-control approach of many developing country governments from a body of economic thinking which has grown up since the Second World War and may generally be called "developme

At first sight this is just another abstract squabble between the advocates and opponents of markets. But the issue goes deeper. First, the diverse sources followed by developing country governments - ranging from predictable conservative opinion. through august institutions such as the World Bank, to the renment should not be dismissed lightly.

Secondly, the critical case, while springing partly from the disintegration in the West of the Keynesian consensus which undoubtedly influenced develop-ment thinking, also owes much to empirical evidence accumulated over many years. For example, the World Bank concludes with characteristic care in its World ment Report 1983 that: "Price reforms are needed so all economies can conform better to their comparative advantage, keep wages in line with pro-ductivity, and remove price distortions," It is hard to dismiss

The crucial point here is that Third World governments are more vulnerable to pressure for policy changes, whether from multilateral bodies or from individual governments, than they have been in the whole post-

colonial period. The experience of Brazil, Mexico and other heavily indebted countries demonstrates. moreover, that this pressure will No doubt the willingness to

exploit the weakness of Third World countries also stems from a gradual loss of guilt in the West about the colonial era. Moreover, conservative administrations in Britain and the United States have played their part in altering

in Britain, for example, aid budgets have been out and official spending on education about

undoubtedly characterize many Third World governments. But a more cogent tour

overblown bureaucracies which

d'horizon has been published by the right-wing Institute of Economic Affairs in London", It is all the more powerful for not advancing a crude laissez-faire approach. Put as an elegant polemic, the argument is that several influential postwar thinkers such as Arthur Lewis, Ragnar Nurske, and Gunnar Myrdal founded development economics on the assumption that the neoclassical emphasis on relative prices was inappropriate to the developing world,

Their reasons for rejecting relatively open economies as the path to growth were legion: left to the mercies of the market. developing countries would suffer petual foreign shortages, mand for commodities would be insufficient to prevent adverse terms of trade; the technological lead in metropolitan countries would stille infant Third World industries; and foreign capital, whether portfolio investment or even aid, was inherently exploita-

The remedies are familiar. Trade barriers were erected to protect industries and exchancontrols introduced to conserve precious foreign currency. Commodity agreements were insti-tuted and governments demanded control over investment. Indeed, the whole apparatus, it is maintained, inescapably implied

Unfortunately, big government was the one thing developing countries could not supply. The shortages of skilled labour, the poor infrastructure, and lack of an administrative culture affected governments as much as business a point easily overlooked.

The empirical evidence, the second strand is hard to ignore. countries which adopted a relatively open economy generally fared best. The fact that the fastest growing countries started from different bases and are spread across several continents suggests that their colonial experiences, culture and history are not the most important factors. The not all of whose ideas are old - evidence seems to be that even would oppose the state trading supposedly benighted peasants

exploit the compacative advantage of different prices.

The national empirical ev dence has been supported by studies of particular economic sectors. For some years, the World Bank and other agencies have quietly inveighed against food prices which discriminate against farmers in favour of urban consumers, or against over-valued exchange rates, or state corporations which are unresponsive to producers and consumers The table illustrates the relation ship between price distortion and

Perhaps the most telling attacks on the development orthodoxy, however, have come from within developing countries themselves, the third strand. Delivering the Fourth Harry G. Johnson Memorial Lecture in July, Mr Gob keng Swee, First Deputy Prime Minister of Singapore, said: "The LDC strategy of achieving growth through import substitution industrialization encourages corrup-tion . . . Domestic markets which have to be protected by shut-out tariffs are small in relation to plant capacity in most manufac turing processes. This usually leads to the establishment of monopolies since one enterprize can often serve market demand."

Yet it is not a straight fight between laissez-faire and state cash. Rather, the greatest strength of the new criticism of develop recognizes the impossibility of perfect competition. The IEA welfare economics - that branch of economics which analyses the optimum way of achieving a desired end. It very reasonably points out that the welfare approach does not prejudge th issue: intervention may be the answer, but equally doing nothing

In practice, the most obvious onsequence of the new thinking is simply the idea that aid or assistance is less valuable if developing countries do not put their own house in order. This attitude has undermined for instance, the call by IDA for extra lending to sub-Saharan Africa. The counter-revolution has already scored small victories; it may not march on to greater ones.

Decpak Lal: The Poverty of Development Economics: IE4;

Industrial notebook

Disaster lurking in geographical aid

Group - later to become Curysler UK and now the French-owned Talbot company invited a group of journalists to partake of liquid refreshments aboard a railway train in the middle of Coventry. The idea was to crow about a new deal that had been struck with British Rail to operate a special rail link between Coventry and the new showpiece car factory at Linwood in Scotland.

Marie Control of the Control of the

The company was coy about the financial aspects of the arrangement but was at pains to describe the virtues of the rapid two-way link which would ferry Coventry-made bits and pieces all the way to south-west Glasgow. To many, however, the idea seemed ludicrous at the time and, with hindsight, it must have played a significant part in the downfall of the company.

Not that Rootes could be blamed for trying to recoup some Linwood operation: the company to make the best of a piece of regional policy madness that drove it against its better judgment to Scotland when it would have been more sensible

to stay in the Midlands.

Now, the wheel of fate has turned full circle and it is the West Midlands itself, once the metal bashers' Shangrila, that is in danger of being designated an assisted area.

No region, particularly the West Midlands with its history of independence and prosperty wants to be associated with charity. Regional development aid has the stigma that sticks to the handout, and creating a so-called intermediate area centred on the West Midlands would, in many people's views, be a

But this appears to be one of the chief remedies for the region's ills now being considered by Mr Norman Lamout, the Industry Minister, it has emerged from the long-awaited review of regional policy ordered by the Government last year and is apparently giving rise to much opposition both among other ministers and in the West Midiana.

maintain, is that the Government will once again fall into the trup of providing aid on a non-selective geographical basis. The Linwood factory failed, and placed in jeopardy the British Steel Corporation's Ravenscraig works, because it was too far

motor industry output.

The Roots experience is unfortunately, not unique and now, simply to pour money into a region in a non-discretionary fashion must, during a recession. be foolish.

Who would be attracted to the West Midlands if it got downand-out status? Some companies bribed into the wildernesses in the past would return to the discretionary 15 per cent grants became available. But that would do little to help in the long-term creation of a new industrial attructure.

The regional policy review. begun last year by a team beaded by Mr Michael Quinlan. then a deputy secretary at the Treasury and now permanent secretary at the Department of Employment, will not be com-plete before next month or November and any new regional legislation is not expected before next year.

The importance of the study. now being led by Nir Quinlan's successor. Mr John Anson, cannot be overemphasized. As the country emerges from the horrors of recession, getting regional policy right will be crucial to industrial revival.

And the West Midlands is the the nation's communications network, it also has a long and deep tradition of bard-won skills and a flexible workforce. More than a third of a million jobs have been lost in the last three

YERTS "Mr West Midlands", the junior industry minister Mr John Butcher, is said to favour a radical rethink of regional aid This could involve the dismantling of the present policy, which discriminates against regions like the West Midlands, and using the funds thus freed to provide selective industrial aid.

There are, of course, grants available for the introduction of robots and micro-electronics and while these may be of benefit, for example, to the motor industry they are not designed specifi-

Assistance towards a rationalization of the motor componen sector - one of the West Nidlands mainstays - coupled with, say, a halving of the iniquitous 10 per cent tax, in addition to VAT, on new care probably would work wonders for the region.

BRITISHFUNDS

anxious day, rallying 8p to 438p after the announcement of the proposed sale of 12 per cent of its cherished stake in the Forties Field, which is expected to raise Elsewhere, prices barely stirred

with the FT Index closing 1.2 up at 713.6, having opened 2.4 up. Among leading industrials, BICC was up to 331p after figures, Associated Dairies rose 2p to 172p, BOC Group 3p to 227p, Cadbury Schweppes 2p to 100p and Thorn EMI 3p to 621p. But and Inorth Ent 3p to 22p, Girad Metropolitan 3p to 322p, Hawker Siddeley 4p to 298p and Bowater 2p to 213p. cut soon in interest rates on both

Dealers sighed with relief

yesterday when the expected

details of the Government's £50m sell-off of shares in BP failed to

materialize. But with the details

now expected next weel investors

Shares of BP spent a less

withdrew to the sidelines.

It was again left to Government securities to make all the running in the belief that there will be a sides of the Atlantic. This comes after the better-than-expected moncy supply figures this week.

Rises of about 50p were 177p on the news. Dealers last reported in longs, but by the close night were anxious to establish

Troubled Sturla hopes for listing

Troubled financial group Sturia Holdings hopes to regain its stock market share listing in November following publication of its 1983 accounts. The shares were suspended in March at 44p.

Yesterday, at a 90-minute shareholders' meeting to approve the accounts for the 15 months to end April 1982, Mr. David Britton, the chairman, said the company was trading at a modest profit but the still-to-be audited accounts for the year to last April were expected to disclose a loss of about £450,000.

in the 15-month perios when Sturla was rocked by a series of mistoriunes, there was a loss of more than £2m.

Mr Britton, who replaced Mr Robert Knight, a financier, as hairman in April, told the 80 shareholders at London's Grosvenor House Hotel that he had inherited "almost insurmountable

He said he hoped to strengthen the board - Mr William Starkey. the secretary, is the only other director - and moves were afoot for the appointment of a nonexecutive director with a merchant banking beckground.

But Sturla, which hoped to link shortly with a licensed deposittaker, was in need of cash for further expansion.

One likely development, said Mr Starkey, was the acquisition for shares of properties. It would then he possible to mortgage the properties and therefore pump cash into the business.

Howe's act will be difficult for EEC ministers to follow

From Jan Murray,

One of the most powerful cartels in the world descends on the mountainous island once given to Cephalus, God of the Morning Star, tomorrow to plot continuing control of the world's

These are the ten finance ministers of the EEC, whose informal meeting on Kephalinia over the weekend is likely to concentrate on how to guide the International Monetary Fund at a time when the world is acutely suspicious of American influence and badly in need of firm leadership.

This informal neeting will. therefore carefully prepare a joint EEC approach for the IMF's meeting at the end of the month. It is also likely to choose from among its number the man it wants to succeed Sir Geoffrey Howe in the powerful position of chairman of the IMFs interim committee

The EEC members have learnt the hard way that only by pulling the purse strings tight is it possible to peg inflation and keep out recession among the finance ministers at the weekend meeting are several acknowledged expens at this type of tight control, which the Community believes is still necessary if the present feeble economic revival is 10 have any chance of survival.

Sir Geoffrey Howe will be a difficult man to follow. He had established bimself as a financial statesman and had the ear of the American administration as well as the respect of his EEC colleagues. They will be looking very much for someone in his mould to take over the job, aware that their choice is more than likely to take over the chair.

This is because, in the word's of Brussels diplomat this week, the United States has very unhappy relationships with other major Western contries on the lized world, while they provide the chairman of the IMFs monetary front at the moment. development committee. The almighty dollar has become much too almighty".

Cookson

confident

By Our Financial Staff

achieved during the whole of last

year. Turnover was £367.2m,

A workaholic, with an apparent passion for high finance, he is the inspiration of the revival in the fortunes of the very conservative Flemish Liberal Party and the implacable executioner of the present Belgian Government's extremely tough austerity programme. He has provided himself an expert at making his electors swallow bitter pills in a way which even Mrs Thatcher might envy.

His wide knowledge of finance makes him an imposing candidate for the IMF job, and he never seems to stop trying to learn. He lists his favourite pastime as reading but he reads virtually no fiction and instead thumbs through international monetary reports for pleasure. Like many leading Belgian

politicans, he is a true polygiot, and slips effortlessly in and out of four languages, while his master's degree at Syracuse University, New York has given him a feel for the American way of doing A leading light in the European Liberal and Democratic Party, he

has spent this past week in Spain talking to Spanish Liberals and coyly refusing to talk about his chances of landing the IMF job. His chief rival for the post has

also been too busy preparing his national budget to talk about the IMF. His is Onno Ruding, the new Dutch Minister, who has turned his deep academic background to quick political effect since taking over control of his county's finances scarecly ten months ago. Mr Ruding was aged 26 when

he was appointed to head of the international monetary affairs division of the Dutch Treasury. the tradition by which the chairman of the interim committee comes from the industria-Then, after five years in banking, he went to Washington to serve as executive director of the IMF in The name most canvassed for the job is that of Mr Willy de 1980. He can claim therefore, to

knowledge of the fund's workings, although he is a relative newcomer to frontbench politics.

Whoever the cartel on Kephallinia decides on, however, Sir Geoffrey's successor can be expected to carry on down the "virtuous path" which he always claimed he was following.

The IMF's next meeting is due to concentrate on how much it can afford to increase its help on offer without damaging fledgling recovery in the indus-tradized world. The EEC view is that there can be no concessions made which would do anything to undermine that recovery if there is to be any long-term chances of putting the world to rights.

To this purpose, the weekend meeting will also be spending a lot of time looking at the Community's own economic situation and seeing how it is standing up to the continuing strains cause by what ministers believe is ridiculously high-priced dollar.

Mr Francois-Xavier Ortoli, the Finance Commissioner, will be putting forward a careful paper studying the implications of the Williamsburg economic summit. He will be looking particularly at the call made there for a world monetary conference to find a replacement for the Bretton Woods arrangement.

Although such a conference is unlikely to be possible for a long time, the ministers are increasingaware of the need to do something to control the dollar if they are to be able to plan ahead

in this context, Mr Nigel Lawson, the British Chancellor, is likely to face further pressure for Britain to join fully in the European Monetary System. The familiar argument will run that until sterling joins, the EMS will be unable to take on the dollar as anything like an equal, Mr Lawson is unlikely to be secuce by the argument.

against a 10 per cent increase overseas (allowing for currency fluctuations). The latter figure was

higher after allowing for the costs of expansion and rationalization.

Mr Mills declined to comment

Canadians use French tactics to By Pearce Wright Science Editor

stopimports By Edward Townsend Industrial Correspondent

British exporters of upmarket overcoats and jumpers are demanding that the Government takes immediate action to counter what are regarded as blatantly unfair import restrictions by Cana-

In a move reminiscent of the recent French action to limit imports of video tape recorders by insisting they be delivered to only one inaccessible location, the Canadians have reduced the number of customs officers empowered to clear clothing imports to just 26.

The resulting delays, designed to bring down imports of shirts, blouses, skirts, and other low-cost cotton clothing from the Far East, is causing anguish to British manufacturers of cold weather garments such as overcoats, jackets and knitwear. As winter approaches, they claim that they are in danger of missing the vital selling season.

The Canadian action, which could cause another dent in the souring trade relations between North America and the European Community, follows the introduction of special measures last month that allow only those customs officers who have received "special training" to clear clothing shipments.

Montreal now has only six such officers, Toronto has five and Vancouver three, with the remaining 12 scattered around all other Canadian entry points.

In a letter sent this week to Mr Cecil Parkinson, Secretary of State for Industry and Trade, Mr Norman Sussman, chairman of the British Clothing Industry Association, says that the motivation is the refusal of some of Canada's main Far East suppliers to modify their sales under the terms of the Multi-Fibre Arrange-

But to comply with the rules of the General Agreement on Tariffs and Trade, Canada is applying the restriction to all imports and because UK sales are concentrated in the second half of the year they will be hit severely. Canada bought £8.6m

last year and £4.5m in the first six months of this year. a rise of one third. While this accounts for only 1 per cent of total UK clothing exports of £840m, it is made up almost entirely of high value, classic-styled outerwear which, the association emphasized, was already subject to Canadian import tariffs of up to 25 per cent.

Oxford Instruments ahead with scanner

in France, By 1965, discoveries in the field of superconductivity, or how to remove the electrical resistance of some metals by using them at temperatures of minus 270 deg Centigrade, at the Clarendn and elsewhere, were exploited by Mr Wood's company to develop the type of superconducting magnet now at the heart of the NMR

The rapid world technical lead established by Oxford Instruments led to a topsy-like growth in the first decade. In 1977 profits reached £216,000 on sales of £2.8m. Last year's sales of £17.600m produced profits just under £2m.

The group reported yesterday sales up 48 per cent to £26.150m for the year to March 27 with pretax profits of £2.710m.

Several substantial outside shareholders have put up money since 1970. The ownership is divided between Mr Wood and his family's trust, 31 per cent; BOC. 16 per cent; Investors in Industry, 20 per cent: VF Investment, 10 per cent: Robert Fleming, the merchant bank, 5 per cent; present and past employees, 9 per cent; and the rest in pension and share participation schemes.

The company diversified from its dependence on making magnels into a broader range of scientific, medical and industrial Audrey arranging the commercial automation systems after 1971,

Bestobell launches £1.3m cost cutting

By Jeremy Warner

Bestobell has embarked on a big rationalization programme in its overseas businesses and has provided £1.3m against its half year profits to pay for it.

In the first six months of this year, group pretax profits fell from £4.8m to £4.1m on sales just over £5m higher at £66.9m. The cost of the rationalization pro-gramme, which the aviation, controls and engineering group said it hopes to complete by the end of the year, has been taken

The company's shares dipped 3p to a new low for the year of 285p after news of the profits fall. At one point this year, the shares were trading at 408p.

BTR continues to hold a 24 per cent stake in Bestobell - the product of an abortive takeover bid nearly three years ago, it has on more than one occasion hinted that it will come back if Bestobell does not perform but at the moment would appear to have its hands full with acquisition of Thomas Tilling.

Mr A B (Sandy) Marshall chairman of Bestobell, says that

there are signs that the Better economic climate in Europe and the United States will continue and he expects some improvement in group trading

The half year dividend is being held at 5.7p. At the annual meeting in May, Mr Marshall said that appropriate measures would be taken to match capacity with

Miss Durie has little to lose a lot to find out

should ensure that no player is quite irrelevant. at his or her best in the final. The tournament has mostly been played in daylight, but on Sunday evening.

in daylight, but on Sunday evening, will probably end under floodlights. Thus sounds, and is, ludicrous. Bob Howe, the referee, said yesterday: "The biggest factor here, is how much time you can get on CBS television, Everything works on the ratings, and the higher ratings are from 4 nm onwards."

we have to give a little bit, if we want the singles semi-finals to be on television. And if you're a little tired going into the final, there's something that keeps you 'up' as long as you're out there."

Miss Shriver plays Miss Navrati-lova in one of today's semi-finals, and Joanna Durie, of Britain, opposes Mrs Lloyd in the other. Miss Navratilova has won 14 of her 17 matches with Miss Shriver - the last four in straight sets. But two of Miss Shriver's wins occurred in this tournament, which Miss Navratilava has not been able to win in 10

Mrs Lloyd has won all her three matches with Miss Durie, but the latter can find encouragement in the fact that she has done better every time. She won no games in their first match, but took four from the second and seven from the third.

Mrs Lloyd, aged 28, is making her thirteenth appearance in the tournament, and has been champion six times. Miss Durie. 23. is playing here for only the third time, but is pleasantly aware that she has In the last three momths, she has reached the last four of the French

freestyle bronze medallist in the European swimming champion-ships, is the leading member of the

Esso national youth squad for 1984. The 30-member squad comprises 16

girls and 14 boys, and has been selected by the amateur swimming

association on performances this year, culminating in the national age

group championships at Blackpool last month. Eleven of the squad

have been selected for the first time. SOUAC Girle: H Day, R Gloor, S Hammerton, S Hardcastle, K Hodgson, P Hutchison, J Hardcastle, K Hodgson, P Hutchison, J Simpworth, N Kornesky, Z Long, L Masters, K Mellori, L Poulto, K Read, R Smith, L Wilson, J Wood, Style N Adams, M Addres, R Cole, K Engstrom, P Howe, C Kirlstand, R Lee, R Leistman, D Lege, G Lilley, D Lyles, S McChaeld, K Milburn, R Werd.

The United States championships and US championships. She has yet begin to finish this morning. The to find out how good she can be, and men's doubles final will be played at is playing on a surface that suits her 10.30. In both singles events, the game. The fact that Miss Durie has semi-final and final rounds will be already won about £20,000 from played on consecutive days, which these championships is almost

> There have been mutterings about Tracy Austin's withdrawal from the championships which was so tardy that there was no time to revise the seeding. One consequence of this was that Miss Durie (it could have been someone else) did not have to play a seed on the way to the semi-finals.

on the ratings, and the higher ratings are from 4 pm onwards."

Pamela Shriver suggested that in the past two years the scheduling had been responsible for the fact that she and Martina Navratilova had failed to win the doubles. "But we have to give a little bit, if we the other hand, see has not has the same sharpening experience of playing opponents of the highest class. Today, somehow, she has to slip into a gear which Mrs Lloyd has already engaged – notably against Kathy Jordan (who beat Mrs Lloyd at Wimbledon), and Hana Mandlikova.

Bill Scanlon, the man who knocked John McEnroe out of the running, took four hours and 14 minutes to beat Mark Dickson 3-6, 6-4, 4-6, 6-3, 7-6 on Wednesday, and the standed five evening, in a match that ended five minutes before midnight. This earned Scanlon a semi-final against a player he has never beaten, Jimmy Connors, who has been champion here four times and runner-up

"I enjoy playing somebody who stays back, as he does," Scanlon said, "He's going to stay back, and I'm going to attack, and it will just be a question of who does it better. There's no great strategy, anyone is going to pull, I think it will be my serve against his return of service.

Scanlon and Connors occupy
what has become the American half of the draw, in the other half, Jimmy Arias (the name derives

Sharp a growing batsman

SCARBOROUGH: Yorkshire, with six first innings wickets in hand, lead Surrey by 11 runs.

Kevin Sharp completed an admirable hundred as Yorkshire went into a narrow lead yesterday before the rain arrived during the lunch interval. Seven balls in mid-afternoon was all the cricket that the weather allowed later, to the disappointment of a large holiday

crowd.

This was the left-handed Sharp's second century this summer. Crisp cuts and drives brought him most of his 15 fours and underlined his growing confidence as a batsman. Moxoa, Sharp's overnight partmotion, Sharp's overnight part-ner, did not stay long and was held low at second slip. Hardey batted for 80 minutes before he pushed forward and misjudged Pocock's turn. The off spinner then had Love leg-before offering no stroke to a ball which went straight on.

Yorkshire's principal sponsors, Servowarm, who have put more than £25,000 into the county club this season, have chosen Boycott as their Yorkshire player of the year. Boycott, whose playing future with the club is being settled by the committee on October 3, receives 000,13

Cook serves up some tasty fare

By John Woodcock, Cricket Correspondent

In their attempt to catch Essex at the head of the county championship, sponsored by Schweppes, Middlesex were held up yesterday by the weather. Barely three hours play was possible in which time Northamptonshire took their first innings from 31 for one to 202 for five and Middlesex their bonus points from four to six. Middlesex their bonus points from four to six. Middlesex now trail Essex by 13 points.

Weather permitting, there is still the chance of a result. Although the ball is not turning as much as Middlesex had hoped it would, they may yet conjure something out of the last day. Northamptonshire, if they are not soon bowled out in their strong could reasonably declare, as in their turn could Middlesex. And Northamptonshire, if they are not soon bowled out in their second innings. It is unlikely but not impossible.

Yesterday Emburey and Ed-

It is unlikely but not impossible.
Yesterday Emburey and Edmonds, who have both had such a splendid season, were not especially effective. Edmonds was swept and pulled too often. His long leg was frequently in action, which was not good bowling. And Cook can seldom have played much better. Watching him now was to know how he came to be picked to tour

Australia last winter. He began by flicking Williams through the leg side for several boundaries, and to Edmonds and Emburey he used his feet to drive them through the covers. This was a high-class piece of batting, so that it was a surprise to discover that Cook was a suprise to discover that clock has yet to make a hundred this season. With Mallender a well-organized nightwatchman 85 min-utes passed before Middlesex took their first wicket of the day, Daniel

County who scorned one-day game now look to it for redemption Yorkshire win neutral hearts

Earlier this week, I was writing about Somerret as a West Country-man, for I have lived in those parts for nearly half a century. But, at heart, my first cricketing allegiance has always been with Yorkshire, where I was born. Boyhood passions cling. I do not care for Sunday cricket, and cover it as little as the sport editor will permit, but I do find myself emotionally involved in the John Player League this year, for Yorkshire will become champions if they beat Essex in the last match on

There was a time when I did not grow excited about a Yorkshire grow excited about a Yorkshire brave thing to do, and to win a success. A nod of approval if they trophy for them would be a firring won, a strug of disappointment if end to a worthy career. He first they did not. Another one would be played for them in 1951. Not that along soon. But 1969 was the last his career is necessarily over. It won, a strong of disappointment of they did not. Another one would be along soon. But 1969 was the last year in which they won anything, an anprecedented run of failure. Every Yorkshireman has his theory about the reasons. Certainly, one has been their entirely creditable decision to bern within the county players.

This is why neutral opinion is on Yorkshire's side, something inconceivable 15 years ago. Then, a Yorkshire defeat gave general

pleasure. Now, it is felt that a Yorkshire success would do English cricket a power of good. Even Lancastrians will be wishing them well on Sunday. There used to be a saying that "a strong Yorkshire means a strong Engand". It was never altogether true until now.

Another reason for public sympathy towards them is illingworth. When he was captain of England, his leadership did sometimes strike a jarring note; but he was popular, especially with his players, and successful. To return as Yorkshire captain in his fifties was a brave thing to do, and to win a Curter is necess would not surprise me to see that familiar sturdy figure at a Yorkshire crease a few times yet.

It is, I suppose, ironic that Yorkshire, who greeted 40-over cricket with contempt, should now be looking to it to redeem what has otherwise been a poor sesson. "Our batsmen are taught to build innings", I remember Ted Lester saying, "and our bowlers are taught

with the principle, and still do; but times after, and it is as well that Yorkshire have brought themselves reluctantly to terms with it.

If Yorkshire should lose at Chelmsford, and Somerset win at Taunion. Somerset would be champions. It is odd to think that the last time I was really concerned about a cricket result was when Somerset lost the Gillette Cup and then the John Player League on consecutive days in 1978. At that time, Somerset had never won

anything.

But they won both the next year,
to general relief, and have had several more victories since, though never in the county championship.

They have had enough wans to keep them going for the time being, and though they do contain a substantial local and the substantial local a local element, two of their best players are West Indians. So, os Sunday, I shall not be singing The Green Hills of Somerset, but Ilkla Moor Baht At. I doubt, however, whether I will risk it in The Star at

Sun Princess stays on Leger course

Sun Princess remains a definite rumer for the St Leger despute the steady downpour at Doncaster yesterday. This was the message spelled out loud and clear by Dick. Hern after the royal trainer had won the May Hill Stakes with Satinetta. The ground was heavy when the filly finished second to Ski Sating at Newbury. It was soft in the Yorkshire Oaks and don't forget that Epsun was nearly abandoned before she won the Oaks by 12 lengths".

There must, however, he some doubts about Cacricon's participation. Robert Sangater had warned on Wednesday that the winner of French Derby and the Benson and Hedges Gold Cup might be withdrawn in the event of bad weather. "We want to run and will not make a final decision until Saturday morning. But there would be no point in risking a horse with Cacricon's speed over a mile and three-quarters in the must". There must, however, be some three-quarters in the mud".

Mr Sangster must be right. And when intentions are made clear in this fashion, the punters and the public have been supplied with the latest information. Ladbroke's still offer 13-8 sexinst San Princess and 2-1 against Caerleon.

The final stage of the ground will clearly be determined by the weather, "It's softish at the moment", said Sannette's jockey Willie Carson. Hern commented: "If there's no more rain, it could well become good to firm again". Satinette experienced little diffi-Satinette experienced little diffi-culty in reversing the Waterford Candelabra Stakes placings with Shoot Clear on 71b better terms. Forging ahead early in the straight, Lord Porchester's Shirley Heights filly beat Nepula by one and a half lengths with Shoot Clear, the 7-4

"She did that very well", said Ascot or the Prix Marcel Boussac at Longchamp". Talking about Shoot-Clear, Michael Stoute said: "I had my doubts beforehand on these terms, but Walter Swinburn is adamant that the going beat the

Earlier in the afternoon both Stome and Swinburn had stood in the winner's enclosure after Karadar the wanter's caclosure after Karadar had given the Newmarket trainer his first victory in the Doncaster Cup. Swinburn excelled himself on the Aga Khan's game and consistent four-year-old by stealing a decisive advantage as the field straightened out for home. "If a horse deserved a group race, it's Karadar," said the trainer. "He will miss the Jockey Cinb Cup, but he's going to be trained for the Cup races in 1984."
Mountain Lodge was under pressure early in the straight and could only finish third.

the headlines. Sandy Barclay, the wonder-boy jockey of the 60's, made a surprise comeback when winning a surprise comeback when winning the Kivston Park Steel Stakes on Annie Edge of the astute Welsh trainer Derek Haydn Jones and Out trainer Derek Haydn Jones and Out of Hand, the colt who was so badly injured at Brighton and Newmarket last season that he was forced to spend eight months in his box during the winter, beat Ismore and Mehndra in the Portland Handicap. Horses have always run kindly for the jockey and the old magic touch was apparent as the Scotsman produced Annie Edge with a perfectly-timed run to catch Lester Piggott, and Salieri, close home. "He may not suit everyone, but he'll do for me," said Haydn Jones.

GOLF

Top flight Torrance takes off with seven birdies and an eagle

Craus-sur-Slerre

The relief of being virtually assured of his Ryder Cup place appeared to galvanise Sam Torrance in the £130,000 European Masters sponsored by Ebel on the Crans-sur-Sierre course here yesterday. His 63, nine under-par, was a work of art and it provided further evidence of his abundant talents and his value to Tony Jacklin when Europe face

to Tony Jacklin when Europe face the Americans in October.

In full flow Torrance is one of the most marvellous sights on a golf course. It is not simply the sheer power with which he dispatches the ball but the fine control that he possesses. Even with the driver, with which he can power a ball more than 300 yards in the rarefied air of this 4,000st high Alpine resort, he seems to have the ball on a string.

Since his success in the Scandanavian Open in July the hugher Scandanavian Open vian Open in July the husky Scot has struggled to score well even though there was little wrong with his game from tee to green. Torrance has one of the smoothest putting strokes in the business, but for no accountable reason his touch armiched to be thread to his forch vanished. So he turned to his father, Bob, who is the professional at the Routenburn Club in Scotland.

This time the advice was not of a This time the advice was not of a practical nature but merely a suggestion that a different putter might lead to a change of fortune. Torrance immediately took that advice by peering into his father's golf bag, taking "permanent loan" of a centre shaft putter which on Monday he had fitted with a stiffer shaft by Barry Willett, who is much respected in the art of refurbishing golf clubs.

Torrance: in full flow

By rationing himself to only 28 atts Torrance emphasised that the range of patter has worked a treat. What was more impressive, how-ever, was the manner in which he struck the ball. He made hardly a single error on a marvellous day when the sun shone brilliantly and made one think how nice it would be to wrap this beautiful Swiss resort in tinsel and take it home to show those less fortunate not to have set their eyes on such a scenic

Torrance collected his seven birdies and one eagle, the latter achieved with a curing put of fully 40ft at the 515 yards 15th in a 12 bole spell in the middle of his

YACHTING

power by driving the seventh (317 yards) and almost reaching the 16th (328 yards) although he insisted that to break 60 would require immense

Even so the lowest scoring of the summer is so often achieved when the tour comes to this course. In 1960 the Italian, Balso vino Dassu managed a 60, a score which still stands as the lowest in the history of the European tour and in 1978 the a world record with 11 birdies and an eagle in succession spread across

might challenge that particular record today, for he finished his opening round with five consecutive birdies.

A similar streak of scoring is what Nick Faldo (70) and Severiano Ballesteros (72) will need to apply pressure on Torrance, although Sandy Lyle arrived as a real contender late in the day bu contender late in the compiling an excellent 64.

Lyle was putting for eagles, and it was his putter that let him down, at the last hole where he missed from the last note where he missed from two feet to fie the lead. Even so, he collected eight birdies in a round which suggests that he has finally regained his form following a long spell in the shadows since his success in the Madrid Open at the

Questions over winged keel 'no longer arise'

From Barry Pickthall, Newport, Rhode Island

which has caused such controversy of adding end plates to the bottom during the America's Cup trials, of the keel, but then refused to sign continues to be wrapped in secrecy.

Members of the New York Yacht
Chib committee, and syndicate
heads from the rival Liberty defence campaign, had been expecting to get their first sight of the keel today when the two 12-metres are lifted out of the water for their final

merely a check that flotation marks and sail areas correspond with our certificates". Warren Jones, director

certificates", Warren Jones, director of Alan Bond's Australia II syndicate, said yesterdsy. "Questions over the keel shape or design no longer arise, and we intend to keep this under wraps, probably until after the Cup series."

The New York Yacht Club also appear to be making little headway with their efforts to prove that Australia II was designed not by the Australian architet, Ben Lexcen, but by a team of Dutchmen, headed by Dr Peter van Oossanen, from the Netherlands ship model basin.

Charges by Richard S. Lathem, Charges by Richard S. Lathem, member of the America's Cup

selection committee, that Dr van Oceanen had admitted to him that aerospace laboratory, and not five wind.

opt to The winged beel of Australia II. Lexcen, had first proposed the idea By John Nicholls

> have gone unanswered.
> "We have advised the Dutch to ignore this letter in the hope that the natter will eventually go away," lones said.

> Dr van Oossanen, who has just arrived to watch the seven-race series, which starts next Tuesday, would only say that the Netherlands ship model basin would be making a distance to the seven week. statement next week, presumably

> statement next week, presumably after racing has begun.
>
> John Valentijn, the Dutch expatriate who designed Liberty, has abandoned his idea of fitting wings to the keel. Trials with a wing attached to Liberty's trial horse, Preedom failed to provide any conclusive benefit.

Race abandoned

The 505 National Championships at Lyme Regis yesterday had to be abandoned after only a lap, a number of boats having got into difficulties in force six to seven conditions. Some suffered broken equipment and even bull damage, and the rescue facilities were fully employed. A short course had been

Champions

Chris Cairns and Scott Anderson the new Tornado class world champions, had no need to compete champions, had no need to compete in the final race, and did not do so when the series finished at Hayling Island yesterday. They had already established an unbeatable points total after the first four races, and left their 60 rivals to fight for second

wet and windy day, when a little more wind might have led to yet another abandoned race in this hard-hit series, sponsored by Lombard. Several boats capaized, one broke in half and there were many other early retirements.
At last, some British crews
figured among the prize winners:
Reg White, crewed by Olle, finished
second, and his son, Robert, crewed
by Campbell-James, took third

PRYTH RACE: 1, N Peischel and V Schlogbers: (Austrie); 2, Reg White and 9 Cn (GB); 3 Robert White and D Compbel-Jerse (GB); 4. W van Bladel and N Lembrex (North; 1 R Smyth and J Gleen (LIS); 5, Y Lodey and I Austredat (Fr).

OVERALL: 1, C Ceime and S Anderson (Aug) 15.7 points: 2, van Stadel, 25.4; S. Lodsy, 37; 4 Smyth, 39.7; S. C Claus, and B Henvin (Austria) 48.4: 6, Petschel, 52, British plati White, 58: 8, Robert White, 57.7.

TRIATHLON

Test for US in Nice

The United States, whose invention of new-style triathion six years ago has inspired an international fascination for endurance racing, will be strongly challenged at the world championships in Nice tomorrow. They have dominated the main events but will be under the treasure from subjects representing

pressure from athletes representing a dozen countries, including Britain. Since the first Hawiian Ironman triathlen in 1977 the combination of swimming, cycling and running has attracted competitors who felt they had nothing more to prove in their specialist sports. The formidable fronman race, a 2.4 miles sea swim,

runer. In the first United Kingdom championship last month, the Americans promptly ensured that their best men would be in Nice, including three former fromman champions, Dave Scott, John Howard and Scott Tinley.

Russell, in his fourth training of the accept in Scientific hands on the second in Scientific Language.

the season, is Britain's best hope, particularly in the absence of the quadrathon champion, Richard Crane, but his inexperience in cycling may keep the Americans safe for at least another year. With specialist sports. The formidable fromman race, a 2.4 miles sea swim, 112 miles on a bicycle, and then a marathon run, has grown from humble 15 competitors to 850 last time.

Now the triathlon is becoming fashionable in Britain, with at least 20 scheduled races over varying adidas provided the backing in the quadrathon, which throws in a 50-kilometre walk.

On hearing the winning time of the sale and the sale and some fashionable in the fashionable in Britain, with at least 20 scheduled races over varying adidas provided the backing in Nice, with Weathershields having donated £12,000 to the United Kingdom championship in Durham.

BOXING

Going to work on a nest-egg

Holmes: sparring ends

Larry Holmes, the World Boxing Council Champion, has finished sparring and reduced his workouts for his title defence in Atlantic City tomorrow night against a little-known and lightly regarded fellow-American, Scott Frank. The contest is the first of two designed to assure the 33-year-old undefeated champion of a nest-cet for his old age. pion of a nest-egg for his old age.
Holmes will receive a guaranteed
\$1.5m. And when he meets Marvis
Frazier, the son of the former

heavyweight champion, Joe Frazier, in November, he will receive \$3.1 m. After that bour Holmes will have to meet the leading contender, Greg Page and, win or lose, he will pocket \$2,55m for that and retire. The 25-year-old Frank has had 20 Victories, 14 by knockout, and one draw. He is ranked tenth by the WBC and the seventh by the World

Boxing Association. Alexis Arguello, of Nicaragua, would like to retire in December as the first boxer in history to win

world titles at four weights.

To do so he must win tonight's revenge contest in Las Vegas against the American, Aaron Pryor, holder of the WBA light-welterweight title. Pryor won their first meeting in Miami last November when the referee intervened in the fourteenth round. Arguello is a fermer champion at featherweight, junior lightweight, all under the aegis of the WBC. He knows that at 31 he would not have many more chances, even if he were not retiring; but Proof 5 coach, Emmanuel Stewart, believes the retirement decision has given Arguello extra incentive to win.

Rudy Koopmans, of Netherlands, will defend his European light-heavyweight title against a Frenchman, Rufino Angulo, in Paris on November 21.

Grand Prix delay

Rain and thick mist on the mountain sections of the Isle of Man TT course forced the postponement of yesterday morning's 250cc Grand Prix. The races will now be held today, weather

coming championship season,

By David Hands

day, in chastened mood after the 38-4 defeat dispensed by Bristol at the Memorial ground on Wednesday evening. Their gloom will not have been alleviated by the loss during the game of two players with leg injuries; happily neither proved serious, though the lock, Martin,

was given a precautionary X-ray to make sure no bones were broken.

it was a loose performance by

Zimbabwe, bearing out the words of

Lou Corbi, their coach, that they need to tighten their game and establish positions on the field

which give their young backs a chance. Corbi must be hoping that

his players will be able to use their undoubted mobility against Tor-

quay, put some points on the board and get a win under their belts

which will give them confidence for the remainder of the programme, against Leicester, Bridgend and

Clearly the lack of Currie Cup

competition - links with South Africa were broken when the state of

Zimbabwe came into being - has set back the cause of Zimbabwean

rugby. Equally there is considerable hope for the future in the numbers

of black youngsters taking up the game. It could be as little as two or

three seasons. Corbi predicts, before they are pushing for places in the national side which, at present, has an average age of 23.

Bristol will have been happy with

the performance of Hogg, who scored 22 of their points through a

try, four penalty goals and three conversions. He has left Exeter

University and has taken up a teaching appointment in Taunton

so will be regularly available to

The Zimbabwean touring side have moved on to their next match, against Torquay Athletic on Sun-day, in chastened mood after the RUGBY UNION: MOVE AGAINST PROFESSIONAL CIRCUS

Clearly the RFU, awre of the they would be able to continue in intense interest and speculation their present job which, says the among their members, have to letter, would appear most likely take some kind of precautionary from the proposed itinerary of action which is limited in scope only by the extent of the trust which exists between the two sides of the game, playing and adminis-trative. Hence the president's reference to "honourable people". England's international season begins against Canada on October 15, continues against New Zealand on November 19 and resumes with the championship game

players involved in the profootwear. fessional tournament. It is fair to assume that those players picked against New Zealand (the Canadian game could involve some experiments) will have declared

Air Commodore Weighill was also at pains to scotch a report last weekend that the Canadians' five-match tour in October was in doubt, because of fanancial difficulties faced by the Canadian union. From the time the touring party assembles in Canada it is being funded by the RFU, bence there was "no question" that the tour would not take place.

themselves available for the whole

A controversy which also bedevilled the game last season was that concerning boot money. The RFU have received a number of tenders to supply equipment to the union and room will go before the full committee

neur, David Lord said yesterday in Auckland that he was confident that his prefessional rugby union series would go ahead. The chairman of the Auckland Rugby Union, Ron Don, described the proposed series as a myth which had started as a dream and ended as a confidence, trick. Ray Williams, the secretary of

the Welsh Rugby Union said that at the moment they had no intention of contacting players warning them of the conequences of being involved in the rugby circus. He said: "All the players are very aware of the conse-quences of being involved in this type of operation. It is now up to them. Mr Williams added, "As far a I am concerned the whole thing is still shrouded in a with the championship game against Scotland on February 4.

In between November and February, the Autralian entrepreneur, David Lord, is due to somewhat painful controversy, agents in rugby union football." Lord or anyone else for that matter for setting up a pro-

School's decision is a kind of betrayal for the diehards

Ripples of change could spread as Cowley enter league cup

are bound to be considerable, as they have been since Cowley, one of the dedicated and successful Rugby Union schools in the country decided to enter the Rugby League Open Cup.

The decision followed lengthy discussions with pupils, coaching staff and the headmaster; everyone concerned was unanimous in their approval. Cowley boys will have the opportunity of representing league honours, in the shape of the forthcoming league tour of Australia. At most five or six games would be played, depending upon the school's success or failure.

To a right wing diehard this move may appear some kind of betrayal, but Cowley are not alone. De La Salle College, where Tony Neary was educated and Winstanley College, and the sixth form establishment in Wigan, have both recently competed in the League Open Cup; neither, however, enjoys the national reputation that Cowley have earned. Their enterprise (or defection to some folk) could start a significant trend.

it is the sale of Cowley's contribution to the union game that makes the decision so significant. Apart from turning out floods of first-class club, county and (occasionally) international players. they have been pioneers in foreign tours. Since 1972 they have visited South America, Canada, France, Australia and Portugal and in two seasons hope to tour the united States.

Situated in a passionate league area. Cowley has over the years developed close ties with the local union team of St Helens, but when Ray French, the former union international and Great Britain Rugby League lock, was made to feel unwelcome at the club, where he had coached his own Cowley lads as well as St Helen's players, he and his charges moved their allegiance to Waterloo. The incident occurred some years ago but the swift advance of the one and a sad decline in the other's fortunes

French was chosen to follow Eddie Waring as the BBC's Rugby League television commentator, he

has written a couple of successful books on rugby, union and league, and another has been commissioned. But he will not break with teaching and enter journalism full-time,

It might come as a surprise to some union men to discover just how close the two codes are in an area like St Helen's. French sees the whole situation against a back-drop of social change.

Both pupils and teachers are very different from twenty years ago. John Ireland, an Old Cowleian, who represented

England Schools, Orrell and Lancashire, would agree. He teaches at John Rigby VIth Form College, where Rugby League is played entirely. The old distinction between the secondary modern playing league and the grammar school playing union has gone with the advent of comprehensive education

Many schools have given up or have been force to give up the struggle; they do not play Rugby Union any more but the fact is masked by their continued affiliation to the Union, in order to qualify for international tickets, free passage ween the codes at school level is utterly norma yet it has its dangers. French says: "A lot of Cowley ads have played amateur Rugby League on Sunday but I'd rather have them playing under school discipline, where there is no chance of split loyalties. We're all right at Cowley but where rughy s weak at a school, a lad will naturally gravitate

Another factor which must have influence Cowley, is expense. If costs continue to escalate, fixtures may well have to return to a more provincial and localized beis. In the League Open Cup, BUSCARLA (the Amateur Rugby League Association for Secondary Education) will defray half of all travelling expenses. French affirms that ... we are proud of our reputation as lovers of both codes of rugby and wish to show the true spirit of amateur schoolboy sport - no distinction, no bigotry and no hypocrisy, which is all too prevalent in rugby today". Mike Stevenson

Fitzgerald operation

Ciaran Fitzgerald, who led the British Lions in New Zealand last

hernia and will be out of rugby until

Steve Cram has broken the mould like no third party to power culd over dream of doing. When the two principal parties, Sebastian Coe and Steve Overt, were ailing last year, Cram annexed the European and Commonwealth 1,500 metres titles and topped all the poils for leading middle-distance athlete of the year.

Overt's comeback this season was accounted lest Sunday with a world crowned last Sunday with a world record of 3minutes 30.77seconds in the 1,500 metres, retrieving the three-year hold on that record that he had lost to Sydney Maree of the United States the previous week. With Coe still on the sidelines, Cram had summarily disposed of Ovett's challenge last month when the youngster won the world championship 1,500 metres, with

Ovett in fourth place. Now Overt is getting a remarch with Cram over the mile in the Coca-Cola metting at Crystal Palace this evening. Ovett has got what he wanted and is probably surprised to have done so this quickly. After all, when the whole world wanted to see when the whole work wanted to see him a Coe meet up outside championships, that never happened in three years. And with Coe's illness excluding him from even training for the next six months, that meeting may never happened.

presumably have dictated, as has on British soil, with 3:49.57 happened with others in the past, that Ovett be kept out of the race. But he accepted the challenge competitor in modern middle-dis-

Whether their race will produce a world record, or even a national record, is another matter. Those who saw the meandering first two who saw the meandering first two laps of the 1980 Olympic and recent world championship finals will expect the same sort of thing, with Overt and Crain more intent on watching each other in order to secure victory rather than records. But this is where the independent

Andy Norman, the England team manager, whose rise to power in European athletics has been concurrent with the heyday of his friend.

Sir Anthony, who is 63, was no great cricketer - he did not make the Winchester XI - yet his achievements in the field of commerce are

second to none. In his year of office, now near completion, he has done much to sort out the finances of

MCC, which, to put it mildly, were

not in a healthy state. Robin Leigh-

Pemberton, who subsequently became the Governor of the Bank of

England, was drafted in to help

had a go at the so-called cricket establishment, men like Gubby

Allen, who have given so many years to the game." Sir Anthony

years to the game, sir Aminony says: "They were entitled to criticize the financial management of the club, which was not handled well. We have been challenged to run it in

the manetal management of the club, which was not handled well. We have been challenged to run it in a more businss-like way, which is why Hubert Doggart felt that experience of international business the management of the progress on the issue, it was Sir Anthony. Yet despite knowing the arriver unable to do so. It is a big regret cricketeers and the authority to the contract of the contract of

MCC's finances and streamline the
committees includes some of our
critics, those who feel that sub-

"I was sorry that some members

of mutual evasion was the specter of falling market value in the subsequent independent meetings for the loser. But any questions that have even hinted at his commercial market ability this season have been dismissed with palpable disinterest by Cram.

As world champion he could as her could assume that have distance and both men have hardly run the distance since setting their best times. Over t still holds the best time or level and have hardly run the could assume that have distance as a level and both men have hardly run the distance since setting their best times.

year Oven had been the most general competitor in modern middle-dis-tance running. His recent record proves that he is fur from finished but what is questionable is whether he still has the acute finishing speed than won him many races in the straight since his European junior 800 metres victory in 1974.

Cram's tactic, used in his world championship victory and used also by Coe against Ovett in the Olympic final, was to take over anywhere between 300 and 500 yards out and this can serve him well again this evening. For Cram is the fastest 800

chance of bringing home the bacon than his hungry predecessors in their confrontation at anothe Palace

choosing. In private, he met with Joe Pamensky, the president of the South African Cricket Union, who

was in England partly to attempt to

Sir Anthony's business connexions with South Africa have caused a raised cychow or two, even

MCC arranged to decide whether

Anthony does not duck the issue: "If

one fiels strongly that spartheid is morally indefensible, then one has to say, 'would one help get rid of it by taking RTZ out?' The answer is

If anyone could have made some

onties in South Africa have done

sign leading players for a tour.

at the extraodinary meeting v

broke the Ovett mould.

CRICKET

Sunday Test play doubt

A total of 175.687 spectators paid to watch the four Cornhill Test matches this summer in which England beat New Zealand 3-1.

Receipts were £823.590 (advance the Test and County Cricket Board to the State of S sales £362,477), with the biggest crowd of the scries being at Lord's on the second day (22,104).

Cram: third man who

Wigan. The Leigh coach, Tommy Bishop, and general manager. John Stringer, flew from Manchester to Gatwick flew from Manchester to Gatwick Warrington have placed their yesterday afternoon to complete the signing of Variey, who can play meither half back position. Wigan had previously decarled they were signing Variey, together with a New Signing Variey, together with a New Zealand international hooker. Howie Tamati.

One of the principal factors in Leigh's successful snatch was the fact that Variey has already played fact that Variey has already played.

are almost certain to scrap Sunday play in Tests best year.

The Australian Cricket Board have decided to omit the Test captain from the selection panel, the board chairman, Fred Benned, said

on the second day (22,104).

Lord's had the biggest total attendance of the summer - 70,831 (receipts £344,050). Other figures were: First Test (the Oval), total crowd 34,043 (receipts £168,240); second Test (Headingley), 36,050 (£150,000); fourth Test (Trent Bridge), 34,763 (£161,300).

The two Sundays of the series failed to draw a 10,000 attendance yesterday.

Mr Bennett, who replaced Phil
Ridings as chairman at the annual
meeting, said the panel would be
reduced from five to three. "This means the captain will not be on the

Leigh sign N Zealand half back By Keith Macklin

Leigh yesterday signed a New in Britain for the Cumbrian club, Zealand international half back, Workington Town, for whom Bishop was coach. Salford, who are having a rough time in the first division, have signed Brett Garside, a forward from Rochdale Hornets on loan.

Warrington have placed their England under-24 international winger, Rick Thackray, on the transfer list at £25,000.

from Jarrow for Palace feast

by Cram.
As world champion he could

promoters - this is the last meeting of the season on the European circuit - come into their own.

Ovet, is this evening's meeting organizer. And he will ensure that there are pacemakers, but whether Cram and Ovett will follow them is a different matter. Both men are capable of breaking Coe's world

metres runner in the world this year, two seconds faster than Ovett.

Whatever the outcome, there is a great race in prospect. Cram is marching down from Jarrow with as much resolution, but with far more charge of bringing borne the become President of MCC has drawn on business expertise

Sir Anthony: RTZ chairman who have slopped that by moving

who have slopped that by moving the goalposts".

"Refusing to play South Africa has not brought the end of apartheid any nearer. People there will tell you that. The critics jeel better, although they will only be fally satisfied if the laws of the country are changed. That is why it would be quite impossible to have South Africa touring here. Inevitably, there would be disruptions.

"Yet for MCC to be used as a tool "Yet for MCC to be used as a too to put pressure on the ICC was unfair. South Africa will sort itself

Star billing

W-Audi has already ensured star billing at Frankfurt by revealing that three exciting new versions of the Andi Quattro, VW Scirocco and Passar will appear there. The Quattro Sport is clearly an attempt to cash in on the four-wheel drive car's rally successes. It is 12 /2 inches shorter than the standard Quattro making it in effect a very restricted two-plustwo coups. Power comes from a 2.2 litre version of the existing five-cylinder engine fitted with a new alloy block, four valves per cylinder and turbo-charged to produce 300 bhp. Extensive use is made of elu-ninium-remforced Kevlar for lighter

have to wait until the spring.

of appeal. Together with Uno, Fiar's new Super mini, and the rejuvenated

Strada II it means that only one further gap remains to be tackled, a replacement for the hig Argenta

executive saloon.

From the brief details leaked by

Frankfurt in several to what appetites for Frankfurt in seems there will be six versions of the Regata with 1,300ct, 1,498cc and 1,385cc (twin-cam) petrol engines and 1,714cc diesel.

New contenders are arriving thick and other running gear are derived and fast in the already overstowded from the rally programme. With that and fiesterly competitive medium car sort of start in life and an acknowledgement by the factory that Frankfurt Motor Show next week is there is plenty more power to come the Fast Regata, a much-needed for the tuning brigade, it should make replacement for the conducted Plat 131 quite an impact on motor sperts range which is better known here as enthusiasts. The Wolfsburg engineers are patting their increasing 4 x 4 expertise to more down-to-earth use with a First is in urgent need of a modern offering to fill the gap in its rapidly-improving range which has become so evident because of the Minston's lack -wheeled drive estate, the Passat Tetra. The Scirocco gets a new 16valve version of the present 1.8 litre injected engine. It will accelerate to 62 mph in 8 seconds and has a top speed of more than 130 mph.

putting their increasing 4 x 4 expertise

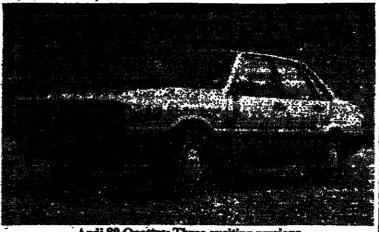

Sierra rumours

Ford's announcement this week of a new three-door version of the Sierra together with a few cosmetic touch for the 1984 five-door models may at last put an end to rumours that have been rife for months. Despite repeated denials by Ford, the grapevine insisted that Sierra's slick shape had proved to be a little too way out for staid Cortina buyers, and

to rectify the position the company was rushing through a facelift. It was said that Sierras with a difference had been seen making moonlight test runs. "Quite right", the Ford men now admit, but what they saw was either the new three-door models which were planned all along and look different because of the elongating effect of a single door and big one-piece rear quarter light window, or the 1984 five-door models with colour-toned plastic bumpers.

body-coloured radiator grilles". The new three-door models are being offered only in downmarket Sierra and Sierra L versions with

black side protection mouldings and

Audi 80 Quattro: Three exciting versions

engine options of 1.3 and 1.6 petrol compensating penalty, however, and units and 2.3 litre diesel. Prices are the 525e will not win any prizes for

A gentle encounter with BMW's remarkable new 525e earlier this year left me tingling with anticipation of a longer aquaintance. Now that I have spent a week with it covering nearly 1,200 miles of very mixed motoring I am convinced that RMW's courage in risking its reputation as a producer of fast, sports saloons by launching a slow-revving, economy model is going to pay off.

It will help readers if I recall some

of the 525's salient points. The Munich engineers took the existing six-cylinder M20 engine, one of the freest revving and most powerful 2/3 litre units around and, not to mince words, converted i into an oldfashioned slogger. In 2.7 litre form as installed in the new 5 series body it produces peak power of 125 bhp at only 4,250 rpm compared with over 6,000 for the standard engine. Translated into on-the-road per-

formance that means it will cruise at 70 mph while ticking over at a mere 2,000 rpm and will top 100 mph at around 3,000 rpm. No wonder the engineers chose the Greek letter Eta (efficiency) to label it and are already talking of it as the forerunner of a BMW's which will be produced in parallel with the existing range. And to that the surprising news that

this is one of the very few energysaving models with an automatic gearbox and the picture becomes even more exciting. But this is an automatic with a difference. The fourth gear is a long-legged overdrive which cuts out torque convertor losses with the help of a lack-up Nothing is achieved without a

wrong. In my view it makes a natural progression for BMW owners with growing families and tightening

overtaking if left in drive. Used

manually - and the spring-loaded lever makes this child's play - it is no souch. I resorted to this tactic fairly frequently for overtaking in circum-stances where a quick burst of speed

was the safest way.

The trade has been suggesting that

525e buyers will not come from the ranks of existing BMW owners but rather from elderly drivers of more

sedate marques who are looking for transport with a youthful image but

still capable of being driven leisurely.

I am not so sure. Judging by the number of BMW drivers who showed

interest in the 525e and cooed with

envy at my overall consumption of 30

miles per gallon, the pundits could be

I found it to be very relaxing family

transport on a holiday trip to Scotland, but one still capable of putting up fast times when the need arose. Like more recent BMW's it was rock steady on the road, the vented front disc brakes and the addition of discs at the rear instead of the standard drums were well up to the demanding task of stopping a full five-seater automatic which lacks the engine braking available on manual

An appointment to the Council's staff will be in accordance with the Council's terms and conditions of service and with superannuation under the MRC Pension Scheme. The salary will be, as appropriate to the person appointed, either within the Council's Special Appointments Grade (which is equivalent to the Universities' professorial scale), or in the NHS Consultant Grade (in which case an honorary clinical contract will be arranged). Subject to the approval of the Department of Education and Science, the successful candidate will, if necessary, be offered assistance with moving expenses. The University of Southampton will be prepared to consider conferring the honorary title of Professor on the new Director.

Additional Information, including details of the present programme of the Unit, may be obtained from Mr D Sanders, MRC Headquarters Office, 20 Park Crescent, London Win 4AL; telephone 01-638 5422 ext 334.

Applications in the form of a short statement (about 1,000 words), outlining in general terms the scientific programme the applicant would propose for the Unit, together with a curriculum vitae, list of publications and the inspec

The Unit was established to study the causes of chronic diseases by epidemiological methods. The current programme includes geographical morbidity and mortality studies of a wide range of diseases, including cancer, together with cohort and other studies of industrial workers. The precise scope and emphasis of the Unit's future programme will be a matter for discussion between the new Director and the Council. Research facilities will continue to be provided in the Unit's present accommodation, which was purpose-built recently within the grounds of the Southampton General Hospital. The present staff complement is 28, including 9 clinical and non-clinical scientists. The Unit enjoys close links with the Faculties of Medicine and Mathematics of the University of Southampton and its staff are involved in both undergraduate and post-graduate teaching.

An applicant should have an established reputation as a scientific investigator, be able to develop the Unit's research programme, and possess the ability to manage and co-ordinate the activities of a team. It is desirable, but not essential, that he or she possess a medical qualification. An appointment to the Council's staff will be in

publications, and the names of three referees, should be submitted not later than 31 October 1983 to the Secretary of the Council at the above

 Jaws has an awful lot to answer for. SHARKS, THE TERROR, THE TRUTH (Channel 4, 6.00pm) correctly assumes that the shark has been given a bad Press, and adjusted in its favour, it seems absolutely appropriate, therefore, that this film - the first in a new series called The Coral Jungle should be the work of a former destroyer of sharks who has now seen the error of his ways. Now he takas pictures of them, usually at alarmingly close quarters, or briefly removes them from their natural environment so that their lifestyle can be studied by marine experts, safely behind glass. The general sion the film comes to is that the shark is a more complex and less frightening creature than we had imagined it to be. The human being, on the other hand, with his instant-death hunter's gun, emerger

Outpost of LA takes root in deepest Bucks

By David Hewson

24

Pompeii is being refurbished, a Roman centurion sports a Sony Walkman and American footballers turn out to be a dodgem car. Pinewood begins another day of recreating the world's fantasies in down-to-earth Buckinghamshire.

While the rest of the British cinema industry maintains an erratic path between ecstacy and despair, marked by Oscar wins and round robin letters to The Times from august film makers, the studios which J. Arthur Rank opened in 1936 to rival Hollywood have found a profitable role as an outpost of LA.

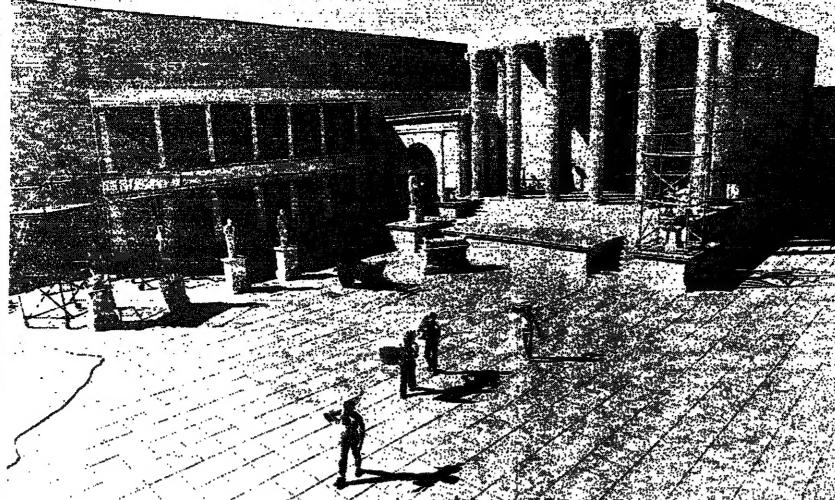

"Around 90 per cent of our custom comes from America and has done for several years," said Mr Cyril Howard, Pinewood's managing director, who joined the studio as a trainee 41 years ago. "You have to face the fact that 60 per cent of the world's box office is in America and four per cent in the United Kingdom." The reality of the power

of the American box office is brought home by the nature of the films currently being made at Pinewood. Ale-xander Salkind, who has made three Superman films at the studios, is currently making Supergirl, a \$25m epic due for release next

The film has involved the creation of an Illinois main street, complete with gas station, fried chicken parlour and bar, to rival an earlier Salkind spectacular at Pinewood, the city street created for Superman II which was the largest set seen at the studios since the Elizabeth Taylor/Richard Burton production, Cleopa-

So secret is Supergirl. that The Times was barred from taking photographs of the film set and of Helen Slater, the 19-year-old unknown blonde New Yorker who has been cast in the

Elsewhere on Pinewood's 100 acres a subsidiary of Columbia is shooting a television serial, The Last Days of Pompeii, and the American makers of the film Aurplane are making a cinematic espionage spoof, Top Secret.

more made projects will keep the studios and their 700 staff busy for the rest of this year, Legends, a fantasy cinema film to be directed by Ridley Scott, and the latest project the Salkind empire, Santa Claus, due to begin, appropriately enough, just before Christmas. Planning is also under

way for a biblical epic financed by Paramount, King David, which is rumoured to star the latest hearthrob American Richard Gere.

The flood of blockbusters to Pinewood is partly con-nected with the weakness of the pound against the dollar, which makes filming in Britain attractively cheap for Hollywood companies. But the studios have also had their own international house advertisement running since 1962. The 13 Bond films, which have all been made at Pinewood, are a permanent showcase to the complex's special effects

Frank Johnson in Blackpool

Arthur versus the average Mullah

Both the old movement and the old town have set a vivid standard against which the rest of the conference season this

year must be measured.

People of flesh and blood have passed a week of all-toohuman quarrels, perorations, solits, reconciliations, more splits and occasional eloquence amid the illuminations, jolly squalor, gales and driving rain of Blackpool. After this, the prospect of the next conference (the SDP opening at nine o'clock on Sunday morning in some plate-glass university in Salford) does not seem exciting. But we travel there in hope.

It was fitting that yesterday, the last full day of the conference, Mr Arthur Scargill should have appeared at the rostrum once more. For a man of whom all the expert observers had said for days was "finished" and "finally gone over the top", he had dominated conversation all week. He spoke yesterday after the morning papers had revealed yet another bombshell directly implicating him - a shock Which report which showed that, under capitalism, there was no known cure for baldness. Wisely, Mr Scargill avoided the subject. He spoke about energy policy. Unlike Soviet civil aviation policy, or Polish industrial relations policy, or baldness policy, this did not seem to be his subject.

He raged at the short sightedness of successive British governments for closing down pits, relying on Arab pit, and importing coal. Good points, all. But he did not persuade us that he and his supporters in the National Union of Mineworkers were a more reliable source of energy than, say, the Arabs. He did prove that he was more stable or predictable than the average Mullah. A perfectly respectable speech, though. But it was surprising that it received such a colossal ovation. Surely been routed at this congress. Ah, an expert observer explained that did not mean the left could not still make the most noise the right being the sort of people who prefer to achieve their aims by stealth.

Furthermore, Mr Scargill had spent a week being persecuted by the popular press. That is a tremendous advantage when you are trying to arouse a Labour movement audience. On and on swept the applause and cheers. Eventually, Mr Scargill got up and applauded back - a custom he had perhaps learnt on fraternal visits while observing curtain calls at the Bolshois, or

from less artistic Soviet insti-

"This sort of demonstration doesn't do us any good, either". observed, from the chair, the cockney tones of Mr Frank Chapple, secretary of the electricians pillar of the right, this year's President of Congress. With his solid appearance, rough ways and deep distrust of the trade unions, Mr Chapple has looked this week like a sociologist's profile of the sort of worker whom the SDP must win from Mrs Thathcer, if it is ever to form a government. Sit out, brother", he observed to a left-wing heckler yesterday. For his chairmanship had been a model of tact.

The performance of the week however, came in the debate on the Government's threat to abolish local authorities such as the Greater London Council. It came from Mr Eric Hammond, another hated figure from the electrical right, who seemed to be Mr Chapple's successor as the union's secretary. He unsucessfully moved an amendment implying criticism of Mr Ken-neth Livingstone's enthusiasms.

Mr Hammond denounced Mr Livingstone for comforting Sinn Fein and likening the British in Ireland to the Nazis; (boos directed, not at Mr Livingstone or Sinn Fein, but at Mr Hammond). He next attacked the "jobs galore" being offered to left-wingers by the GLC at public expense. Recently,

Eventually Mr Hammond came to the philosophical part of his speech. He criticized such public money for terrorist groupies, lesbians and other queer people"; (uproar). A heroic effort from Mr Chapple managed to restore public order.

After this, it was a relief to arrive at the debate on the threat of nuclear annihilation of the entire world. This was attended by a Russian guest. Like a majority of Russians, he was a thick-set man named Boris. My expert observer friend explained that he was as well as being a trade unionist, a policeman, though he looked insufficiently slim to be a part-time specia constable. Another electrical right-winger denounced the Soviet Union and was, of course, booed. Someone, in denouncing the arms race; blamed President Reagan. Boris applauded that speech. Someone else, in denouncing the arms, race, blamed Mrs Thatcher. Boris applauded that as well. So

Anniversaries

Luigi Galvini, scientist was born at Bologna, Italy, 1737, William I. the Conqueror (reigned 1066-87) died at Rouen, 1087.

House, 16 Lloyd Street, Manchester, Mon to Fri 9 to 5.30, Thurs 9 to 8, (ends today).

Home-produced lamb is still an from £1.21 to £1.60 in most shops, Drake Circus, Plymouth; Mon to Sat 10 to 6, closed Sun (ends Sept 15). but are still cheaper in Sainsbury's, for example, where they are down to 98p Sainsbury's whole shoulders are as little as 58p a pound. For the freezer Dewhurst have whole lamb 1782, a provincial architect, by carcases at 69p a pound and half lamb packs at 75p. Their butchers will joint them if required. Beef Edward Saunders, Riba, St Helens House, King Street, Derby, 7.30. prices continue steady as they have for several weeks, with topside, silverside and thick flank all between £1.90 and £2.40. Subsidies

between £1.90 and £2.40. Subsidies to sheep farmers have eroded the sometimes marked price advantages of pork, but boneless shoulder can still be found at less than 90p a pound, and whole legs as little as 80p.

Among this week's best vegetable but are good-oughing carross: 12p to buys are good-quality carrots; 12p to 20p a pound, courgettes around 35p, marrows 20p to 30p each, calabrese 50p to 60p a pound, and sweetcom from 10p a cob, depending on size

from 10p a cob. depending on size, Potatoes, 12p to 16p a pound for English reds and whites, will become more expensive if the main crop disappoints as experted. Runner beans are slightly cheaper but scarce after a poor season: It is still high season for salad lovers. with excellent supplies of tomatoes 20p to 35p a pound. Webbs lettuce from 30p each, celery 30p to 50p a head. Chinese leaves 30p to 40p a pound, cucumbers 20p to 30p each,

The papers

The Government's obsession with opening up essential public services to private profit seems without limit, the Daily Mirror says. "Even the sick are not to be free of it", it points out. The purpose behind letting private firms bid for hospital cleaning, catering and laundry contracts was to help the businessman, not the patients. and laundry contracts was to help the businessman, not the patients. The Health Minister, Mr Norman Fowler, claimed that private enterprise could do these jobs up to 20 per cent more cheaply and that the money saved would be spent on patients. "If there are genuine savings to be made in the Health Service, Mr Fowler should have

Service, Mr Fowler should have been making them. But the most likely way costs will be cut is not through greater efficiency but by lower wages. That in turn means employing inexperienced staff. How can that benefit the patients?"

If we wait for the world to agree on showing Moscow what civilized people think of their behaviour, we will wait forever, the Daily Express says. "The whire of commercial indignation. Japan, a major victim of the Korean airliner massacre, doesn't want to upset Soviet Russia. That other one-

time fearsome nation, West Ger-many, is equally timid. Sir Geoffrey Howe, our Foreign Secretary, is equally non-committal, pointing our equally non-committal, pointing our that economic sanctions have very lite impact. True, Sir Geoffrey, but the thought of Russia getting away without at least one real gesture of anger is not to be borne. The British airline pilots have decided to show their repugnance of Soviet brutality by refusing to fly to Moscow. The Government should match their stand by hanning Aeroflot flights to the United Kingdom.

Weather Torecast

A depression to W of Ireland will move E to be centred over E England by midnight.

6am to midnight
